Earning the HP HPE0-J68 Certification demonstrates that the candidate has the expertise required to design, implement, and manage HPE storage solutions. HPE Storage Solutions certification is recognized globally and is highly valued by IT professionals and organizations. HPE Storage Solutions certification also helps individuals to enhance their career prospects and opens up opportunities for higher salaries, promotions, and better job prospects.

## HPE Storage Solutions Sample Questions (Q220-Q225):

### NEW QUESTION # 220

What advantage does the Unified API that is part of HPE's composable strategy provide?

- A. infrastructure lifecycle managed with standard programming code

- B. dedicated object storage platform
- C. write-back capability and instant cable warmth
- D. single portal for managing servers, networking, and storage

**Answer: A**

Explanation:

The Unified API that is part of HPE's composable strategy provides the advantage of managing the entire infrastructure lifecycle using standard programming code. This approach allows IT administrators to automate and streamline operations, enabling them to define infrastructure as code, which can be easily integrated into DevOps workflows. This API-driven approach is central to HPE's composable infrastructure strategy, providing flexibility, efficiency, and ease of management.

HPE Composable Infrastructure

HPE Unified API

### NEW QUESTION # 221

Which value does an HPE Nimble solution provide in addition to other HPE storage solutions

- A. Upfront option for free controller upgrade after 3 years
- B. Tier 1 and tier 2 phone support
- C. All inclusive software licensing over 5 years and additional capacity upgrades
- **D. Flat support pricing for all hardware components**

**Answer: D**

Explanation:

One of the key value propositions of the HPE Nimble storage solution, in addition to its technical capabilities, is the flat support pricing model for all hardware components. This means that customers can expect consistent and predictable support costs over the lifespan of the storage system, which is particularly beneficial for budgeting and financial planning. This flat pricing model contrasts with other storage solutions where support costs can vary significantly as the system ages.

Nimble's support model, combined with its predictive analytics and all-inclusive software, ensures that customers have a comprehensive and cost-effective storage solution.

### NEW QUESTION # 222

What HPE Alletra 9000 CLI command allows you to display real-time statistics on exported volumes including roundtrip time of an IO as seen by the system?

- **A. statvln**
- B. srstatv
- C. statv
- D. srstatvln

**Answer: A**

Explanation:

The statvln command in the HPE Alletra 9000 CLI is used to display real-time statistics on exported volumes, including the roundtrip time (RTT) of an I/O as seen by the system. This command provides detailed insights into the performance of the volumes, helping administrators monitor and optimize the storage system's performance in real-time.

### NEW QUESTION # 223

The customer uses an HPE Alletra 6000 system and wants to create snapshots of selected volumes automatically at a specific schedule. Which part of the web-based UI will you recommend for this operation?

- A. Data Access
- B. Performance Policy

- C. Data Protection
- D. Hardware

**Answer: C**

Explanation:

In the HPE Alletra 6000 system, to create snapshots of selected volumes automatically on a specific schedule, you would use the Data Protection section of the web-based UI. This section allows you to define snapshot policies, schedule regular snapshots, and manage snapshot retention. It's specifically designed for setting up data protection strategies, including the automation of backup and recovery processes through scheduled snapshots, ensuring that critical data is always protected.
