### NEW QUESTION # 322

A company manufactures and distributes sporting goods. The company uses Dynamics 365 Finance and Project Operations.

A user's primary role is managing projects. The user must also have access to trial balances and journal entries.

You need to determine the correct license assignment for this user.

Which two licenses should you assign to the user? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- **A. Project Operations attach**
- B. Finance attach
- **C. Finance base**
- D. Project Operations base

**Answer: A,C**

Explanation:

Explanation

Base licenses and cost savings opportunities for "attach" licenses

Microsoft provides a cost-effective way for a single Dynamics 365 user to obtain full user licensing for multiple products. Licenses for products that provide core business functionality qualify as base licenses. (See the table below.) Each has one or more additional applications that are frequently used by people in the same roles and that qualify as attach licenses for that user. (These are sometimes referred to as subsequent qualifying applications.) To take advantage of the special attach license pricing:

1. Buy the first base user license at standard pricing.
2. Review which attach licenses are available for that base. (See the qualifying products for each base license below.)
3. Buy attach licenses for the same user at an attach license price. You may buy as many attach licenses as are available for that base license.

### NEW QUESTION # 323

You must recommend a solution to meet the requirements for User2.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

Box 1: Business process modeler

Business process modeler (BPM) in Microsoft Dynamics Lifecycle Services (LCS) is a tool that you can use to create, view, and modify repeatable implementations that are based on business process libraries. BPM helps you align your business processes with industry-standard processes that are described by the American Productivity & Quality Center (APQC). You can perform fit-gap analysis between your business requirements and the default processes in Finance and Operations apps. Additionally, you can add new business processes that aren't already defined.

BPM is compatible with the following products:

Microsoft Word - You can generate documentation for business processes.

Microsoft Visio - You can export business process maps to Visio files.

Note: Vendors and purchasing

As customers purchase packages, Margie's Travel can claim rebates with the providing vendor for every package sold. The rebates are claimed quarterly, and internal workflows have been established for approval prior to vendor submission. The workflows for package offerings eligible for rebates can be complex. User2 has created Visio diagrams for the associated approval processes.

Box 2: Regression suite automation tool (RSAT)

The Regression suite automation tool (RSAT) significantly reduces the time and cost of user acceptance testing (UAT) of Finance and Operations apps. UAT is typically required before you take a Microsoft application update, or before you apply custom code and configurations to your production environment.

RSAT lets functional power users record business tasks by using Task recorder and then convert the recordings into a suite of automated tests, without having to write source code.

Note: The accounts receivable and accounts payable departments are unclear about the workflows associated with the rebate process. User2 must ensure that representatives from each department validate that they have tested their respective steps in the overall process. Testing feedback must be communicated to User2.
