

# NSE4\_FGT\_AD-7.6 Latest Test Materials | New NSE4\_FGT\_AD-7.6 Exam Objectives

P.S. Free 2026 Fortinet NSE4\_FGT\_AD-7.6 dumps are available on Google Drive shared by BraindumpsVCE:  
<https://drive.google.com/open?id=1T2ClfhIF7AXKWpVYgUfGvdGmoKx7gfQe>

It is a prevailing belief for many people that practice separated from theories are blindfold. Our NSE4\_FGT\_AD-7.6 learning quiz is a salutary guidance helping you achieve success. The numerous feedbacks from our clients praised and tested our strength on this career, thus our NSE4\_FGT\_AD-7.6 practice materials get the epithet of high quality and accuracy.

Our NSE4\_FGT\_AD-7.6 exam materials allows you to have a 98% to 100% pass rate; allows you takes only 20 to 30 hours to practice before you take the exam; provide you with 24 free online customer service; provide professional personnel remote assistance; give you full refund if you fail to pass the NSE4\_FGT\_AD-7.6 Exam. Our NSE4\_FGT\_AD-7.6 real test serve you with the greatest sincerity. Face to such an excellent product which has so much advantages, do you fall in love with our NSE4\_FGT\_AD-7.6 study materials now? If your answer is yes, then come and buy our NSE4\_FGT\_AD-7.6 exam questions now.

>> NSE4\_FGT\_AD-7.6 Latest Test Materials <<

## New NSE4\_FGT\_AD-7.6 Exam Objectives, Reliable NSE4\_FGT\_AD-7.6 Cram Materials

Do you know why you feel pressured to work? That is because your own ability and experience are temporarily unable to adapt to current job requirements. Our NSE4\_FGT\_AD-7.6 exam questions can upgrade your skills and experience to the current

requirements in order to have the opportunity to make the next breakthrough. Don't doubt about our NSE4\_FGT\_AD-7.6 Study Guide! Just look at the warm feedbacks from our loyal customers, they all have become more successful in their career with the help of our NSE4\_FGT\_AD-7.6 practice engine.

## Fortinet NSE 4 - FortiOS 7.6 Administrator Sample Questions (Q94-Q99):

### NEW QUESTION # 94

Which two features of IPsec IKEv1 authentication are supported by FortiGate? (Choose two.)

- A. Extended authentication (XAuth) to request the remote peer to provide a username and password
- B. Pre-shared key and certificate signature as authentication methods
- C. Extended authentication (XAuth) for faster authentication because fewer packets are exchanged
- D. No certificate is required on the remote peer when you set the certificate signature as the authentication method

**Answer: A,B**

Explanation:

Authentication-wise, both versions support PSK and certificate signature. Although only IKEv1 supports XAuth, IKEv2 supports EAP, which is equivalent to XAuth.

### NEW QUESTION # 95

You are onboarding an agentless, secure web gateway (SWG) endpoint for secure internet access (SIA). What will happen to the user's nonweb traffic? (Choose one answer)

- A. All the nonweb traffic will bypass FortiSASE.
- B. The endpoint will use split tunneling to redirect nonweb traffic to FortiSASE.
- C. FortiSASE will use Firewall-as-a-Service (FWaaS) to redirect nonweb traffic.
- D. FortiSASE will use SWG to redirect nonweb traffic to FortiExtender.

**Answer: A**

Explanation:

"In this use case, FortiSASE acts as an SWG and distributes a proxy auto-configuration (PAC) file to end users, enabling the FortiSASE SWG service as an explicit web proxy. SWG deployment secures only web traffic protocols, such as HTTP and HTTPS."

"All other nonweb traffic bypasses FortiSASE and is forwarded directly to the internet." Technical Deep Dive:

The correct answer is A.

In agentless SWG-based SIA, FortiSASE is operating as an explicit web proxy using a PAC file. That model captures only web protocols, specifically HTTP and HTTPS. It does not create a full tunnel for the endpoint like agent-based FortiClient deployment does.

So the design implication is simple: nonweb traffic does not traverse FortiSASE in this onboarding model. It goes directly to the internet from the endpoint.

Why the other options are wrong:

B is wrong because this is not split-tunnel VPN behavior.

C is wrong because FWaaS does not automatically capture nonweb traffic in the agentless SWG model.

D is wrong because SWG does not redirect nonweb traffic to FortiExtender.

This is an important deployment distinction:

Agent-based SIA can steer broader endpoint traffic through FortiSASE.

Agentless SWG SIA secures only browser-based web traffic.

### NEW QUESTION # 96

Refer to the exhibits.

#### HA configuration

```
HQ-NGFW-1 # config system ha

HQ-NGFW-1 (ha) # show
config system ha
  set group-id 5
  set group-name "Training"
  set mode a-p
  set password ENC a4fbyqY4iPexFmAnZgzDY
  set hbdev "port7" 0
  set session-pickup enable
  set override disable
  set priority 200
  set monitor "port1"
  set memory-based-failover enable
  set memory-failover-threshold 70
  set memory-failover-monitor-period 50
  set memory-failover-sample-rate 10
  set memory-failover-flip-timeout 60
end
```

#### HQ-NGFW-1 System Performance output

```
HQ-NGFW-1 # get system performance status
CPU states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
CPU0 states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
CPU1 states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
Memory: 2042076k total, 1837868k used (90%), 104146k free (5.1%), 100062k freeable (4.9%)
Average network usage: 19/2 kbps in 1 minute, 19/4 kbps in 10 minutes, 19/3 kbps in 30 minutes
Maximal network usage: 36/18 kbps in 1 minute, 58/86 kbps in 10 minutes, 58/87 kbps in 30 minutes

Virus caught: 0 total in 1 minute
IPS attacks blocked: 0 total in 1 minute
Uptime: 10 days, 10 hours, 50 minutes
```

An administrator has observed the performance status outputs on an HA cluster for 55 seconds. Which FortiGate is the primary?

- A. HQ-NGFW-1 with the parameter override setting
- B. HQ-NGFW-2 with the parameter memory-failover-threshold setting
- C. HQ-NGFW-2 with the parameter priority setting
- D. HQ-NGFW-1 with the parameter memory-failover-flip-timeout setting

**Answer: B**

Explanation:

From the HA configuration shown for HQ-NGFW-1:

```
set memory-based-failover enable
set memory-failover-threshold 70
set memory-failover-monitor-period 50
set memory-failover-sample-rate 10
set memory-failover-flip-timeout 60
set override disable
set priority 200
```

From the performance status outputs:

HQ-NGFW-1 memory used is 90% (well above the configured threshold of 70%) HQ-NGFW-2 memory used is about 48.7% (well below the threshold) What happens in FortiOS 7.6 with memory-based failover When memory-based failover is enabled, FortiGate monitors memory utilization. If the unit's memory usage stays above the configured memory-failover-threshold for the configured memory-failover-monitor-period, the cluster triggers a failover away from the unit under memory pressure. Threshold = 70%

HQ-NGFW-1 is at 90%, so it violates the threshold.

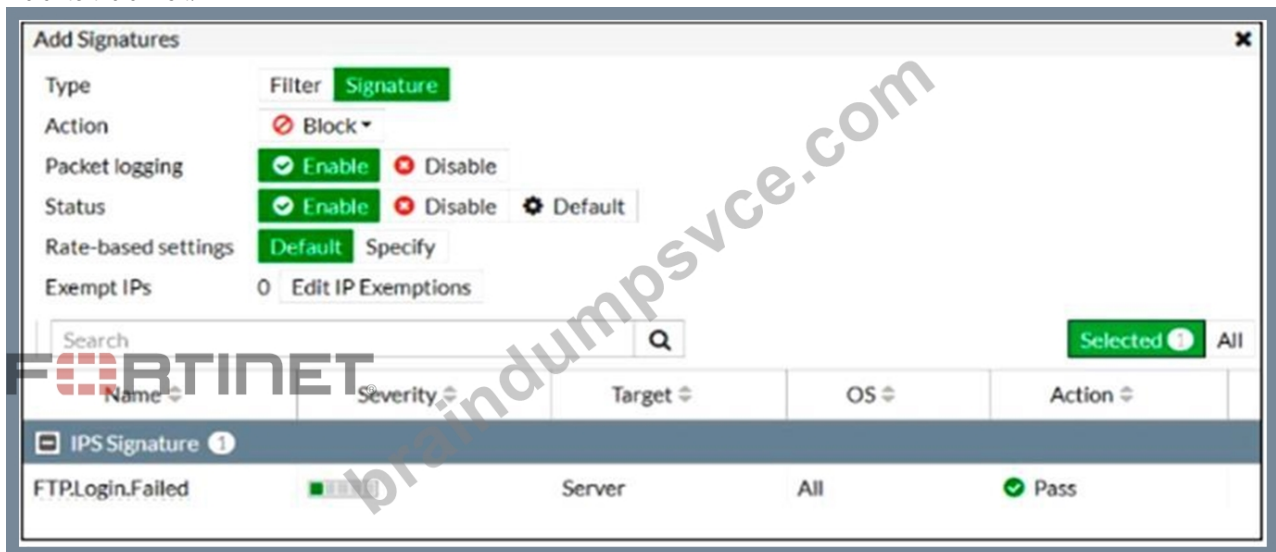

Monitor period = 50 seconds.

The administrator observed for 55 seconds, which is longer than 50 seconds, so the condition is met for long enough to trigger failover.

The memory-failover-flip-timeout 60 is used to prevent rapid back-and-forth role changes (flapping) after a failover decision; it does not prevent the initial failover from occurring once the threshold breach persists for the monitor period.

### NEW QUESTION # 97

Refer to the exhibit.

Review the intrusion prevention system (IPS) profile signature settings shown in the exhibit.

What do you conclude when adding the FTP.Login.Failed signature to the IPS sensor profile?

- A. Traffic matching the signature will be silently dropped and logged.
- B. Traffic matching the signature will be allowed and logged.
- C. The signature setting includes a group of other signatures.
- D. The signature setting uses a custom rating threshold.

**Answer: A**

Explanation:

Select Block to silently drop traffic matching any of the signatures included in the entry.

So, while the default action would be 'Pass' for this signature the administrator is specifically overriding that to set the Block action.

To use the default action the setting would have to be

'Default'.

### NEW QUESTION # 98

The FortiGate device HQ-NGFW-1 with the IP address 10.0.13.254 sends logs to the FortiAnalyzer device with the IP address 10.0.13.125. The administrator wants to verify that reliable logging is enabled on HQ-NGFW-1.

Which exhibit helps with the verification?

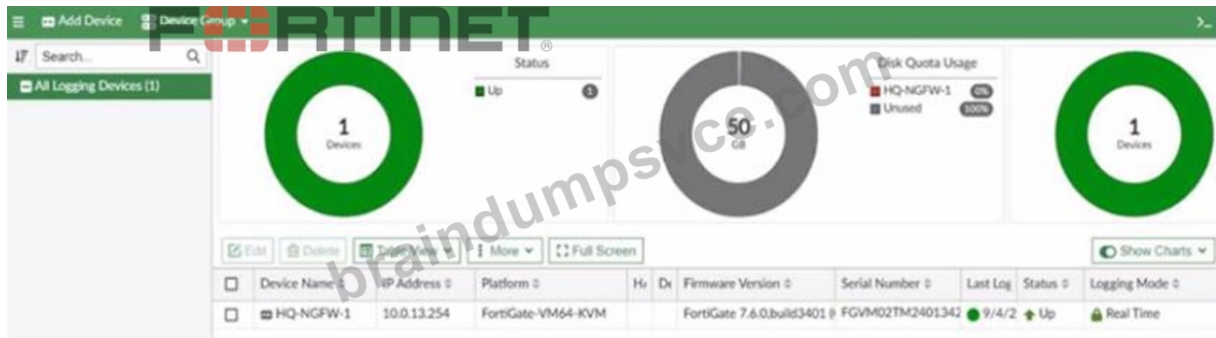

- A.

- B.

```
config log fortianalyzer setting
  set status enable
  set server "10.0.13.125"
  set serial "FAZ-VMTM24012176"
  set enc-algorithm high-medium
  set upload-option realtime
end
```

- C.

- D.

```
HQ-NGFW-1 # diagnose sniffer packet any "host 10.0.13.125" 4
Using Original Sniffing Mode
interfaces=[any]
filters=[host 10.0.13.125]
2.173071 port6 out 10.0.13.254.14974 -> 10.0.13.125.514: udp 347
3.334638 port6 out 10.0.13.254.23054 -> 10.0.13.125.514: psh 4017477514 ack 2638032500
3.335098 port6 in 10.0.13.125.514 -> 10.0.13.254.23054: psh 2638032500 ack 4017477548
3.335129 port6 out 10.0.13.254.23054 -> 10.0.13.125.514: ack 2638032543
```

Answer: B

### NEW QUESTION # 99

.....

We are a group of IT experts to provide professional study materials to people preparing Fortinet certification exam. There are free demo you can download to check the accuracy of our NSE4\_FGT\_AD-7.6 Braindumps. It just needs to take one or two days to practice BraindumpsVCE NSE4\_FGT\_AD-7.6 dumps torrent and review the key points of our pass guide. Clearing exam is 100% guaranteed.

**New NSE4\_FGT\_AD-7.6 Exam Objectives:** [https://www.braindumpsvce.com/NSE4\\_FGT\\_AD-7.6\\_exam-dumps-torrent.html](https://www.braindumpsvce.com/NSE4_FGT_AD-7.6_exam-dumps-torrent.html)
