Efficient use of all the time, believe me, you will realize your dreams.

Salesforce Health Cloud Accredited Professional Sample Questions (Q12-Q17):

NEW QUESTION # 12

How should a consultant recommend modeling a physician's locations of service, when the physician practices at clinics?

- A. Healthcare Practitioner Facility
- B. Healthcare Provider Relationship
- C. Account Contact Relationship
- D. Healthcare Taxonomy

Answer: A

Explanation:

The Healthcare Practitioner Facility object is used to model a physician's locations of service, such as clinics or hospitals. It stores information about the facility name, address, phone number, and type.

NEW QUESTION # 13

Which two steps can an administrator take to configure the Care Program enrollment flow? (Choose two.)

- A. Use the provided enrollment flow out of the box.
- B. Customize the care coordinator flow for patient
- C. Customize the provider site flow.
- D. Customize the out of the box enrollment flow template to match requirements.
- E. Use the patient approval flow

Answer: D,E

NEW QUESTION # 14

Where can a Salesforce administrator configuring different levels of access to patients' care plans, configure team members different levels of access to cases to ensure sensitive data is not shared with the wrong groups?

- A. Contact Roles on case
- B. Permission Set Groups
- C. Case Team Roles
- D. Profiles
- E. Permission Sets

Answer: C

Explanation:

Explanation

Reference and details below.

□

NEW QUESTION # 15

Bloomington Caregivers is implementing Health Cloud for managing the healthcare data of children under the age of 13. Which three considerations should the company take into account to ensure compliance with the Children's Online Privacy Protection Act (COPPA)?
Choose 3 answers

- A. Ensuring information collected about children is protected with at rest and in-transit encryption
- **B. Implementing appropriate security measures to safeguard children's personal information**
- **C. Disclosing the organization's privacy policy to parents and obtaining their consent**
- **D. Obtaining verified parental consent before collecting and storing any personal information of children**
- E. Ensuring that Bloomington Caregivers' system implementation partner has met all COPPA regulations during the build phase

Answer: B,C,D

Explanation:

Step-by-Step Explanation:

* COPPA Requirements in Healthcare Applications:

* Disclose privacy policy and obtain parental consent:

"Organizations must provide clear privacy notices to parents and obtain their consent before collecting any personal information from children under 13."

-Reference: Salesforce Security Guide, COPPA Compliance

* Obtain verified parental consent before collection/storage:

"Verified parental consent is a core requirement for COPPA, prior to collection and storage of children's personal data."

* Implement security measures:

"Appropriate security controls and safeguards must be in place to protect children's data as mandated by COPPA."

* Encryption:

* While encryption is a best practice (option D), COPPA explicitly requires appropriate security but does not mandate encryption at rest and in transit as a specific requirement, though it is recommended.

* Partner Compliance:

* Option E refers to the implementation partner, but regulatory responsibility remains with the covered entity (Bloomington Caregivers), not the partner.

Health Cloud Security and Compliance

NEW QUESTION # 16

A pharma company is implementing Health Cloud and trying to track insurance details related to its patients.

The company wants to track:

- * A list of all payer organizations
- * The plans offered by a given payer
- * The standard benefits available under a plan
- * Which plan a given patient is enrolled in and their specific insurance details Which set of objects should a consultant implement to meet these requirements?

- A. Account, Purchaser Plan, Member Benefit, Insurance Plan
- **B. Payer, Plan Offering, Coverage Benefit, Member Plan**
- C. Purchaser, Insurance Plan, Insurance Benefit, Plan Detail
- D. Account, Purchaser Plan, Plan Benefit, Member Plan

Answer: B

Explanation:

Salesforce Health Cloud provides a robust data model for tracking insurance details and plans, aligning with healthcare industry standards. The specified objects-Payer, Plan Offering, Coverage Benefit, and Member Plan-allow the company to model insurance-related data effectively.

Key Objects:

* Payer: Represents the payer organizations (insurance providers) offering health plans.

* Plan Offering: Defines the various insurance plans offered by a payer organization.

* Coverage Benefit: Details the benefits available under a specific plan, such as covered services and limitations.

* Member Plan: Tracks individual patient enrollment details in a specific insurance plan, including policy numbers, start/end dates, and other specific data.

This combination of objects ensures all requirements are met:

* Tracking payer organizations via the Payer object.

* Managing plans offered by each payer through Plan Offering.

* Defining standard benefits under a plan via Coverage Benefit.

* Linking a patient to their specific plan and details through Member Plan.

Why Other Options Are Incorrect:

* Option A, B, D: These combinations include objects like Purchaser or Plan Benefit, which are not standard objects for insurance tracking in Health Cloud. The provided data model specifically supports the objects in Option C.
