

1Z0-1111-25 Test Practice - Valid 1Z0-1111-25 Test Review

BTW, DOWNLOAD part of NewPassLeader 1Z0-1111-25 dumps from Cloud Storage: https://drive.google.com/open?id=1B_NV0byBEUeGik_To2-vjJdlaXTpY_rL

Never say you can not do it. This is my advice to everyone. Even if you think that you can not pass the demanding Oracle 1Z0-1111-25 exam. You can find a quick and convenient training tool to help you. NewPassLeader's Oracle 1Z0-1111-25 exam training materials is a very good training materials. It can help you to pass the exam successfully. And its price is very reasonable, you will benefit from it. So do not say you can't. If you do not give up, the next second is hope. Quickly grab your hope, it is in the NewPassLeader's Oracle 1Z0-1111-25 Exam Training materials.

Dear, do you tired of the study and preparation for the 1Z0-1111-25 actual test? Here, we advise you to try the Oracle 1Z0-1111-25 online test which can simulate the real test environment and give an excellent study experience. You see, you can set the test time and get the score immediately after each test by using 1Z0-1111-25 Online Test engine. With the interactive and intelligent functions of NewPassLeader 1Z0-1111-25 online test, you will be interested in the study. Besides, the valid questions & verified answers can also ensure the 100% pass rate.

Valid 1Z0-1111-25 Test Review & Pass 1Z0-1111-25 Test Guide

With the pass rate reaching 98.75%, our 1Z0-1111-25 test materials have gained popularity in the international market. Many candidates have recommended our products to their friends. In addition, 1Z0-1111-25 exam materials are edited by skilled professionals, and they possess the professional knowledge for the exam, therefore you can use the exam materials at ease. Free demo for 1Z0-1111-25 Exam Dumps are available, and you can have a try before buying, so that you can have a better understanding of what you are going to buy.

Oracle 1Z0-1111-25 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Monitor Applications with Deep Visibility into End-User Experience: This domain tests the knowledge of Application Performance Engineers and DevOps Specialists in using OCI Application Performance Monitoring (APM). It includes instrumenting applications for data collection, analyzing performance metrics, visualizing distributed application components, and diagnosing issues across multi-tier architectures.
Topic 2	<ul style="list-style-type: none"> • Respond to Cloud Resource Changes in Real-Time: This domain measures the skills of Event Managers and Integration Specialists in using OCI Events Service. It covers event structures, types, rules, and integration with other OCI services to respond effectively to resource changes and automate workflows.
Topic 3	<ul style="list-style-type: none"> • Monitor Cloud Environments with Metrics and Alarms: This section tests Oracle Cloud Operators' knowledge of configuring OCI Monitoring Service. It includes enabling metrics for resource monitoring, setting up alarms based on best practices, and responding to real-time changes in cloud environments to ensure system reliability.
Topic 4	<ul style="list-style-type: none"> • Distinguish the Key Concepts of Logging Analytics: This section evaluates the expertise of Data Analysts and Troubleshooting Specialists in using OCI Logging Analytics. It covers log ingestion methods, searching and filtering logs, performing advanced analytics, and leveraging machine learning-powered insights for proactive issue resolution.

Oracle Cloud Infrastructure 2025 Observability Professional Sample Questions (Q59-Q64):

NEW QUESTION # 59

Which are the two components that the Management Agent solution includes in the Cloud service? (Choose two.)

- A. OCI Logging Analytics
- B. Management Gateway
- C. Management Agent
- D. Cloud assets

Answer: B,C

Explanation:

The Management Agent solution comprises:

Management Gateway (B): A secure proxy that encrypts and forwards data from Management Agents to OCI services.

Management Agent (D): A lightweight process that collects and sends telemetry data from resources.

Why not A or C?

OCI Logging Analytics (A): A consumer of agent data, not a component of the solution.

Cloud assets (C): A vague term, not a specific component.

These components enable secure data collection.

NEW QUESTION # 60

Which of the following is not a key interaction element in the Log Explorer UI of Logging Analytics?

- A. Scope Filter
- B. Fields Panel
- C. Dashboard
- D. Time Picker

Answer: C

Explanation:

The Log Explorer UI in OCI Logging Analytics includes four key interaction elements: Fields Panel, Time Picker, Scope Filter, and Results Panel. These allow users to search, filter, and analyze logs interactively.

Dashboard (D): This is not part of the Log Explorer UI. Dashboards are separate visualizations in Logging Analytics for summarizing data, not an interactive element of the Log Explorer.

Why A, B, and C are key elements:

Fields Panel (A): Displays log fields for filtering and analysis.

Time Picker (B): Sets the time range for log queries.

Scope Filter (C): Defines the scope (e.g., compartments, log groups) of the log search.

NEW QUESTION # 61

You are part of the Cloud Operations team managing thousands of compute instances running in Oracle Cloud Infrastructure (OCI). The OCI Logging Service is configured to collect logs from these instances using a Unified Monitoring Agent. A requirement has been created to archive logging data into OCI Object Storage. Which OCI capability can help you achieve this requirement?

- A. Logging Query
- **B. Service Connector**
- C. ObjectCollectionRule
- D. IAM policy

Answer: B

Explanation:

To archive logs from OCI Logging Service to Object Storage, an automated data movement solution is needed:

Service Connector (A): Part of Service Connector Hub, this capability moves data between OCI services. A Service Connector can be configured with Logging as the source and Object Storage as the target, automatically transferring logs based on filters (e.g., log level) or schedules.

Why not B, C, or D?

ObjectCollectionRule (B): Used in Logging Analytics to ingest logs from Object Storage, not archive to it.

IAM policy (C): Governs permissions but doesn't perform data movement.

Logging Query (D): Analyzes logs within Logging Service, not for archiving.

Service Connector ensures seamless, scalable log archiving.

NEW QUESTION # 62

You are part of an organization with thousands of users accessing Oracle Cloud Infrastructure (OCI). An unknown user action was executed, resulting in configuration errors. You are tasked to quickly identify the details of all users who were active in the last six hours along with any REST API calls that were executed. Which OCI service would you use?

- A. Logging
- B. Service Connectors
- C. Notifications
- D. Management Agent
- **E. Audit**

Answer: E

Explanation:

To investigate user activity and REST API calls over the last six hours, the OCI Audit service is the appropriate tool.

Audit (E): This service automatically records all API operations (including REST API calls) performed on OCI resources. It provides detailed logs with user details, timestamps, and actions, ideal for security and compliance investigations. You can filter audit logs by time range (e.g., last six hours) and user attributes.

Why not A, B, C, or D?

Notifications (A): Sends alerts but doesn't store or analyze API call details.

Service Connectors (B): Moves data between services, not for auditing.

Management Agent (C): Collects metrics/logs from resources, not API audit data.

Logging (D): Handles application and system logs, not API activity tracking.

Audit logs are retained for 90 days by default, making this a perfect fit.

NEW QUESTION # 63

Which Machine Learning-based visualization is helpful in analyzing extremely large volumes of log records by grouping them based on their shape?

- A. Word Cloud
- **B. Cluster**
- C. Summary Table

Answer: B

Explanation:

In Logging Analytics, ML-driven visualizations aid log analysis:

Cluster (A): Uses machine learning to group logs by structural similarity ("shape"), reducing noise and highlighting patterns or anomalies in large datasets.

Why not B or C?

Summary Table (B): Aggregates data tabularly, not ML-based or shape-focused.

Word Cloud (C): Displays word frequency, not structural grouping.

Cluster is ideal for large-scale log pattern recognition.

NEW QUESTION # 64

.....

Dreaming to be a certified professional in this line? Our 1Z0-1111-25 study materials are befitting choices. We made real test materials in three accessible formats for your inclinations. (PDF, APP, software). Our website is an excellent platform, which provides the questions of these versions of our 1Z0-1111-25 Exam Questions compiled by experts. By browsing this website, all there versions of our 1Z0-1111-25 pratice engine can be chosen according to your taste or preference.
