## Reliable Adobe AD0-E117 Test Camp & Detailed AD0-E117 Answers

After you purchase our AD0-E117 exam guide is you can download the test bank you have bought immediately. You only need 20-30 hours to learn and prepare for the AD0-E117 exam, because it is enough for you to grasp all content of our AD0-E117 study materials, and the passing rate of our AD0-E117 Exam Questions is very high and about 98%-100%. Our latest AD0-E117 quiz torrent provides 3 versions and you can choose the most suitable one for you to learn. All in all, there are many merits of our AD0-E117 quiz prep.

## Adobe Experience Manager Architect Master Sample Questions (Q53-Q58):

### NEW QUESTION # 53

During an optimization session, a client using AEM 6.5 mentions that they face challenges with their AEM Author setup. The client has significant repository growth and can see an increased amount of TAR files in the segmentstore on disk. When editors are working, they see that workflows take up more time. The purging of workflows works as expected. Which two optimizations should an Architect suggest to took into and further investigate? (Choose two.)

- A. Increase the maxFileSize of the TAR segmentstore
- B. Execute an offline tar compaction twice a day
- C. Leverage Transient Workflows where possible
- D. Leverage workflow offloading for all workflows
- E. Configure the Maximum Parallel Jobs

Answer: C,D

Explanation:

Leverage workflow offloading for all workflows and Leverage Transient Workflows where possible<sup>123</sup>. According to Adobe Experience Manager documentation<sup>2</sup>, workflow offloading is a technique that distributes processing tasks among AEM instances in a topology. This can improve performance and scalability of AEM author instances by using dedicated instances for executing workflows. Transient workflows are workflows that do not persist any data or history and are automatically purged after completion<sup>3</sup>. This can reduce repository growth and improve workflow efficiency.

#### NEW QUESTION # 54

An organization is transitioning its digital platform to AEMaaS. The lead architect is overseeing the transition and ensuring that the platform remains robust and offers a consistent user experience. The team has already performed general functionality tests. As the launch date approaches, the team is focusing on potential real-world challenges, such as the platform's behavior under high-user traffic and communicating with third-party services.

Which two types of testing should the architect prioritize next to ensure a seamless transition to AEMaaS?  
(Choose two.)

- A. Unit Testing
- B. Usability Testing
- C. Load Testing
- D. Integration Testing

Answer: C,D

#### NEW QUESTION # 55

A media company surveys the end users of their AEM Sites website. The survey identifies that it is difficult to locate content on the site due to lack of relevancy and slow performance when navigating through the large volume of content.

To address both issues, the business team suggests integrating an innovative taxonomy product to the company's AEM implementation. The product is new on the market and the development team has no experience with the technology.

Which two steps should an Architect recommend to evaluate this new feature? (Choose two.)

- A. Develop the integration as proof of concept with sample content
- B. Test usability of the feature with selected business users
- C. Test usability of the feature with selected end users
- D. Develop the integration and deploy it to 50% of the production AEM instances
- E. Develop the integration as proof of concept with full production content

Answer: A,C

Explanation:

"developing a proof of concept with sample content allows for testing the feasibility and performance of the integration without affecting production data. Testing usability with selected end users allows for validating the relevancy and user satisfaction of the feature".

#### NEW QUESTION # 56

A customer has a requirement to allow authors to access AEM with single sign-on. To achieve this an Architect needs to integrate AEM with the customer's identity management system.

Which two actions could an Architect take to meet this requirement? (Choose two.)

- A. Configure the Sling Authentication Requirements for the OSGi HTTP Service
- B. Configure the generic SSO Authentication Handler
- C. Configure the SAML Authentication Handler
- D. Implement the generic SSO Authentication Handler interface
- E. Implement a custom JAAS Login Module

Answer: B,D

Explanation:

"implementing and configuring the generic SSO Authentication Handler interface can enable single sign-on integration with an identity management system".
