Huawei HCIA-Security V4.0 Sample Questions (Q63-Q68):

NEW QUESTION # 63

Which of the following descriptions of the VGMP protocol is incorrect?

- A. VGMP ensures that the status of all VRRP backup groups in the management group is consistent by uniformly controlling the status switching of each VRRP backup group.
- B. By default, when the standby end does not receive a hello message from the peer end within three hello message cycles, it will consider that the peer end is faulty and switch itself to the Active state.
- C. VGMP adds multiple VRRP backup groups on the same firewall to a management group, and the management group manages all VRRP backup groups uniformly.
- **D. The VGMP group device in the Active status will regularly send hello messages to the peer. The standby end is only responsible for monitoring hello messages and will not respond.**

Answer: D

NEW QUESTION # 64

Which of the following operations can be performed on data in a security posture? (Multiple Choice)

- A. Data classification
- **B. Data association completion**
- C. Data cleaning
- **D. Add labels to data**

Answer: B,D

NEW QUESTION # 65

Which of the following descriptions of the packet processing process of a stateful inspection firewall is incorrect?

- A. When the packet reaches the firewall, it searches the session table. If the match is successful, the firewall will proceed with the subsequent packet processing process.
- B. When the status detection mechanism is enabled, only SYN messages in TCP messages can establish a session.
- C. When the packet reaches the firewall, it searches the session table. If the match is not successful, the firewall will perform the first packet processing process.
- **D. When the stateful inspection mechanism is enabled, the first packet and subsequent packets need to be checked for security policies.**

Answer: D

NEW QUESTION # 66

In the security assessment method, the purpose of security scanning is to use scanning analysis and assessment tools to scan the target system in order to discover relevant vulnerabilities and prepare for attacks.
