Our C-ABAPD-2507 Exams preparation software allows you to do self-assessment. If you have prepared for the C-ABAPD-2507 exam, you will be able to assess your preparation with our preparation software. The software provides you the real feel of an exam, and it will ensure 100% success rate as well. You can test your skills in real exam like environment. If you are not getting the desired results, you will get 100% money back guarantee on all of our exam products.

SAP C-ABAPD-2507 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> ABAP SQL and Code Pushdown: This section of the exam measures skills of SAP ABAP Developers and covers the use of advanced SQL techniques within ABAP. It includes code pushdown strategies that leverage database-level processing to enhance application performance. Key areas include Open SQL enhancements and integrating logic closer to the database.
Topic 2	<ul style="list-style-type: none"> Core ABAP Programming: This section of the exam measures skills of SAP Application Programmers and covers foundational ABAP programming knowledge. Topics include modularization techniques, internal tables, control structures, and classical report programming. Mastery of these concepts is essential for building efficient ABAP applications.
Topic 3	<ul style="list-style-type: none"> ABAP Core Data Services and Data Modeling: This section of the exam measures skills of SAP ABAP Developers and covers the creation, definition, and use of Core Data Services (CDS) views for data modeling within SAP environments. Candidates are expected to understand annotations, data definitions, and the role of CDS in enabling advanced data processing and integration across SAP systems.

SAP Certified Associate - Back-End Developer - ABAP Cloud Sample Questions (Q41-Q46):

NEW QUESTION # 41

Which of the following Core Data Services built-in functions returns a result of type INTT4? Note:

There are 2 correct answers to this question.

- A. dats_is_valid
- B. dats_add_months
- C. dats_days_between
- D. dats_add_days

Answer: A,C

NEW QUESTION # 42

What are some principles of encapsulation? Note: There are 2 correct answers to this question.

- A. Attributes can only be changed by the class.
- B. Attributes cannot be changed.
- C. Attributes can be changed by the client program directly.
- D. Attributes can be changed through public class methods.

Answer: A,D

NEW QUESTION # 43

Exhibit

Which of the following ABAP SQL snippets are syntactically correct ways to provide a value for the parameter on line #4? Note: There are 2 correct answers to this question

- A. ...SELECT * FROM demo_cds_param_view_entity (p_date = @ (cl_abap_context_info->get_system_date ())...)
- B. ...SELECT * FROM demo_cds_param_view_entity (p_date - '20230101')...)
- C. ...SELECT * FROM demo_cds_param_view_entity (p_date: 20238181')...)
- D. ...SELECT * FROM demo_cds_param_view_entity (p_date: \$session.system_date)...

Answer: A,B

NEW QUESTION # 44

Setting a field to read-only in which object would make the field read-only in all applications of the RESTful Application Programming model?

- A. Service definition
- B. Projection view
- C. Metadata extension
- D. Behaviour definition

Answer: D

Explanation:

The object that can be used to set a field to read-only in all applications of the RESTful Application Programming model (RAP) is the behaviour definition. The behaviour definition is a CDS artefact that defines the business logic and the UI behaviour of a business object. A business object is a CDS entity that represents a business entity or concept, such as a customer, an order, or a product. The behaviour definition can specify the properties of the fields of a business object, such as whether they are mandatory, read-only, or transient. These properties are valid for all applications that use the business object, such as transactional, analytical, or draft-enabled apps12. For example:

The following code snippet defines a behaviour definition for a business object ZI_PB_APPLICATION. It sets the field APPLICATION to read-only for all applications that use this business object:

define behavior for ZI_PB_APPLICATION { field (read only) APPLICATION; ... } You cannot do any of the following:

A . Service definition: A service definition is a CDS artefact that defines the interface and the binding of a service. A service is a CDS entity that exposes the data and the functionality of one or more business objects as OData, InA, or SQL services. A service definition can specify the properties of the fields of a service, such as whether they are filterable, sortable, or aggregatable. However, these properties are only valid for the specific service that uses the business object, not for all applications that use the business object12.

C . Projection view: A projection view is a CDS artefact that defines a view on one or more data sources, such as tables, views, or associations. A projection view can select, rename, or aggregate the fields of the data sources, but it cannot change the properties of the fields, such as whether they are read-only or not. The properties of the fields are inherited from the data sources or the behaviour definitions of the business objects12.

D . Metadata extension: A metadata extension is a CDS artefact that defines additional annotations for a CDS entity, such as a business object, a service, or a projection view. A metadata extension can specify the properties of the fields of a CDS entity for UI or analytical purposes, such as whether they are visible, editable, or hidden. However, these properties are only valid for the specific UI or analytical application that uses the metadata extension, not for all applications that use the CDS entity12.

NEW QUESTION # 45

Which statement creates a reference variable for class CL_VEHICLE?

- A. DATA lo_vehicle TYPE REF TO cl_vehicle.
- B. DATA lo_vehicle TYPE REF OF cl_vehicle.
- C. DATA lo_vehicle LIKE REF cl_vehicle.
- D. TYPES lo_vehicle TYPE cl_vehicle.

Answer: A

Explanation:

Comprehensive and Detailed Explanation from Exact Extract:

* In ABAP, object references must be declared with TYPE REF TO <class>.

* Option D is correct: DATA lo_vehicle TYPE REF TO cl_vehicle. creates a reference variable.

* Option A # Incorrect, TYPES defines a type, not a variable.

* Option B # Syntax error, correct keyword is REF TO, not REF OF.

* Option C # Invalid, LIKE REF is not supported in ABAP.

Study Guide Reference: ABAP Objects Programming Guide - Reference Variable Declarations.

NEW QUESTION # 46

.....

You may be also one of them, you may still struggling to find a high quality and high pass rate SAP Certified Associate - Back-End Developer - ABAP Cloud study question to prepare for your exam. Your search will end here, because our study materials must meet your requirements. The C-ABAPD-2507 torrent prep contains the real questions and simulation questions of various qualifying examinations. It is very worthy of study efficiently. Time is constant development, and proposition experts will set questions of Real C-ABAPD-2507 Exam continuously according to the progress of the society change tendency of proposition, and consciously highlight the hot issues and policy changes.
