Latest Braindumps 156-561 Ppt & Latest 156-561 Test Pdf

The 156-561 desktop-based practice exam is compatible with Windows-based computers and only requires an internet connection for the first-time license validation. The web-based 156-561 practice test is accessible on any browser without needing to install any separate software. Finally, the 156-561 Dumps PDF is easily portable and can be used on smart devices or printed out. We constantly update the 156-561 pdf file to ensure customers receive the latest version of CheckPoint 156-561 questions, based on the actual Check Point Certified Cloud Specialist - R81.20 (CCCS) (156-561) exam content.

CheckPoint Check Point Certified Cloud Specialist - R81.20 (CCCS) Sample Questions (Q100-Q105):

NEW QUESTION # 100

Which CloudGuard security platform enables organizations to view and access their security posture, find cloud misconfigurations, and enforce best practices?

- A. CloudGuard SaaS
- **B. CloudGuard Security Posture Management**
- C. CloudGuard IaaS Private Cloud Solution
- D. CloudGuard IaaS Public Cloud Solution

Answer: B

NEW QUESTION # 101

Auto Scaling is supported by Check Point on which two cloud platforms?

- A. Google Cloud & Azure
- **B. Azure & AWS**
- C. vCloudAir & Azure
- D. AWS & Google Cloud & NSX

Answer: B

NEW QUESTION # 102

Cloud Security Posture Management uses CloudBots to assist with _____.

- A. cloud account configurations and data flows
- B. identifying where the organization's security posture need:
- **C. automatic compliance remediation**
- D. securing IAM account credentials.

Answer: C

Explanation:

CloudBot Remediation

Compliance remediation efforts incorporate CloudBot resources to address compliance issues. CloudBots operate in the cloud account as automated software applications perform remediations such as quarantining or terminating cloud instances. CloudBots remediate a single cloud account at a time or they may remediate multiple cloud accounts simultaneously.

CloudBots may use a custom remediation configuration, which is performed manually, or they may enforce predefined, automatic remediations which include, but are not limited to the following:

- Encrypt databases
- Rotate encryption keys
- Force password changes
- Quarantine instances

Check Point
SOFTWARE TECHNOLOGIES LTD.

NEW QUESTION # 103

Responsibility for securing Software Defined Data Centers resides with which of the following?

- A. Cloud Service Providers only
- B. Cloud Service Providers and Consumers
- C. Cloud Service Consumers only
- D. Individual Corporate Users

Answer: B

Explanation:

In a Software Defined Data Center (SDDC), the responsibility for security is shared between the Cloud Service Provider (CSP) and the Cloud Service Consumer. The CSP is responsible for securing the underlying physical infrastructure and providing secure tools for management, while the consumer is responsible for securing their own data, applications, and configurations within the SDDC. This shared responsibility model ensures both parties play a role in maintaining the security of the cloud environment.

NEW QUESTION # 104

Can you configure Micro segmentation (control traffic inside a subnet) on Azure?

- A. No. Micro segmentation is not supported on Azure
- B. Yes. via UDR
- C. Yes, via System Routes
- D. Yes, via routes on vNet

Answer: C

NEW QUESTION # 105

.....

Our company is professional brand. There are a lot of experts and professors in the field in our company. All the experts in our company are devoting all of their time to design the best 156-561 test question for all people. In order to ensure quality of the products, a lot of experts keep themselves working day and night. We can make sure that you cannot find the more suitable 156-
