信頼的-権威のある Practical-Applications-of-Prompt 技術試験試験-試験の準備方法 Practical-Applications-of-Prompt 復習過去問

もし君がサラリーマンで、もし君が早い時間で WGU の Practical-Applications-of-Prompt 認定試験に合格したいなら、GoShiken は君のベストな選択になります。うちの WGU の Practical-Applications-of-Prompt 学習教材は GoShiken の IT 専門家たちが研究して、実践して開発されたものです。それは十年過ぎの IT 認証経験を持っています。うちの商品を使ったら、君は最も早い時間で、簡単に認定試験に合格することができます。

WGU Practical Applications of Prompt QFO1 認定 Practical-Applications-of-Prompt 試験問題 (Q18-Q23):

質問 # 18

A person is using generative AI to create a social media post. Why is it important to write an effective prompt?

- A. The prompt ensures that the post will be well received.
- B. The prompt ensures that the content is original.
- C. The prompt prevents output that is nonsensical.
- D. The prompt indicates how to customize the post for each reader.

正解: C

解説:

Writing an effective prompt is essential because it provides the logical framework the AI needs to process a request; primarily, the prompt prevents output that is nonsensical. Generative AI models are statistical engines that predict the next most likely word or character. Without a clear, well-structured prompt that includes instructions and context, the model can easily lose the "thread" of logic, leading to "hallucinations" or sequences of text that are grammatically correct but logically incoherent or irrelevant to the user's goal.

In the context of social media, where brevity and impact are key, an ineffective prompt might result in a post that uses the wrong hashtags, misses the brand voice, or includes bizarre metaphors that don't make sense to the audience. While no prompt can "ensure" a post will be well-received by humans (Option B) or guarantee absolute originality (Option D), a structured prompt guides the AI to stay within the bounds of human logic.

By providing specific constraints (e.g., "Write a 20-word caption about coffee in a joyful tone"), the user ensures the output is a sensible, usable piece of content rather than a random string of related words.

質問 # 19

The prompt, "Give me ideas for a birthday party," is created by a parent to help plan for an upcoming birthday party. Which change helps refine the prompt?

- A. Indicate how soon a response is needed
- **B. Indicate the size of the party**
- C. Give the full name of the child
- D. Explain why the party is being thrown

正解: B

解説:

Refining a prompt involves adding constraints that narrow the range of possibilities to better fit the user's practical reality. Indicating the size of the party is a high-value refinement because it fundamentally changes the nature of the suggestions the AI will generate. Planning a party for five children at home is a radically different logistics task than planning a party for 50 people at a rented venue. By adding the party size, the AI can filter out suggestions that are physically or financially impractical. For example, if the size is "small/intimate," the AI might suggest DIY crafts or board games. If the size is "large/corporate," it might suggest catering options and venue rentals. While knowing "why" the party is thrown (Option A) provides some context, the "how many" (Option B) is a concrete constraint that dictates the feasibility of all subsequent ideas. Providing a child's full name (Option D) is a privacy risk and provides zero functional value to the AI's creative process. Effective refinement focusing on scale and constraints ensures that the AI's output is actionable rather than just imaginative.

質問 # 20

How do generative AI interfaces enhance the experiences of users?

- **A. They provide intuitive AI interactions.**
- B. They provide users with information.
- C. They give users access to ethical reasoning.
- D. They allow AI to understand user emotions.

正解: A

解説:

Generative AI interfaces, such as chat-based platforms, have revolutionized the user experience primarily by providing intuitive AI interactions. Before the rise of Large Language Models (LLMs), interacting with complex computer systems often required specialized knowledge, such as coding skills, specific command-line syntax, or navigating complex menus. Generative AI has lowered this barrier by allowing users to communicate with technology using natural language—the same way they would talk to another human.

This intuitiveness allows users to express complex goals, ask follow-up questions, and refine outputs iteratively without needing to understand the underlying technical architecture. The interface acts as a bridge that translates human intent into machine-executable tasks. By providing a conversational flow, these interfaces make technology more accessible to non-technical users, fostering a collaborative environment where the AI acts as a creative partner. While providing information is a function of the AI, it is the interface and the natural language processing (NLP) capabilities that make the interaction "intuitive." This shift from rigid input/output systems to fluid, conversational exchanges is the hallmark of modern generative AI, significantly enhancing productivity and user engagement across various industries.

質問 # 21

Which content creation tool specializes in versatile image creation through detailed text prompts?

- A. DALL-E
- B. Invideo
- **C. Midjourney**
- D. ChatGPT

正解: C

解説:

Midjourney is a generative AI tool that specifically specializes in high-quality, versatile image creation through sophisticated text prompts. While other tools like DALL-E are integrated into larger ecosystems (like OpenAI's ChatGPT), Midjourney has gained a reputation for its distinct artistic style, high resolution, and deep "parameter" controls that allow prompt engineers to fine-tune lighting, camera angles, and textures.

Midjourney operates primarily through a Discord interface, where users utilize "slash commands" (like /imagine) to initiate generations. It is favored by designers and concept artists because of its ability to interpret complex, evocative language into visually stunning outputs. Unlike ChatGPT, which is primarily a text-based LLM, Midjourney is a "Diffusion Model" specifically trained on image-caption pairs. Evaluating Midjourney as a medium requires understanding that the "syntax" of the prompt differs from text models; it relies heavily on artistic descriptors, style references (e.g., "unreal engine," "octane render"), and aspect ratio constraints to achieve the desired outcome.

質問 # 22

What is the principle of ethics that is ensured by explaining AI system decision-making to stakeholders and users?

- A. Accountability
- **B. Transparency**
- C. Societal impact
- D. Fairness

正解: B

解説:

Transparency in AI ethics refers to the degree to which an AI system's internal logic, data sources, and decision-making processes are visible and understandable to humans. It is the direct antidote to the "Black Box" problem. When an AI system provides a recommendation, the principle of transparency ensures that stakeholders (such as regulators, developers, and end-users) can understand the "why" behind the output. This is often achieved through "Explainable AI" (XAI) techniques.

In practical prompt engineering, transparency is optimized by instructing the model to provide its reasoning.

For example, using "Chain of Thought" prompting forces the AI to list the steps it took to arrive at a conclusion. This makes the interaction transparent because the user can see if the AI relied on faulty logic or biased data. Transparency builds trust; if a user understands how an AI reached a conclusion, they are more likely to adopt the technology. Furthermore, transparency is a prerequisite for other ethical principles like Fairness and Accountability, as you cannot fix a bias or hold a system accountable if you cannot see how it functions internally.

質問 # 23

.....

WGUの Practical-Applications-of-Prompt 認定試験は GoShiken の最優秀な専門家チームが自分の知識と業界の経験を利用してどんどん研究した、満足WGU認証受験生の需要に満たすの書籍がほかのサイトにも見えますが、GoShikenの商品が最も保障があって、君の最良の選択になります。
