What type of questions are on the Palo Alto NetSec-Pro exams?

- Single answer multiple choice
- Multiple answer multiple choice
- Drag and Drop (DND)
- Router Simulation
- Textual

**NetSec-Pro Practice Exam Questions.**

Grab an understanding from these Palo Alto NetSec-Pro sample questions and answers and improve your NetSec-Pro exam preparation towards attaining a Palo Alto Network Security Professional Certification. Answering these sample questions will make you familiar with the types of questions you can expect on the actual exam. Doing practice with NetSec-Pro questions and answers before the exam as much as possible is the key to passing the Palo Alto NetSec-Pro certification exam.

NetSec-Pro Sample Questions 5

BONUS!!! Download part of Getcertkey NetSec-Pro dumps for free: <https://drive.google.com/open?id=1ySxflZWBS9e1jFszYHbIkDO5JwVuRELT>

The Palo Alto Networks NetSec-Pro desktop exam simulation software works only on Windows but the web-based NetSec-Pro practice test is compatible with all operating systems and browsers. This is also an effective format for NetSec-Pro Test Preparation. The NetSec-Pro PDF dumps is an easily downloadable and printable file that carries the most probable Palo Alto Networks NetSec-Pro actual questions.

## Palo Alto Networks NetSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Infrastructure Management and CDSS: This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.</li> </ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Connectivity and Security:</b> This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Platform Solutions, Services, and Tools:</b> This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.</li> </ul>

## Pdf NetSec-Pro Braindumps | NetSec-Pro Reliable Study Plan

We are concerted company offering tailored services which include not only the newest and various versions of NetSec-Pro practice guide, but offer one-year free updates of our NetSec-Pro exam questions services with patient staff offering help 24/7. So there is considerate and concerted cooperation for your purchasing experience accompanied with patient staff with amity. Their enrichment is dependable and reliable on the NetSec-Pro training braindumps.

### Palo Alto Networks Network Security Professional Sample Questions (Q62-Q67):

#### NEW QUESTION # 62

After a firewall is associated with Strata Cloud Manager (SCM), which two additional actions are required to enable management of the firewall from SCM? (Choose two.)

- A. Deploy a service connection for each branch site and connect with SCM.
- B. Configure a Security policy allowing "stratacloudmanager.paloaltonetworks.com" for all users.
- C. **Configure NTP and DNS servers for the firewall.**
- D. **Install a device certificate.**

**Answer: C,D**

Explanation:

To fully manage a firewall from Strata Cloud Manager (SCM), it's essential to establish trust and ensure reliable connectivity: Configure NTP and DNS servers

The firewall must have accurate time (NTP) and name resolution (DNS) to securely communicate with SCM and related cloud services.

"To ensure successful management, configure the firewall's NTP and DNS settings to synchronize time and resolve domain names such as stratacloudmanager.paloaltonetworks.com." (Source: SCM Onboarding Requirements) Install a device certificate A device certificate authenticates the firewall's identity when connecting to SCM.

"The device certificate authenticates the firewall to Palo Alto Networks cloud services, including SCM. It's a fundamental requirement to establish secure connectivity." (Source: Device Certificates) These steps ensure trust, secure communication, and successful onboarding into SCM.

#### NEW QUESTION # 63

Which two components of a Security policy, when configured, allow third-party contractors access to internal applications outside business hours? (Choose two.)

- A. App-ID
- B. Service

- C. User-ID
- D. Schedule

**Answer: C,D**

Explanation:

To allow third-party contractors controlled access, security policies must combine user identification and time-based access controls: User-ID

"User-ID enables security policies to be based on user identity rather than IP addresses, ensuring precise policy enforcement for specific users such as contractors." (Source: User-ID Overview) Schedule

"Schedules allow policies to be active only during specific times, providing time-based access control (e.g., after business hours)." (Source: Security Policy Schedules) Together, they ensure that only authorized users (contractors) have access, and only when explicitly allowed.

#### NEW QUESTION # 64

Which offering can be managed in both Panorama and Strata Cloud Manager (SCM)?

- A. VM-Series Next-Generation Firewall (NGFW)
- B. SaaS Security
- C. Prisma SD-WAN
- D. Autonomous Digital Experience Manager (ADEM)

**Answer: A**

Explanation:

The VM-Series NGFWs are designed to integrate seamlessly with both Panorama and Strata Cloud Manager (SCM), allowing administrators to manage physical and virtual firewall deployments from either interface.

"You can manage VM-Series Next-Generation Firewalls using either Panorama for centralized management of all firewalls or Strata Cloud Manager for cloud-based management, giving flexibility across hybrid environments." (Source: VM-Series Management Options) Unified management flexibility is key for enterprises with hybrid or multi-cloud deployments.

#### NEW QUESTION # 65

What is a necessary step for creation of a custom Prisma Access report on Strata Cloud Manager (SCM)?

- A. Open a support ticket.
- B. Set up Cloud Identity Engine.
- C. Configure a dashboard.
- D. Generate a PDF summary report.

**Answer: C**

Explanation:

To create custom Prisma Access reports within SCM, you first configure a dashboard that aggregates the relevant logs and analytics. This allows you to define the data points you want to include.

"Dashboards in SCM can be customized to include Prisma Access data sources, enabling you to create and generate reports that meet specific business and security requirements." (Source: SCM Dashboards and Reporting) Once configured, you can export the dashboard as a custom report.

"Use the dashboard's data visualization to create custom reports for Prisma Access, which can be exported as PDFs for distribution." (Source: SCM Report Customization)

#### NEW QUESTION # 66

Which step is necessary to ensure an organization is using the inline cloud analysis features in its Advanced Threat Prevention subscription?

- A. Disable anti-spyware to avoid performance impacts and rely solely on external threat intelligence.
- B. Configure Advanced Threat Prevention profiles with default settings and only focus on high-risk traffic to avoid affecting network performance.
- C. Enable SSL decryption in Security policies to inspect and analyze encrypted traffic for threats.

- **D. Update or create a new anti-spyware security profile and enable the appropriate local deep learning models.**

**Answer: D**

Explanation:

To fully leverage inline cloud analysis in Advanced Threat Prevention, security profiles (e.g., anti-spyware) must be updated or newly created to enable local deep learning and inline cloud analysis models.

"To activate inline cloud analysis, update your Anti-Spyware profile to enable advanced inline detection engines, including deep learning-based models and cloud-delivered signatures." (Source: Inline Cloud Analysis and Deep Learning) This ensures real-time protection from sophisticated threats beyond static signatures.

## NEW QUESTION # 67

.....

Passing the NetSec-Pro exam is your best career opportunity. The rich experience with relevant certificates is important for enterprises to open up a series of professional vacancies for your choices. Our website's NetSec-Pro learning quiz bank and learning materials look up the latest questions and answers based on the topics you choose. This choice will serve as a breakthrough of your entire career, so prepared to be amazed by high quality and accuracy rate of our NetSec-Pro Study Guide.
