

# Cisco certification 300-620 exam training programs

What's more, part of that DumpStillValid 300-620 dumps now are free: [https://drive.google.com/open?id=1L7mFEEDBHv7qMjrpalQtazyRHvFu\\_w\\_r](https://drive.google.com/open?id=1L7mFEEDBHv7qMjrpalQtazyRHvFu_w_r)

DumpStillValid trained experts have made sure to help the potential applicants of Cisco 300-620 certification to pass their Cisco 300-620 exam on the first try. Our PDF format carries real Cisco 300-620 Exam Dumps. You can use this format of Cisco 300-620 actual questions on your smart devices.

In the past few years, our 300-620 study materials have helped countless candidates pass the 300-620 exam. After having a related certification, some of them encountered better opportunities for development, some went to great companies, and some became professionals in the field. 300-620 Study Materials have stood the test of time and market and received countless praises. Through the good reputation of word of mouth, more and more people choose to use 300-620 study torrent to prepare for the 300-620 exam, which makes us very gratified.

## 300-620 Visual Cert Test - 300-620 Interactive EBook

The price for 300-620 exam torrent are reasonable, and no matter you are a student at school or an employee in the enterprise, you can afford the expense. In addition, 300-620 exam dumps are reviewed by skilled professionals, therefore the quality can be guaranteed. We offer you free demo to have a try before buying 300-620 Exam Torrent from us, so that you can know what the complete version is like. Free update for one year is available, and the update version will be sent to your email address automatically.

## Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q362-Q367):

### NEW QUESTION # 362

An SNMP monitoring service is added to a Cisco ACI fabric. The solution must meet these requirements:

- The notification must be generated when significant events occur during hardware-related events.
- The notification system must be redundant by using multiple servers to receive the notifications.

Which set of actions meets these requirements?

- A. Configure an SNMP policy with community policies in the Tenant section of the common tenant. Link the SNMP policy to the common tenant in the Monitoring Policies section under the Fabric tab.
- B. Configure an SNMP Monitoring Destination Group. Define an SNMP source by using the previously defined group in the Access Policies section under the Fabric tab.
- C. Define an SNMP policy with community policies in the Fabric Policies section under the Fabric tab. Implement an SNMP Client Group Profile.
- **D. Implement an SNMP Monitoring Destination Group. Associate the SNMP policy to the desired pod in the Pod Policies section under the Fabric tab.**

**Answer: D**

Explanation:

Define snmp destination groups under admin tab, and then go to fabric policies tab and create snmp policy and attach it to pod policy group.

**NEW QUESTION # 363**

Refer to the exhibit.

**Create Subnet**

Gateway IP: 10.1.1.1/24  
address/mask

Treat as virtual IP address:

Make this IP address primary:

Scope:  Private to VRF  
 Advertised Externally  
 Shared between VRFs

Description: optional

Subnet Control:  No Default SVI Gateway  
 Querier IP

L3 Out for Route Profile: select a value

Route Profile: select a value

ND RA Prefix policy: select a value

**CISCO**

Cancel Submit

Refer to the exhibit. An engineer configures communication between the EPGs in different tenants. Which action should be taken to create the subnet?

- A. Change Scope to Shared between VRFs.
- B. Change Scope to Advertised Externally.
- C. Leave Scope set to Private to VRF.
- D. Add the L3Out for Route Profile value.

**Answer: A**

Explanation:

To configure communication between the EPGs in different tenants, the subnet scope should be set to "Shared between VRFs". This allows the subnet to be shared across different VRFs, enabling communication between EPGs that are in different tenants but within the same VRF. By marking the subnet as shared, it becomes visible to other VRFs, which is necessary for inter-tenant communication.

Reference:

Learning ACI - Part 12: Inter-VRF and Inter-Tenant Communication

**NEW QUESTION # 364**

A Cisco ACI fabric is integrated with a Cisco ASA firewall using a service graph under the tenant called Operations. The fabric must permit the firewall used on tenant Operations to be referenced by the tenant called Management. Which export action must be used to accomplish this goal?

- A. router configurations
- B. service graph template
- C. Layer4-Layer7 device
- D. device selection policies

**Answer: C**

Explanation:

L4-L7 device can't be referenced from other tenants. If you want to share an L4-L7 device with other tenants, you need to export the L4-L7 device to other tenants. It will appear as an imported device in the other tenants.

### NEW QUESTION # 365

The existing network and ACI fabric have been connected to support workload migration. Servers will physically terminate at the Cisco ACI, but their gateway must stay in the existing network. The solution needs to adhere to Cisco's best practices. The engineer started configuring the relevant Bridge Domain and needs to complete the configuration. Which group of settings are required to meet these requirements?

- A. L2 Unknown Unicast: Flood  
L3 Unknown Multicast Flooding: Flood  
Multi Destination Flooding: Flood in BD  
ARP Flooding: Enable
- B. L2 Unknown Unicast: Hardware Proxy  
L3 Unknown Multicast Flooding: Flood  
Multi Destination Flooding: Flood in BD  
ARP Flooding: Enable
- C. L2 Unknown Unicast: Flood  
L3 Unknown Multicast Flooding: Optimize Flood  
Multi Destination Flooding: Flood in BD  
ARP Flooding: Disable
- D. L2 Unknown Unicast: Hardware Proxy  
L3 Unknown Multicast Flooding: Optimize Flood  
Multi Destination Flooding: Flood in BD  
ARP Flooding: Disable

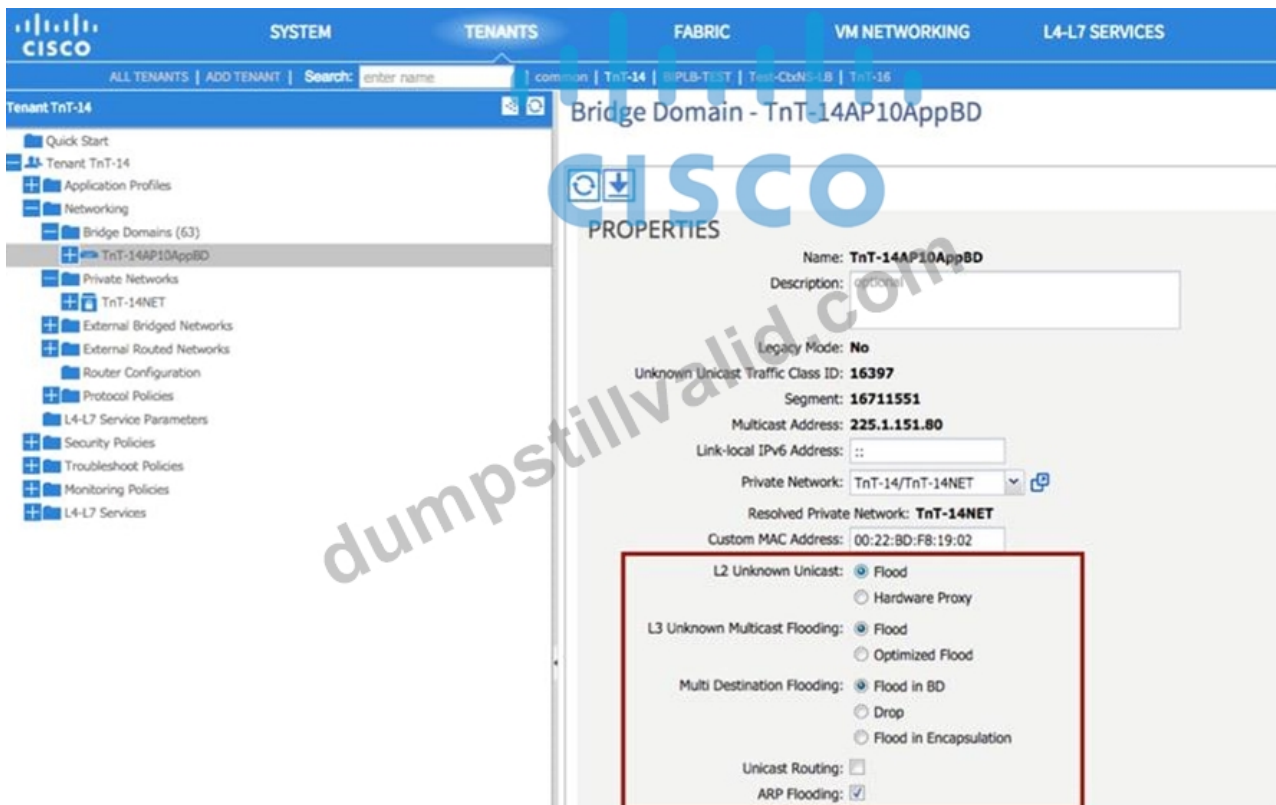

**Answer: A**

Explanation:

[https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/migration\\_guides/migrating\\_existing\\_networks\\_to\\_aci.html](https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/migration_guides/migrating_existing_networks_to_aci.html)

#### Default Gateway Migration Considerations

The default gateway used by the workloads to establish communication outside their IP subnet is initially maintained in the Brownfield network; this implies that the ACI fabric initially provides only Layer 2 services for devices part of EPG1, and the workloads already migrated to the ACI fabric send traffic to the Brownfield network when they need to communicate with devices external to their IP subnet (shown in the following diagram).

### NEW QUESTION # 366

An application team tells the Cisco ACI network administrator that it wants to monitor the statistics of the unicast and BUM traffic that are seen in a certain EPG. Which statement describes the collection statistics?

- A. The collection of statistics is enabled on the EPG level by enabling the statistics for unicast and BUM traffic.
- B. All EPGs in the Cisco ACI tenant object must be enabled for statistics to be collected.
- C. EPG statistics can be collected only for VMM domains. If a physical domain exists, statistics are not collected.
- D. Cisco ACI does not capture statistics at the EPG level. Only statistics that pass through ACI contracts can be monitored.

**Answer: A**

Explanation:

[https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/1-x/Operating\\_ACI/guide/b\\_Cisco\\_Operating\\_ACI\\_chapter\\_01011.html](https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/1-x/Operating_ACI/guide/b_Cisco_Operating_ACI_chapter_01011.html)

### EPG Level Statistics

The application owner would like to be able to monitor network-related information for their application, such as the aggregate amount of traffic to a specific tier. As an example, we will monitor the amount of traffic to the web tier of a given application. In this example, the default monitoring policies are appropriate, and they are simply extracting them from the system to be consumed externally. This information is useful in scenarios such as a new release being pushed, and to make sure that no traffic anomalies are created after the push.

### NEW QUESTION # 367

.....

It is not hard to know that Implementing Cisco Application Centric Infrastructure torrent prep is compiled by hundreds of industry experts based on the syllabus and development trends of industries that contain all the key points that may be involved in the examination. Therefore, with 300-620 exam questions, you no longer need to purchase any other review materials, and you also don't need to spend a lot of money on tutoring classes. At the same time, 300-620 Test Guide will provide you with very flexible learning time in order to help you pass the exam.
