## AI-102 Quiz, AI-102 Exam Topics Pdf

You can trust top-notch Designing and Implementing a Microsoft Azure AI Solution (AI-102) exam questions and start preparation with complete peace of mind and satisfaction. The AI-102 exam questions are real, valid, and verified by Microsoft AI-102 certification exam trainers. They work together and put all their efforts to ensure the top standard and relevancy of AI-102 Exam Dumps all the time. So we can say that with Microsoft AI-102 exam questions you will get everything that you need to make the AI-102 exam preparation simple, smart, and successful.

Microsoft AI-102 (Designing and Implementing a Microsoft Azure AI Solution) Exam is a certification exam that focuses on the skills and knowledge required to design and implement AI solutions using Microsoft Azure. AI-102 exam is designed for individuals who have experience working with various Azure services, including Azure Cognitive Services, Azure Machine Learning, and Azure Bot Service. AI-102 Exam Tests the candidate's knowledge in designing and implementing AI solutions using these services, as well as their ability to integrate AI solutions into existing systems.

## Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q177-Q182):

### NEW QUESTION # 177

You create a knowledge store for Azure Cognitive Search by using the following JSON.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic. NOTE Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

### NEW QUESTION # 178

You train a Custom Vision model used in a mobile app.

You receive 1,000 new images that do not have any associated data.

You need to use the images to retrain the model. The solution must minimize how long it takes to retrain the model.

Which three actions should you perform in the Custom Vision portal? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

#### Answer:

Explanation:

Explanation:

1.) upload all the images

2.) Get suggested tags

3.) Review the suggestions and confirm the tags

reference:

<https://docs.microsoft.com/en-us/azure/cognitive-services/custom-vision-service/suggested-tags>

### NEW QUESTION # 179

You are developing a text processing solution.

You have the function shown below.

#### Answer:

Explanation:

Explanation:

The output will include the following words: our and included. # No

The output will include the following words: Paris, Eiffel, and Tower. # Yes The function will output all the key phrases from the input string to the console. # No Let's examine the function:

```
static void GetKeyWords(TextAnalyticsClient textAnalyticsClient, string text)
{
    var response = textAnalyticsClient.RecognizeEntities(text);
    Console.WriteLine("Key words:");
    foreach (CategorizedEntity entity in response.Value)
    {
        Console.WriteLine($"{entity.Text}");
    }
}
```

\* The function uses RecognizeEntities from the Azure Text Analytics SDK.

\* RecognizeEntities detects and categorizes named entities in text (such as locations, people, organizations, dates, etc.).

\* It does not extract all words or key phrases.

\* For extracting key phrases, you would use ExtractKeyPhrases, not RecognizeEntities.

\* "The output will include the following words: our and included."

\* These are common words, not entities. They will not appear.

\* Answer: No

\* "The output will include the following words: Paris, Eiffel, and Tower."

\* These are named entities (location, landmark). They will be recognized and returned.

\* Answer: Yes

\* "The function will output all the key phrases from the input string to the console."

\* No. The function extracts entities, not key phrases. Key phrases would require ExtractKeyPhrases.

\* Answer: No

### NEW QUESTION # 180

You plan to build a chatbot to support task tracking.

You create a Language Understanding service named lu1.

You need to build a Language Understanding model to integrate into the chatbot. The solution must minimize development time to build the model.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order. (Choose four.)

**Answer:**

Explanation:

Explanation:

1. Add a new application
2. Add a prebuilt domain intent ToDo (it has already utterances so we can skip this step)
3. Train
4. Publish

### NEW QUESTION # 181

You have an Azure subscription that contains an Azure OpenAI resource.

You deploy the GPT-4 model to the resource.

You need to ensure that you can upload files that will be used as grounding data for the model.

Which two types of resources should you create? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Azure Blob Storage
- B. Azure AI Search
- C. Azure AI Bot Service
- D. Azure AI Document Intelligence
- E. Azure SQL

**Answer: A,B**

Explanation:

Azure OpenAI On Your Data enables you to run advanced AI models such as GPT-35-Turbo and GPT-4 on your own enterprise data without needing to train or fine-tune models.

For some data sources such as uploading files from your local machine (preview) or data contained in a blob storage account (preview), Azure AI Search is used.
