

# 800-150시험덤프문제, 800-150높은통과율시험대비덤프 공부

EMC DEP-3CR1 PowerProtect Cyber Recovery Exam 3

질문 # 26  
An enterprise customer needs a Cyber Recovery solution to be implemented. As an outcome from a previous workshop, the following backup environment needs to be protected to the CR Vault.  
Location 1: 4 PowerProtect DDs  
Location 2: 4 PowerProtect DDs  
Location 3: 2 PowerProtect DDs  
Location 4: 2 PowerProtect DDs  
The customer wants to implement a CR Vault in a 5th location.  
How many Cyber Recovery systems must be installed at a minimum level?

- A. 0
- B. 1
- C. 2
- D. 3

정답 B

질문 # 27  
What vault status is displayed if none of the PowerProtect DD systems in the CR Vault are able to communicate with the Cyber Recovery software?

- A. Unknown
- B. Unlocked
- C. Locked
- D. Degraded

정답 B

질문 # 28

덤프는 구체적인 업데이트 주기가 존재하지 않습니다. 하지만 저희는 수시로 Cisco 800-150 시험문제 변경을 체크하여 Cisco 800-150덤프를 가장 최신버전으로 업데이트하도록 최선을 다하고 있습니다. Cisco 800-150덤프를 구매하면 1년간 업데이트될 때마다 최신버전을 구매시 사용한 메일로 전송해드립니다.

## Cisco 800-150 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> <li>Cisco Software: This section of the exam measures the skills of a Network Engineer and discusses Cisco's software systems and licensing. It explains the difference between IOS install and bundle modes and gives an overview of different licensing models. Students learn how to manage Cisco software images, including backing up, transferring, and installing images via FTP, TFTP, or USB. It also covers how to handle configuration files to keep devices running properly and ensure smooth upgrades or replacements.</li> </ul>

주제 2	<ul style="list-style-type: none"> <li>• Common Service Tasks and Tools: This section of the exam measures the skills of a Technical Support Engineer and focuses on tasks commonly needed to manage Cisco devices. It explains how devices boot up, introduces common Cisco IOS commands, and identifies tools for file management. It shows how to confirm physical connections, remotely access devices, and connect to the console port. It also covers how to capture the status of a device, recover passwords, and replace devices by using proper tools. Students are also taught how to find serial numbers on Cisco equipment to assist with support and maintenance activities.</li> </ul>
주제 3	<ul style="list-style-type: none"> <li>• Cisco Infrastructure and Collaboration Infrastructure: This section of the exam measures the skills of a Collaboration Engineer and focuses on Cisco infrastructure devices, endpoints, and collaboration technologies. It introduces network devices, collaboration endpoints like IP phones and video systems, and explains on-premises collaboration deployments using tools like Cisco Unified Communications Manager. It also covers how video systems integrate into collaboration environments and highlights Cisco's cloud services for enterprise communication, including Webex Meetings, Webex Teams, and hosted collaboration solutions.</li> </ul>
주제 4	<ul style="list-style-type: none"> <li>• Networking Foundations: This section of the exam measures the skills of a Network Engineer and covers the basic building blocks of computer networking. It explains different types of networks like local area networks and wireless networks, and introduces lightweight wireless LANs. It describes the layers of communication models like the OSI model and TCP</li> <li>• IP stack, and explains how data moves across networks. It also discusses the physical cabling used in networks, such as Ethernet and fiber optics. Students will learn about network switching, IP addressing, subnetting, and routing at Layer 3. The section also introduces Cisco's campus network devices, data center switches, UCS servers, and collaboration devices, describing their roles and functions in the network.</li> </ul>

## 시험준비에 가장 좋은 800-150시험덤프문제 인증덤프

KoreaDumps의Cisco인증800-150자료는 제일 적응률 높고 전면적인 덤프임으로 여러분은 100%한번에 응시로 패스하실 수 있습니다. 그리고 우리는 덤프를 구매 시 일년무료 업데이트를 제공합니다. 여러분은 먼저 우리 KoreaDumps사이트에서 제공되는Cisco인증800-150시험덤프의 일부분인 데모 즉 문제와 답을 다운받으셔서 체험해보실 수 있습니다.

## 최신 Cisco Certified Field Technician (CCT) 800-150 무료샘플문제 (Q68-Q73):

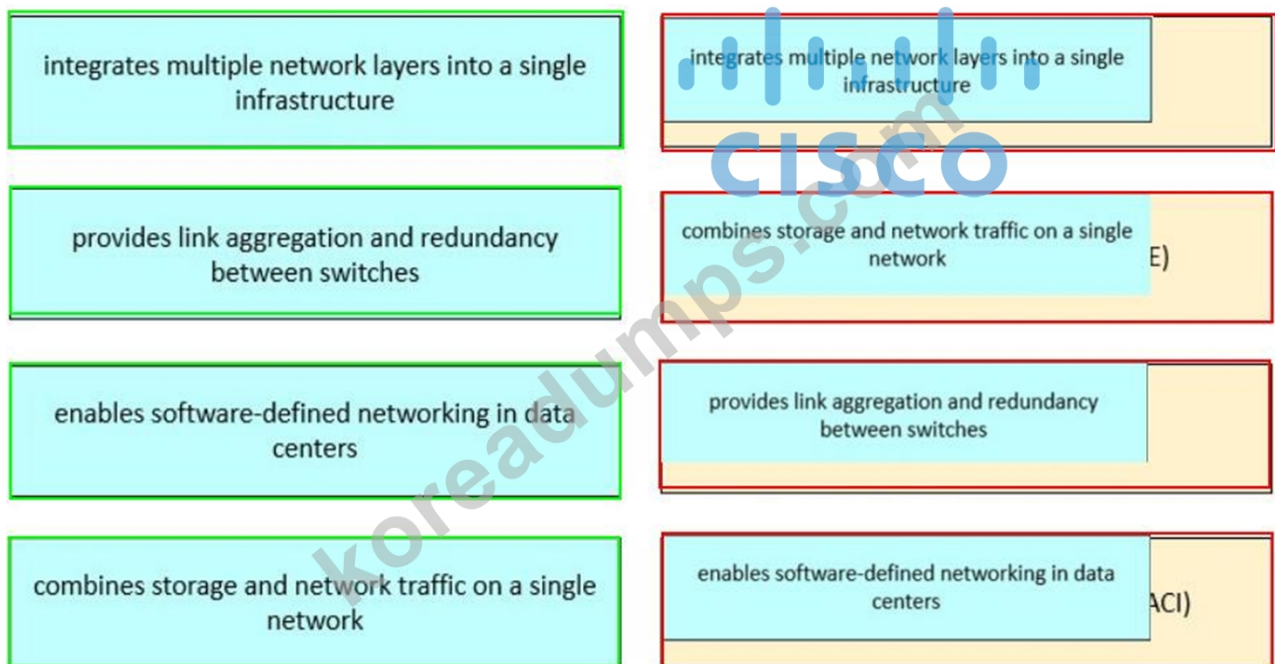

### 질문 # 68

Drag and drop the functions from the left onto the corresponding Cisco data center technologies on the right.

정답:

설명:

#### 질문 # 69

Which component serves as the central management and communication core and provides a single point of management via Cisco UCS Manager in a Cisco UCS environment?

- A. Nexus 9000 Series Switch
- B. UCS E-Series server in ISR platforms
- C. MDS 9000 Series SAN Switch
- D. UCS Fabric Interconnect

정답: D

설명:

The UCS Fabric Interconnect is the central management and communication hub of the Cisco UCS (Unified Computing System) environment. It integrates compute, network, and storage access into a unified system.

Fabric Interconnects:

- \* Manage all servers and I/O modules connected to the UCS domain
- \* Provide connectivity and are the point of integration with the Cisco UCS Manager
- \* Offer high-availability and centralized policy management

Other options like the Nexus or MDS switches do not serve this unified management function in a UCS deployment.

Reference: Supporting Cisco Devices for Field Technicians (FLDTEC) - Cisco Equipment and Related Hardware Explanation:

The UCS Fabric interconnect serves as the central management and communication core in a Cisco UCS environment, providing a single point of management via Cisco UCS Manager for the entire UCS system, including servers, networking, and storage components.

### 질문 # 70

Which Cisco UCS management platform is specifically designed for managing standalone Cisco UCS C-Series rack servers and E-Series servers?

- A. Cisco Integrated Management Controller
- B. Cisco Intersight
- C. Cisco UCS Central
- D. Cisco UCS Manager

정답: A

설명:

The Cisco Integrated Management Controller (CIMC) is the embedded management solution designed specifically for standalone Cisco UCS C-Series rack servers and E-Series servers. It allows administrators to perform out-of-band management functions such as BIOS configuration, firmware updates, remote console access, and power control.

Cisco UCS Manager is used for managing UCS blade chassis environments.

Cisco UCS Central is intended for centralized management across multiple UCS domains.

Cisco Intersight is a cloud-based management platform that can extend CIMC functionality but is not the embedded, standalone option.

### 질문 # 71

Refer to the exhibit. Which CLI show command identifies the serial number on a router?

- A. show inventory
- B. show idprom
- C. show platform
- D. show version

정답: A

설명:

The show inventory command is used on Cisco devices to display detailed information about the hardware components installed, including:

- \* Product Identifier (PID)
- \* Version Identifier (VID)
- \* Serial Number (SN)
- \* Description of the component

In the exhibit, the output clearly shows:

NAME: "Chassis", DESCR: "Cisco ISR4451-X/K9"

PID: ISR4451-X/K9, VID: V01, SN: FCW2134L0SH

This confirms that show inventory is the correct command to retrieve the serial number and hardware inventory details.

\* show version provides some system information and sometimes includes serial numbers, but it's not as reliable or detailed for component-level hardware info.

\* show idprom is not commonly used and not supported on all platforms.

\* show platform provides platform-specific info but not typically the serial number.

Reference: Supporting Cisco Devices for Field Technicians (FLDTEC) - Device Configuration and Verification

질문 # 72

Refer to the exhibit. Drag and drop the names of the field-replaceable units from the left onto the corresponding letters on the image of the Cisco NCS 5500 Series modular router.

power supplies	A
transceivers	B
route processor cards	C
line cards	D

정답:

설명:

Explanation:

A # Line cards

Provide the physical interfaces for network connectivity.

B # Route processor cards

Manage routing functions and system control.

C # Transceivers

Installed in the ports of line cards for optical/electrical signal transmission.

D # Power supplies

Provide power to the modular system and are hot-swappable.

Cisco's NCS 5500 Series is designed for service provider and data center deployments. The FLDTEC course outlines the layout of FRUs in modular platforms like this one:

A - Line Cards: Located in the upper slots, these modules handle the bulk of switching and forwarding functions.

B - Route Processor Cards (RP Cards): Positioned centrally, these provide management and control plane services for the router.

C - Transceivers: Installed into the line cards, transceivers provide physical connectivity through optical or copper interfaces.

D - Power Supplies: Located in the bottom rear section, these modules provide redundant and hot-swappable power to the chassis.

Recognizing each FRU visually and functionally is critical when performing RMA procedures, component diagnostics, or hardware upgrades in the field.

### 질문 # 73

.....

Cisco 인증 800-150 시험을 위하여 최고의 선택이 필요합니다. KoreaDumps 선택으로 좋은 성적도 얻고 하면서 저희 선택을 후회하지 않을 것입니다. 돈은 적게 들고 효과는 아주 좋습니다. 우리 KoreaDumps 여러분의 응시분비에 많은 도움이 될뿐만 아니라 Cisco 인증 800-150 시험은 또 일년 무료 업데이트 서비스를 제공합니다. 작은 돈을 투자하고 이렇게 좋은 성과는 아주 바람직하다고 봅니다.
