

Latest VMware 2V0-16.25 Test Sample & 2V0-16.25 Reliable Test Practice

DOWNLOAD the newest TorrentValid 2V0-16.25 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1hp-Oge9rTqUIrNH70ty2QcX3RjaVKF9f>

The client can try out and download our VMware 2V0-16.25 Training Materials freely before their purchase so as to have an understanding of our product and then decide whether to buy them or not. The website pages of our product provide the details of our VMware vSphere Foundation 9.0 Administrator learning questions.

VMware 2V0-16.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.
Topic 2	<ul style="list-style-type: none">IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.

Topic 3	<ul style="list-style-type: none"> • Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.
Topic 4	<ul style="list-style-type: none"> • Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
Topic 5	<ul style="list-style-type: none"> • VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.

2V0-16.25 Reliable Test Practice - Latest 2V0-16.25 Real Test

We provide the free demos before the clients decide to buy our 2V0-16.25 study materials. The clients can visit our company's website to have a look at the demos freely. Through looking at the demos the clients can understand part of the contents of our 2V0-16.25 study materials, the form of the questions and answers and our software, then confirm the value of our 2V0-16.25 Study Materials. If the clients are satisfied with our 2V0-16.25 study materials they can purchase them immediately. They can avoid spending unnecessary money and choose the most useful and efficient 2V0-16.25 study materials.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q39-Q44):

NEW QUESTION # 39

An administrator must configure identity access for VMware vSphere Foundation (VVF) to allow admin accounts from the enterprise Active Directory domain corp.local to log in using domain credentials. Security requires authentication to use the default Active Directory protocol, without federation.

Which configuration step is required to enable Active Directory users to authenticate to vCenter?

- A. Add Active Directory over LDAP as an identity source.
- B. Configure a trusted identity provider using OpenID Connect (OIDC).
- C. Add the domain controller certificate to the Trusted Root store in vCenter.
- D. Configure Identity Federation using SAML with corp.local.

Answer: A

Explanation:

To allow Active Directory domain users (corp.local) to authenticate in vCenter with domain credentials:

* The correct method is configuring Active Directory over LDAP as an identity source. (D)

* This uses the default AD protocol (LDAP/Kerberos) without requiring SAML or OIDC federation.

Other options:

- * A. Adding domain controller certificate# Needed for LDAPS but not the main step.
- * B. Identity Federation with SAML# Requires federation, not allowed per requirements.
- * C. OpenID Connect (OIDC)# Used for external IdPs, not traditional AD auth.

References:

VMware vSphere 9.0 -Configuring Active Directory Identity Sources

VMware Docs: Add AD over LDAP as Identity Source

NEW QUESTION # 40

What is the benefit of enabling lockdown mode on VMware ESX hosts?

- A. Improves network performance.
- **B. Restricts direct access to the ESX host, enhancing security.**
- C. Simplifies the management of virtual machines.
- D. Increases CPU and memory resources available to virtual machines (VMs).

Answer: B

Explanation:

Lockdown Mode on ESXi hosts is a security feature that restricts direct login to the ESXi host.

* Once enabled, administrators must manage the host through vCenter Server instead of direct DCUI/SSH access (except for exception users).

* This prevents unauthorized local access and improves overall security compliance.

Other options:

- * A. Improves network performance# Not related.
- * C. Increases CPU/memory for VMs# Not related.
- * D. Simplifies VM management# It actually makes direct management more restricted.

NEW QUESTION # 41

An administrator is tasked with creating a custom VMware Cloud Foundation (VCF) Operations Web Certificate.

What are three requirements to which the certificate must conform to be used with VCF Operations? (Choose three.)

- **A. In the certificate file, the server certificate must be first in the order of certificates.**
- B. In the certificate file, all certificates and the private key must be in PFX format.
- C. The VCF Operations certificate cannot use the Subject Alternative Name (SAN) extension.
- **D. In the certificate file, all certificates and the private key must be in PEM format.**
- E. In the certificate file, the server certificate must be last in the order of certificates.
- **F. The certificate file must include the server certificate, a private key, and all issuing certificates.**

Answer: A,D,F

Explanation:

VCF Operations requires that custom SSL certificates meet these requirements:

* Certificates and private key must be in PEM format. (A)

* The server certificate must be listed first in the file. (D)

* The file must include the server certificate, private key, and full certificate chain (issuing/intermediate/root CA). (E)

Why others are wrong:

- * B. Server certificate last# Incorrect, it must be first.
- * C. Cannot use SAN extension# Incorrect, SAN is supported and recommended.
- * F. PFX format# Not supported for VCF Operations.

VMware Cloud Foundation 9.0.2 -SSL Certificate Requirements for VCF Operations VMware Docs: Replacing vRealize Operations Certificates

NEW QUESTION # 42

During a recent audit, it was determined that a group of users may have been compromised. These users should not have access to any VMware vCenter resources while an investigation is underway. All the affected users have been placed into a SUSPECT_USERS group.

Which step is required to ensure that the suspect users will never have access to resources in vCenter?

- A. Assign the SUSPECT_USERS group the Administrator role to the vCenter Object and uncheck propagate.
- B. Disconnect the vCenter from Active Directory.
- C. Assign the SUSPECT_USERS group the Read-only role to the vCenter Object and check propagate.
- **D. Assign the SUSPECT_USERS group the No access role to the vCenter Object and check propagate.**

Answer: D

Explanation:

To ensure compromised users cannot access vCenter resources:

- * Assign the No Access role at the vCenter level.
- * Enable propagation so this restriction applies to all child objects.
- * This guarantees zero permissions for SUSPECT_USERS.

Other options:

- * B. Administrator with uncheck propagate# Still gives dangerous access at root level.
- * C. Disconnect Active Directory# Disrupts all AD users, not just suspect ones.
- * D. Read-only role# Still grants access, not acceptable during investigation.

NEW QUESTION # 43

An administrator is tasked with deploying a VMware Cloud Foundation (VCF) Operations for Logs appliance into vSphere Foundation.

After downloading the .ova, which component does the administrator use to deploy the file?

- A. VCF Operations
- **B. vSphere Client**
- C. VCF Automation
- D. VCF Fleet Management

Answer: B

Explanation:

To deploy the VCF Operations for Logs OVA appliance:

- * The vSphere Client is used to deploy .ova and .ovf templates directly into a vCenter environment.
- * After deployment, the appliance can be configured and integrated with VCF.

Other options:

- * A. VCF Fleet Management# Used for multi-instance management, not OVA deployment.
- * C. VCF Automation# Provides automation workflows, not appliance deployment.
- * D. VCF Operations# Monitoring and analytics platform, not used for OVA installs.
