## GICSP study materials & GICSP exam preparation & GICSP pass score

Our GICSP study materials are compiled and verified by the first-rate experts in the industry domestically and they are linked closely with the real exam. Our products' contents cover the entire syllabus of the exam and refer to the past years' exam papers. Our test bank provides all the questions which may appear in the real exam and all the important information about the exam. You can use the practice test software to test whether you have mastered the GICSP Study Materials and the function of stimulating the exam to be familiar with the real exam's pace, atmosphere and environment. So our GICSP study materials are real-exam-based and convenient for the clients to prepare for the exam.

## GIAC Global Industrial Cyber Security Professional (GICSP) Sample Questions (Q29-Q34):

### NEW QUESTION # 29

Which of the following is a key step in the threat modeling process for ICS environments?

Response:

- **A. Identifying critical assets and their potential vulnerabilities**
- B. Disabling all access control measures
- C. Increasing the complexity of ICS protocols
- D. Simplifying the system architecture

**Answer: A**

### NEW QUESTION # 30

What is the purpose of the traffic shown in the screenshot?

- A. Modbus read registers
- **B. Modbus write coil**

- C. Modbus read coils
- D. Modbus query
- E. Modbus database response

**Answer: B**

Explanation:

The Wireshark capture filter is set to `modbus_tcp.func_code == 5`. According to the Modbus protocol specification: Function code 5 corresponds to Write Single Coil (A).

Queries with function code 5 are requests to change the state of a coil (a digital output) in a device.

The packet details confirm "function 5: Write coil" with the reference number and data.

Other function codes (such as read coils or read registers) use different function codes, so options C and E are incorrect. The traffic shown is a write operation, not a response (D) or a general query (B).

### NEW QUESTION # 31

What is the primary benefit of having a documented ICS security program in place?

Response:

- **A. It ensures compliance with regulatory standards**
- B. It reduces the need for physical security measures
- C. It allows unauthorized users to access ICS systems
- D. It increases the complexity of system operations

**Answer: A**

### NEW QUESTION # 32

What is the primary function of actuators in Level 0 of an ICS?

Response:

- A. To visualize process data for human operators
- B. To manage enterprise resource planning (ERP) systems
- C. To store historical data for long-term analysis
- **D. To send commands to physical devices to perform actions**

**Answer: D**

### NEW QUESTION # 33

As part of the security architecture for Level 3, you need to ensure that SCADA systems are protected from potential cyberattacks. Which of the following actions should be included in your security strategy?

(Select all that apply)

Response:

- A. Disable all firewalls to improve system performance
- **B. Implement strong authentication for SCADA system access**
- **C. Use encryption for data transmitted between SCADA systems and Level 2 devices**
- **D. Regularly monitor network traffic for suspicious activity**

**Answer: B,C,D**

### NEW QUESTION # 34
