問題 #155

Sales Management has decided that the Account Managers should be measured on a CSAT target. Which option describes the steps the Admin should take to meet this requirement?

- A. Add a picklist value 'CSAT' to the Measure field and add Measure Type = CSAT, on the Target object
- B. Add a picklist value on the Measure field with Label = CSAT and add Measure Type = Other, on the Account Manager

Target object

- C. Add a picklist value on the Measure Type field with Label = CSAT and add Target Type = Other, on the Account Manager object
- D. Add a picklist value 'CSAT' to the Type Field and add Target Type = Other, on the Account Target object

答案： B

解題說明：

: The Account Manager Target object represents a target created by an account manager for a fiscal year, measure, and target value1. To measure the account managers on a CSAT target, the admin should add a picklist value on the Measure field with Label = CSAT and add Measure Type = Other, on the Account Manager Target object. This way, the account managers can create and assign targets for the CSAT measure to their direct reports2. The other options are incorrect because they either use the wrong object, field, or value for the CSAT target. - A. Less than 100, Less than 200, Less than 300, Less than 400
- **B. 0 to 100, 101 to 200, 201 to 300, 301 to 400**
- C. 0 to 100, 100 to 200, 200 to 300, 300 to 400
- D. Greater than 100, Less than 200, Less than 300, Less than 400

答案： B

問題 #158

What is a key first step for Manufacturing Cloud implementation?

- A. Configure forecast regeneration settings.
- B. Enable Manufacturing Cloud permissions for users.
- **C. Enable Manufacturing Cloud features in Setup.**

答案： C

解題說明：

The first step for Manufacturing Cloud implementation is to enable Manufacturing Cloud features in Setup.

This step allows you to access the Manufacturing Cloud objects, fields, tabs, and components in your org. You can enable Manufacturing Cloud features for Sales, Service, or both, depending on your business needs. To enable Manufacturing Cloud features, you need to have the Customize Application permission and the Manufacturing Cloud license assigned to you1. References: Enable Manufacturing Cloud Features

問題 #159

When is an appropriate time to generate the detailed technical design document when implementing Manufacturing Cloud?

- A. The detailed technical design document should be ready before engaging the business users to gather requirements.
- **B. The detailed technical design document is completed after the business requirement document has been generated.**
- C. The detailed technical design document should be completed after an organization goes live with Manufacturing Cloud.

答案： B

解題說明：

The detailed technical design document is a document that describes the technical specifications and architecture of a solution. It is based on the functional and nonfunctional requirements that are captured in the business requirement document¹. Therefore, the detailed technical design document should be completed after the business requirement document has been generated, and before the development and testing phases of the project. This ensures that the technical design aligns with the business needs and expectations, and provides a clear roadmap for the implementation team².
