さまざまな年齢層の研究条件に基づくさまざまな種類のアンケートによると、当社のCCFA-200bテスト準備はこれらの研究グループ向けに完全に設計されており、CCFA-200b試験の準備時の能力と効率を向上させ、目標とするCCFA-200b証明書が正常に作成されました。CCFA-200bの質問トレントには多くの利点がありますので、ご紹介します。CrowdStrikeのCCFA-200b試験に合格することができます。

CrowdStrike CCFA-200b 認定試験の出題範囲：

トピック	出題範囲
トピック 1	• Dashboards and Reports: This domain covers understanding different sensor report types and their use cases, and interpreting various audit logs for tracking platform activities.
トピック 2	• Group Creation: This domain covers assigning endpoints to appropriate groups for policy application and following best practices for managing host group structures.
トピック 3	• User Management: This domain covers determining appropriate roles for console access, creating and assigning roles with specific permissions, and managing API keys for platform access.
トピック 4	• Rules Configuration: This domain involves creating custom IOA rules, configuring exclusions to resolve false positives, managing IOC settings for threat detection, and configuring CID-wide General Settings.
トピック 5	• Sensor Deployment: This domain focuses on verifying installation prerequisites, applying default policies and best practices, uninstalling sensors, and troubleshooting sensor issues across supported operating systems.
トピック 6	• Policy Application: This domain encompasses configuring prevention policies for security posture, sensor update policies, RTR audit policies, containment policies with IP exclusions, and managing quarantined files.

100% 合格率のCCFA-200b専門試験 & 合格スムーズCCFA-200b資格講座 | 最高のCCFA-200b日本語pdf問題 CrowdStrike Falcon Administrator

多くの人は結果が大丈夫で過程だけ重要だと言いますが。CrowdStrikeのCCFA-200b試験にとってはそうではない。CrowdStrikeのCCFA-200b試験に合格するのはIT業界で働いているあなたに利益をもらわせることができます。もしあなたが試験に合格する決意があったら、我々のCrowdStrikeのCCFA-200bソフトを利用するのはあなたの試験に成功する有効な保障です。我々のCrowdStrikeのCCFA-200bソフトのデモをダウンロードしてみても我々Tech4Examのあなたに合格させる自信を感じられます。

CrowdStrike Falcon Administrator 認定 CCFA-200b 試験問題 (Q217-Q222):

質問 # 217

What is the purpose of precedence with respect to the Sensor Update policy?

- A. Precedence ensures that conflicting policy settings are not set in the same policy
- B. Hosts assigned to multiple policies will assume the highest ranked policy in the list (policy with the lowest number)
- C. Hosts assigned to multiple policies will assume the lowest ranked policy in the list (policy with the highest number)
- D. Precedence applies to the Prevention policy and not to the Sensor Update policy

正解: B

解説:

The purpose of precedence with respect to the Sensor Update policy is that hosts assigned to multiple policies will assume the highest ranked policy in the list (policy with the lowest number).

This means that if a host belongs to more than one group that has different Sensor Update policies assigned, it will use the policy that has the highest precedence (lowest number) among them. The other options are either incorrect or not related to precedence.

質問 # 218

What internet domain needs to be added to any required allowlists to allow sensors to communicate with the CrowdStrike Cloud?

- A. csfalcon.net
- B. falconcloud.net
- C. cloudprotect-cs.net
- D. cloudsink.net

正解: D

質問 # 219

Which report lists counts of sensors in Reduced Functionality Mode (RFM) for all operating system types, and tracks how long a sensor version will be supported?

- A. Reduce Functionality Audit Report
- B. Sensor Coverage Lookup
- C. Inactive Sensor Report
- D. Sensor Health Report

正解: B

解説:

The report that lists counts of sensors in Reduced Functionality Mode (RFM) for all operating system types, and tracks how long a sensor version will be supported is Sensor Coverage Lookup. The Sensor Coverage Lookup report allows you to view and compare the sensor versions and coverage status for each operating system type in your environment. You can use this report to identify any sensors that are in RFM or are approaching end-of-life (EOL) support.

You can also view the release date and EOL date for each sensor version.

質問 # 220

What log would you use to investigate unusual activity involved with a script interfacing with the Falcon platform?

- A. API audit
- B. RTR session audit
- C. Falcon UI audit
- D. Prevention policy debug

正解: A

質問 # 221

An analyst has reported they are not receiving workflow triggered notifications in the past few days. Where should you first check for potential failures?

- A. Workflow Execution log
- B. Workflow Audit log
- C. Falcon UI Audit Trail
- D. Custom Alert History

正解: A

解説:

The Workflow Execution log in the Workflow Management option allows you to view the status and results of workflow executions triggered by detection events. You can filter the log by workflow name, status, start and end time, and detection ID. You can also view the details of each execution, including the actions performed, the output received, and any errors encountered. This log can help you troubleshoot potential failures or issues with your workflows.

質問 # 222
