パススルーPL-600関連復習問題集 & 資格試験におけるリーダーオファー & 100% パスレートPL-600関連試験

最近のわずかの数年間で、MicrosoftのPL-600認定試験は日常生活でますます大きな影響をもたらすようになりました。将来の重要な問題は、どうやって一回で効果的にMicrosoftのPL-600認定試験に合格することになります。この質問を解決したいのなら、MogiExamのMicrosoftのPL-600試験トレーニング資料を利用すればいいです。この資料を手に入れたら、一回で試験に合格することができるようになりますから、あなたはまだ何を持っているのですか。速くMogiExamのMicrosoftのPL-600試験トレーニング資料を買いに行きましょう。

Microsoft Power Platform Solution Architect認定を取得することで、キャリアアップすることができ、Microsoft Power Platformテクノロジーを使用したソリューションの設計と実装における専門知識を示すことができます。また、これらのツールを使用して効果的なソリューションを設計および実装するためのスキルと知識を持つ個人を特定することができます。

Microsoft Power Platform Solution Architect 認定 PL-600 試験問題 (Q247-Q252):

質問 # 247

You are designing a model-driven app for a hospital. The app will be used to track teams at the hospital including:

Team	Comments
Cleaning	There are three predetermined cleaning teams. Tasks are assigned to a team. Anyone on the team can complete an assigned task.
Emergency room	These teams are formed as needed based on patient needs and staff availability.
Billing	These teams are assigned to specific hospital departments. Team members must only see data for the hospital department to which they are assigned.

You need to recommend the team types to use.

Which team types should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement

Team type

Cleaning teams

	▼
Access	
Owner	

Emergency room teams

	▼
Access	
Owner	

Billing teams

	▼
Access	
Owner	

正解:

解説:

Requirement	Team type						
Cleaning teams	<table border="1"> <tr> <td></td> <td>▼</td> </tr> <tr> <td>Access</td> <td></td> </tr> <tr> <td>Owner</td> <td></td> </tr> </table>		▼	Access		Owner	
	▼						
Access							
Owner							
Emergency room teams	<table border="1"> <tr> <td></td> <td>▼</td> </tr> <tr> <td>Access</td> <td></td> </tr> <tr> <td>Owner</td> <td></td> </tr> </table>		▼	Access		Owner	
	▼						
Access							
Owner							
Billing teams	<table border="1"> <tr> <td></td> <td>▼</td> </tr> <tr> <td>Access</td> <td></td> </tr> <tr> <td>Owner</td> <td></td> </tr> </table>		▼	Access		Owner	
	▼						
Access							
Owner							

Explanation

Box 1: Owner team

Owner team: An owner team owns records and has security roles assigned to the team. A user's privileges can come from their

individual security roles, those of the teams that they're part of or the ones they inherit. A team has full access rights on the records that the team owns. Team members are added manually to the owner team.

Box 2: Access team

Access team: An access team doesn't own records and doesn't have security roles assigned to the team. The team members have privileges defined by their individual security roles and by roles from the teams they're members of. These members share records with an access team, and the team is granted access rights to the records. Access rights include Read, Write, and Append.

Box 3: Owner team

質問 # 248

A company has two departments: Sales and Operations. The Sales department divides its salespeople into East, West, and Central teams. The Operations department has two groups:

Accounting and Engineering. The company asks you to help with the security model for their departments. The company has the following requirements:

- The Accounting manager needs to have access to the data of all departments.
- The Sales manager must have access to all sales data and read-only access to Engineering data.

What security model for the Dataverse records access will you propose to implement?

- A. Teams
- **B. Business units**
- C. Hierarchical
- D. Organization
- E. Azure AD groups

正解: B

解説:

The Business unit security model is the basis for Dataverse security. The model controls access to the data using security roles, teams, and users. By linking all of them together, you are getting a role-based security model. By default, the Organization is a top-level of a business unit hierarchy. Each business unit has a default team. You cannot change or delete the default team.

You must assign every user to only one business unit.

The business unit security model uses security roles to assign them to the users or teams. A team also can consist of users from different business units.

<https://docs.microsoft.com/en-us/learn/modules/model-security/4-dataverse>

<https://docs.microsoft.com/en-us/power-platform/admin/create-edit-business-units>

質問 # 249

A company reports the following issues with an existing data management system.

Users cannot search for specific records by using a user-friendly ID or record identifier.

Users occasionally enter data into fields that is not required.

The record form displays all fields. Many of the fields are not used.

You need to ensure that the Power Platform solution will ensure data quality can be properly maintained.

Which component should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

 Requirement	Solution
Ensure that users can search for specific records by using a unique identifier.	<input type="text" value=""/> <ul style="list-style-type: none"> Business rule Autonumber column Business process flow Duplicate detection rule
You must prevent data entry into columns that do not require entry.	<input type="text" value=""/> <ul style="list-style-type: none"> Business rule Real time workflow Business process flow Duplicate detection rule

正解:

解説:

 Requirement	Solution
Ensure that users can search for specific records by using a unique identifier.	<input type="text" value=""/> <ul style="list-style-type: none"> Business rule Autonumber column Business process flow Duplicate detection rule
You must prevent data entry into columns that do not require entry.	<input type="text" value=""/> <ul style="list-style-type: none"> Business rule Real time workflow Business process flow Duplicate detection rule

Explanation

Graphical user interface, text, application, chat or text message Description automatically generated

Requirement

Solution

Ensure that users can search for specific records by using a unique identifier.

A screenshot of a dropdown menu with a downward arrow in the top right corner. The menu is open, showing four options: 'Business rule', 'Autonumber column', 'Business process flow', and 'Duplicate detection rule'. The 'Autonumber column' option is highlighted with a grey background.

You must prevent data entry into columns that do not require entry.

A screenshot of a dropdown menu with a downward arrow in the top right corner. The menu is open, showing four options: 'Business rule', 'Real time workflow', 'Business process flow', and 'Duplicate detection rule'. The 'Business rule' option is highlighted with a grey background.

Box 1: Autonumber column

Autonumber columns are columns that automatically generate alphanumeric strings whenever they are created.

Box 2: Business rule

By combining conditions and actions, you can do any of the following with business rules:

Enable or disable columns

Set column values

Clear column values

Set column requirement levels

Show or hide columns

Validate data and show error messages

Create business recommendations based on business intelligence.

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/data-platform-create-business-rule>

質問 # 250

You are designing the security model for a Power Platform solution.

The security model must meet the following requirements:

Restrict sharing of data between Power Automate connectors.

Ensure that environment administrators only see users who require access in the enabled user list.

You need to recommend security features for the solution.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement  Feature

Restrict sharing of data between Power Automate connectors

▼
Security group
Data loss prevention policy

Ensure that environment administrators only see users who require access in the enabled user list.

▼
Security group
Data loss prevention policy

正解:

解説:

Requirement  Feature

Restrict sharing of data between Power Automate connectors

▼
Security group
Data loss prevention policy

Ensure that environment administrators only see users who require access in the enabled user list.

▼
Security group
Data loss prevention policy

質問 # 251

You are overseeing the data migration for a Microsoft Power Platform solution.

The migration team is performing a test migration with a subset of data. The migration team reports the following findings:

- * Users who own account rows are receiving system generated emails.
- * Data that is not part of the migration is being added to the Contact and Appointment tables.
- * The size of the log listed on the Power Platform admin center Capacity page has increased significantly.

You need to recommend strategies to resolve the reported issues.

What should you recommend? To answer, drag the appropriate resolution to the correct migration problem.

Each resolution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Resolution strategies	Migration issue	Resolution strategy
Disable auditing.	Users who own account rows are receiving system generated emails.	
Disable duplicate detection.	Data that is not part of the migration is being added to the Contact and Appointment tables.	
Disable all custom JavaScript functions.	The size of the log listed on the Power Platform admin center Capacity page has increased significantly.	
Disable all workflows, plug-ins, and Power Platform admin center		

正解:

解説:

Explanation:

Users who own account rows are receiving system generated emails.

Disable duplicate detection.

Data that is not part of the migration is being added to the Contact and Appointment tables.

Disable all workflows, plug-ins, and Power Platform admin center

The size of the log listed on the Power Platform admin center Capacity page has increased significantly.

Disable auditing.

Box 1: Disable duplicate detection

Duplicate detection has rules for sending emails.

Box 2: Disable all workflows, plug-ins, and Power Platform admin center Box 3: Disable auditing Auditing affects the size of the log file.
