

Top CPC Valid Test Practice Free PDF | High Pass-Rate New CPC Dumps Questions: Certified Professional Coder (CPC) Exam

DOWNLOAD the newest ValidTorrent CPC PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=127TY-auZkOFTfvYe6_77G9NQ7qLBj9nJ

The actual AAPC CPC exam questions are in PDF format for the one who wants to study offline. The actual AAPC CPC exam questions are in simple PDF form. The PDF format is suitable both for smartphones as well as tablets. You can print documents and study anywhere. The plus point is that the PDF version is updated regularly to improve its CPC Exam Questions and reflect changes in the syllabus of the exam.

AAPC CPC Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Endocrine System and Nervous System: This section of the exam measures the skills of medical coders and assesses the ability to assign codes for surgeries involving glands, the brain, spinal cord, and peripheral nerves. Procedures like resections and electrical stimulation are part of the evaluated content.
Topic 2	<ul style="list-style-type: none"> Introduction to CPT®, HCPCS Level II, and Modifiers: This section of the exam measures the skills of coding specialists and introduces candidates to CPT® coding for procedures, HCPCS Level II for supplies and services, and the correct use of modifiers. It helps learners distinguish between different code sets and understand their place in medical billing.

Topic 3	<ul style="list-style-type: none"> • Radiology: This section of the exam measures the skills of coding specialists and focuses on diagnostic imaging procedures including X-rays, CT scans, MRIs, ultrasounds, and nuclear medicine. It emphasizes proper selection of codes based on anatomical site and modality used.
Topic 4	<ul style="list-style-type: none"> • Female Reproductive System and Maternity Care & Delivery: This section of the exam measures the skills of coding specialists and evaluates coding accuracy for gynecological and obstetric procedures. It includes deliveries, antepartum care, cesarean sections, and surgical procedures involving female reproductive anatomy.
Topic 5	<ul style="list-style-type: none"> • Applying the ICD-10-CM Guidelines: This section of the exam measures the skills of coding specialists and covers how to apply official ICD-10-CM guidelines to real-world coding scenarios. It emphasizes the hierarchy of instructional notes, general and chapter-specific rules, and how to make judgment calls within compliant coding frameworks.
Topic 6	<ul style="list-style-type: none"> • Anesthesia: This section of the exam measures the skills of medical coders and involves coding anesthesia services based on surgical site, complexity, and time. It tests the understanding of anesthesia modifiers and the importance of linking anesthesia codes with the correct primary procedures.
Topic 7	<ul style="list-style-type: none"> • Review of Anatomy: This section of the exam measures the skills of coding specialists and covers a high-level understanding of human anatomy. It includes organs, systems, directional terminology, and anatomical locations, enabling coders to link procedures and diagnoses to the correct bodily structures with accuracy and consistency.
Topic 8	<ul style="list-style-type: none"> • Digestive System: This section of the exam measures the skills of coding specialists and evaluates the coding of surgeries and procedures involving the oral cavity, pharynx, esophagus, stomach, intestines, liver, pancreas, and related organs. Understanding endoscopic procedures is particularly critical here.
Topic 9	<ul style="list-style-type: none"> • The Business of Medicine: This section of the exam measures the skills of medical coders and covers foundational knowledge regarding the healthcare system, reimbursement models, insurance payers, HIPAA compliance, and the ethical responsibilities coders hold within clinical and billing environments. It establishes the context in which coding decisions directly affect healthcare operations and financial outcomes.
Topic 10	<ul style="list-style-type: none"> • Overview of ICD-10-CM: This section of the exam measures the skills of medical coders and introduces the structure, format, and usage of the ICD-10-CM coding system. It reviews the purpose of ICD-10-CM in diagnosis reporting and prepares candidates to interpret chapters, code ranges, and conventions embedded in the system.
Topic 11	<ul style="list-style-type: none"> • Urinary System and Male Genital System: This section of the exam measures the skills of medical coders and assesses understanding of procedures on kidneys, bladder, ureters, prostate, and male reproductive organs. Proper use of CPT codes for surgical and diagnostic interventions is tested.
Topic 12	<ul style="list-style-type: none"> • Hemic & Lymphatic Systems, Mediastinum, Diaphragm: This section of the exam measures the skills of medical coders and includes procedures related to the spleen, lymph nodes, bone marrow, as well as surgical interventions in the mediastinum and diaphragm. Coders must differentiate procedures by region and system accurately.
Topic 13	<ul style="list-style-type: none"> • Accurate ICD-10-CM Coding: This section of the exam measures the skills of medical coders and focuses on the precise assignment of diagnosis codes using the ICD-10-CM system. The goal is to ensure accurate representation of patient conditions, proper sequencing, and a clear linkage between diagnoses and services.
Topic 14	<ul style="list-style-type: none"> • Special Senses (Ocular and Auditory): This section of the exam measures the skills of coding specialists and covers the coding of procedures related to the eyes and ears. Topics include surgeries on the cornea, retina, and middle • inner ear, as well as related diagnostic procedures.

AAPC CPC Exam | CPC Valid Test Practice - 100% Latest Products for your choosing New CPC Dumps Questions

CPC real dumps revised and updated according to the syllabus changes and all the latest developments in theory and practice, our Certified Professional Coder (CPC) Exam real dumps are highly relevant to what you actually need to get through the certifications tests. Moreover they impart you information in the format of CPC Questions and answers that is actually the format of your real certification test. Hence not only you get the required knowledge but also find the opportunity to practice real exam scenario.

AAPC Certified Professional Coder (CPC) Exam Sample Questions (Q180-Q185):

NEW QUESTION # 180

(A patient presents with increased intracranial pressure and is scheduled for a lumbar puncture. Under CT guidance, the physician inserts a needle at the L4 level and advances a catheter into the subarachnoid space to actively drain cerebrospinal fluid. CSF is collected and sent to the lab; the catheter is removed. What CPT coding is reported?)

- A. 62328, 77012
- B. 0
- C. 62272, 77012
- D. 1

Answer: C

Explanation:

This procedure is not a simple diagnostic lumbar puncture; it includes therapeutic drainage of CSF to relieve elevated intracranial pressure. CPT 62272 is used for spinal puncture with drainage of cerebrospinal fluid (therapeutic), which matches the "actively drain CSF" language. The physician also performed the puncture under CT guidance, and when imaging guidance is documented and not bundled into the primary code, you report the appropriate CT guidance code 77012 for needle placement. Option D (62270) is the classic diagnostic lumbar puncture/spinal puncture code and does not capture active drainage as the purpose. Options A and B are for different catheter/needle procedures and do not best match "spinal puncture with drainage" plus CT guidance in this vignette. CPC exam tip: when the stem emphasizes pressure relief/drainage, think therapeutic drainage code rather than diagnostic LP, and then add imaging guidance when specifically documented and supported.

NEW QUESTION # 181

(A 55-year-old female with severe coronary arteriosclerosis with angina is admitted for elective coronary artery bypass. The surgeon performed a coronary artery bypass using a saphenous vein harvested endoscopically. The vein graft was anastomosed to the obtuse marginal and the left circumflex. What CPT coding is reported for this procedure?)

- A. 0
- B. 1
- C. 33511, 33508
- D. 33534, 33508

Answer: C

Explanation:

CABG coding depends on (1) number of coronary venous grafts and (2) the conduit type (venous vs arterial).

This case uses a saphenous vein graft (a venous conduit) to bypass two coronary targets: the obtuse marginal and the left circumflex. The CPT code for CABG with two venous grafts is 33511. The separate code 33508 is reported for endoscopic harvest of vein when performed for CABG, which is specifically documented here ("harvested endoscopically"). 33534 is for an arterial graft (e.g., internal mammary artery) and does not match a saphenous vein-only description. Option D omits the separately reportable endoscopic harvest service documented. CPC exam approach: identify conduit (vein = 33510-33516 family), count distal anastomoses (two = 33511), and add endoscopic harvest (33508) when documented.

NEW QUESTION # 182

View MR 007400

MR 007400

Radiology Report

Patient: J. Lowe Date of Service: 06/10/XX

Age: 45

MR#: 4589799

Account #: 3216770

Location: ABC Imaging Center

Study: Mammogram bilateral screening, all views, producing direct digital image Reason: Screen Bilateral digital mammography with computer-aided detection (CAD) No previous mammograms are available for comparison.

Clinical history: The patient has a positive family history (mother and sister) of breast cancer.

Mammogram was read with the assistance of GE iCAD (computerized diagnostic) system.

Findings: No dominant speculated mass or suspicious area of clustered pleomorphic microcalcifications is apparent Skin and nipples are seen to be normal. The axilla are unremarkable.

What CPT coding is reported for this case?

- A. 77067-50, Z80.3, Z12.31
- B. 77066, Z80.3, Z12.31
- **C. 77067, Z12.31, Z80.3**
- D. 77066-50, Z12.31, Z80.3

Answer: C

NEW QUESTION # 183

A 10-year-old had a cochlear implant in his left ear few weeks ago. Today he sees the audiologist to initialize and program the implant.

What CPT code is reported?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

1. Procedure and CPT Code Selection:

The patient had a cochlear implant placed in the left ear and is now seeing the audiologist for initialization and programming of the implant.

CPT Code 92603 is specific for initial programming of a cochlear implant for patients younger than 12 years old. This includes the setup and initial adjustments required for the cochlear implant, making it the correct code.

2. Rationale for Excluding Other Options:

Code 92626 is used for evaluating auditory function with the cochlear implant, focusing on assessment rather than programming, and is therefore incorrect for this programming session.

Code 92630 is for aural rehabilitation following cochlear implant, which does not apply to the programming/initiation stage.

Code 92604 is for subsequent programming sessions after the initial programming and is therefore not applicable for the first-time programming.

3. AAPC and CPT Coding Guidelines:

According to AAPC guidelines, 92603 is the appropriate code for initial programming of a cochlear implant in children under 12 years of age.

Therefore, the correct answer is D. 92603.

NEW QUESTION # 184

A 44-year-old female patient with chest pains had a CT of her chest that identified a mass in her left lower lung. The patient currently has ovarian cancer with metastases to the liver. The radiologist suspects the cancer has spread to her lungs. The physician performed an outpatient bronchoscopic biopsy and the pathology report documents the mass as a tumor of uncertain behavior.

What ICD-10-CM codes are reported for this patient?

- A. C56.9, C78.7, C78.02
- **B. D38.1, C56.9, C78.7**
- C. R91.8, C56.9, C78.7
- D. C78.02, C22.9, C79.82

Answer: B

Explanation:

For a patient with a mass in the left lower lung suspected to be cancer that is currently documented as a tumor of uncertain behavior, with existing ovarian cancer with metastases to the liver, the ICD-10-CM codes are:

D38.1: Neoplasm of uncertain behavior of bronchus and lung.

C56.9: Malignant neoplasm of unspecified ovary.

C78.7: Secondary malignant neoplasm of liver and intrahepatic bile duct.

D38.1 is used because the behavior of the lung tumor is uncertain, and C56.9 and C78.7 are used to document the known primary and metastatic cancers.

ICD-10-CM guidelines
