

# High Pass-Rate WGU Health-Fitness-and-Wellness Latest Test Materials & The Best VerifiedDumps - Leading Provider in Qualification Exams

## **WGU C458 HEALTH FITNESS AND WELLNESS EXAM 2024/2025 ACTUAL EXAM 2 VERSIONS WITH COMPLETE QUESTIONS WITH DETAILED VERIFIED ANSWERS (100% CORRECT ANSWERS) /ALREADY GRADED A+**

Nutrition - Answerprovides the body with the nutrients it needs to perform its daily tasks

Undernutrition - Answerimplies that the individual is not getting enough nutrients. This can occur even if the person is consuming more than enough calories.

Malnutrition - Answeran imbalance of proper nutrients

Anorexia nervosa - Answerliterally means loss of appetite, but this is a misnomer: A person with this is hungry, but denies the hunger because of an irrational fear of becoming fat. Self-starvation, food preoccupation and rituals, compulsive exercising, and often an absence of menstrual cycles in women. Untreated, can be fatal.

Bulimia - Answercharacterized by recurring periods of binge eating, during which large amounts of food are consumed in a short period of time followed by purging (through self-induced vomiting, abuse of laxatives and/or diuretics) or periods of fasting

Binge eating disorder (BED) - Answerepisodes of binge eating characterized by eating rapidly, eating large amounts of food even when not feeling hungry, and feeling guilty or depressed after overeating.

Obesity - Answer15 to 20 percent above normal weight. Poor dietary patterns: include increased intake of sugars in sweetened soft drinks, foods, and meals of high energy, low nutrient density, and large portion sizes. At risk for serious health problems such as type 2 diabetes, hypertension, heart disease, stroke, and some types of cancer.

Minerals - Answerinorganic material. Form body parts (teeth and bones), maintain acid-base neutrality, regulate nerve impulses, osmotic pressure, and electrolyte balance

Major minerals - Answerneeded by the body:  
• calcium—milk, cheese, sardines, salmon, green vegetables  
• phosphorus—milk, cheese, lean meat  
• potassium—oranges, bananas, dried fruits  
• sulfur—eggs, poultry, fish  
• sodium—table salt, beef, eggs, cheese  
• chloride—table salt, meat

Perhaps you worry about the quality of our Health-Fitness-and-Wellness exam questions. We can make solemn commitment that our Health-Fitness-and-Wellness study materials have no mistakes. All contents are passing rigid inspection. You will never find small mistakes such as spelling mistakes and typographical errors in our Health-Fitness-and-Wellness learning guide. No one is willing to buy a defective product. And our Health-Fitness-and-Wellness practice braindumps are easy to understand for all the candidates.

This Health-Fitness-and-Wellness exam prep material has been prepared under the expert surveillance of 90,000 highly experienced IT professionals worldwide. This updated and highly reliable VerifiedDumps product consists of 3 prep formats: WGU Health, Fitness, and Wellness (HIO1) (Health-Fitness-and-Wellness) dumps PDF, desktop practice exam software, and browser-based mock exam. Each format specializes in a specific study style and offers unique benefits, each of which is crucial to good WGU Health, Fitness, and Wellness (HIO1) (Health-Fitness-and-Wellness) exam preparation. The specs of each WGU Health-Fitness-and-Wellness exam questions format are listed below, you may select any of them as per your requirements.

**Get Real And Easy-to-Use WGU Health-Fitness-and-Wellness Dumps PDF**

## Format

To pass the WGU Health-Fitness-and-Wellness exam on the first try, candidates need WGU Health, Fitness, and Wellness (HIO1) updated practice material. Preparing with real Health-Fitness-and-Wellness exam questions is one of the finest strategies for cracking the exam in one go. Students who study with WGU Health-Fitness-and-Wellness Real Questions are more prepared for the exam, increasing their chances of succeeding. Finding original and latest Health-Fitness-and-Wellness exam questions however, is a difficult process. Candidates require assistance finding the Health-Fitness-and-Wellness updated questions.

## WGU Health, Fitness, and Wellness (HIO1) Sample Questions (Q41-Q46):

### NEW QUESTION # 41

Why is it important to include low-fat dairy products in a balanced diet?

- A. They are good sources of calcium and protein, which are needed for bone and tissue growth.
- B. They provide thiamin, which is necessary for carbohydrate metabolism
- C. They provide glucose, which is the only source of energy used by the brain.
- D. They are good sources of iron, which increases the absorption of fat into the red blood cells.

### Answer: A

Explanation:

Low-fat dairy products are emphasized in many balanced-diet frameworks because they provide key nutrients—especially calcium and protein—while helping limit excess saturated fat. Calcium is essential for building and maintaining strong bones and teeth, supporting normal muscle contraction, nerve signaling, and blood clotting. Adequate calcium intake across the lifespan helps reduce the risk of bone thinning with age.

Protein supports tissue growth and repair, immune function, and the maintenance of lean body mass, which is important for metabolic health and physical performance.

Many low-fat dairy options (like low-fat milk, yogurt, and reduced-fat cheese) also contribute vitamin D when fortified, which assists calcium absorption and supports bone health. Yogurt can additionally support gut health when it contains live cultures. Choosing low-fat versions can be helpful because saturated fat intake is commonly advised to be moderate; low-fat dairy helps individuals meet calcium and protein goals without pushing saturated fat too high.

The incorrect choices contain misleading or false nutrition statements. While dairy can contain small amounts of thiamin, it is not typically highlighted as the main reason for dairy inclusion. Dairy is not a major source of iron, and the statement about iron increasing absorption of fat into red blood cells is inaccurate. Finally, dairy does contain carbohydrates (lactose), but glucose is not the only fuel the brain can use; the brain can also use ketones during certain metabolic states. The strongest, most document-consistent rationale is that low-fat dairy provides calcium and protein that support bone and tissue health.

### NEW QUESTION # 42

A 26-year-old individual has been experiencing fever, headache, and neck stiffness. Which main condition could this individual have developed?

- A. Asthma
- B. Meningitis
- C. Hepatitis
- D. Ulcer

### Answer: B

Explanation:

Fever, headache, and neck stiffness are classic warning signs associated with meningitis, an inflammation of the meninges—the protective membranes covering the brain and spinal cord. This symptom combination is considered medically significant because meningitis can develop quickly and may become life-threatening without prompt evaluation and treatment. In many health education materials, the "triad" of fever + severe headache + stiff neck is strongly linked to meningitis, sometimes accompanied by sensitivity to light (photophobia), nausea/vomiting, confusion, or a rash (more common in certain bacterial types).

Meningitis can be caused by viruses (often milder and self-limited) or bacteria (more severe and requiring urgent antibiotics). Because bacterial meningitis can progress rapidly, the correct health and wellness guidance is to seek immediate medical care when these symptoms appear together—especially if symptoms are sudden, intense, or worsening.

The other options do not best match the symptom pattern. Hepatitis primarily affects the liver and is more commonly associated with fatigue, abdominal pain, nausea, dark urine, and jaundice rather than neck stiffness. An ulcer (stomach or duodenal) usually causes burning abdominal pain, indigestion, or nausea, not stiff neck and fever as key features. Asthma is a respiratory condition.

characterized by wheezing, chest tightness, coughing, and shortness of breath; it does not typically present with neck stiffness and fever.

From a wellness education perspective, prevention strategies include vaccination where appropriate (e.g., meningococcal vaccines), practicing good hygiene to reduce spread of infections, and understanding when symptoms require urgent medical attention. Recognizing meningitis symptoms early is crucial because timely assessment and treatment can significantly improve outcomes.

#### NEW QUESTION # 43

What is a dimension of social health?

- A. Focusing efforts on workplace success
- B. Completing an undergraduate degree
- C. Seeking physical wellness
- D. **Developing interpersonal relationships**

**Answer: D**

Explanation:

A core dimension of social health is developing interpersonal relationships. Social health refers to how well a person connects with others, communicates, builds trust, resolves conflict, and maintains supportive networks. Healthy interpersonal relationships can include friendships, family connections, teammates, classmates, mentors, and community groups. Strong social ties are linked with better coping during stress, greater belonging, and improved overall well-being.

In Social and Emotional Learning (SEL), developing interpersonal relationships involves skills such as empathy, active listening, respectful communication, cooperation, and setting healthy boundaries. It also includes the ability to seek help when needed and to offer support to others appropriately. Social health is not simply "being popular"; it is about building relationships that are respectful, safe, and mutually supportive.

The other options are not direct dimensions of social health. Seeking physical wellness relates primarily to physical health behaviors (activity, sleep, hygiene, medical care). Completing an undergraduate degree is an educational achievement, which may influence social opportunities but is not itself a dimension of social health. Focusing efforts on workplace success relates to career development and achievement; it can involve social skills, but it is not the definition of social health.

Social health matters in daily life because relationships influence choices and habits: friends and family can encourage healthy behaviors, provide emotional support, and help a person feel connected. In wellness education, students are often encouraged to practice communication skills, conflict resolution, and community involvement because these strengthen social health and contribute to healthier emotional functioning.

#### NEW QUESTION # 44

A 75-year-old individual has sudden symptoms of numbness in one arm, difficulty speaking, and blurred vision. Which condition causes these symptoms?

- A. Epilepsy
- B. Heart attack
- C. Metabolic syndrome
- D. **Stroke**

**Answer: D**

Explanation:

A stroke occurs when blood flow to part of the brain is suddenly blocked (ischemic stroke) or a blood vessel in the brain ruptures (hemorrhagic stroke). Because brain tissue depends on a constant supply of oxygen and nutrients, even a brief interruption can cause rapid loss of function in the area of the brain that controls speech, movement, or vision. That is why stroke symptoms often appear suddenly and may affect only one side of the body.

The symptoms described—numbness in one arm, difficulty speaking, and blurred vision—are well-known warning signs of stroke. Many health education resources teach the FAST or BE FAST approach: facial drooping, arm weakness/numbness, speech difficulty, and urgency of time; vision changes are also commonly included as stroke warning signs. These symptoms reflect brain involvement rather than a problem starting in the heart or digestive system.

The other options do not match as closely. A heart attack typically causes chest pressure/pain, shortness of breath, sweating, and sometimes arm or jaw pain—but it does not usually present with sudden one-sided numbness, speech disturbance, and vision changes as the main features. Metabolic syndrome is a long-term cluster of risk factors (such as abdominal obesity, high blood pressure, abnormal cholesterol, and insulin resistance), not a sudden neurological event. Epilepsy can cause seizures, confusion, or loss of consciousness, but the specific combination of one-sided numbness with speech and vision changes is more characteristic of stroke.

From a wellness perspective, this question reinforces two essentials: (1) recognition of stroke signs, and (2) immediate action, because rapid treatment can reduce brain damage and improve outcomes. If these symptoms occur, emergency services should be contacted urgently.

#### **NEW QUESTION # 45**

A sedentary individual is encouraged by a physician to increase physical activity to 30 minutes at least three times per week. What will be the first noticeable health benefit of this regimen?

- A. Reduced risk of chronic disease
- B. Increased total cholesterol
- C. Decreased sleep
- D. Elevated mood

**Answer: D**

Explanation:

When a sedentary person begins exercising for 30 minutes at least three times per week, one of the earliest and most noticeable benefits is often an improvement in mood. Physical activity can produce near-term changes in brain chemistry and stress regulation—many people report feeling calmer, more positive, and less tense after even a single session. Public health guidance notes that some brain-related benefits of physical activity can happen immediately after a bout of moderate-to-vigorous activity, including reduced short-term feelings of anxiety.

This quick mood shift is tied to mechanisms emphasized in many fitness and wellness resources: exercise helps lower stress hormones and supports the release of "feel-good" neurochemicals (commonly discussed as endorphins), improving emotional state and helping with mild symptoms of stress or low mood. Mayo Clinic also highlights mood improvement as a key benefit of exercising several times per week.

The other answer choices are less appropriate as "first noticeable" benefits. Exercise does not cause "increased total cholesterol" as a desirable early outcome; over time, regular physical activity is more associated with healthier lipid patterns. "Reduced risk of chronic disease" is a real and important benefit, but it usually becomes measurable over weeks to months of consistency (and is not typically the first thing someone notices day-to-day). Finally, "decreased sleep" is not a typical health benefit—regular activity more commonly supports better sleep quality over time, not worse sleep.

In practical terms, early mood benefits can help build adherence: noticing you feel better after workouts makes it easier to maintain the routine long enough to earn the longer-term gains like improved fitness, blood pressure control, and reduced chronic disease risk.

#### **NEW QUESTION # 46**

.....

Our Health-Fitness-and-Wellness study guide design three different versions for all customers. These three different versions of our Health-Fitness-and-Wellness exam questions include PDF version, software version and online version, they can help customers solve any problems in use, meet all their needs. Although the three major versions of our Health-Fitness-and-Wellness Exam Torrent provide a demo of the same content for all customers, they will meet different unique requirements from a variety of users based on specific functionality. The most important feature of the online version of our Health-Fitness-and-Wellness learning materials are practicality.

**Health-Fitness-and-Wellness Valid Test Online:** <https://www.verifieddumps.com/Health-Fitness-and-Wellness-valid-exam-braindumps.html>

When you visit our site, you will find three different modes of Health-Fitness-and-Wellness sure practice dumps which can meet different people's need, Passing the WGU Health-Fitness-and-Wellness exam is very important for you to choose a good job, If you are still not sure you can pass exams certainly you had better look for valid Health-Fitness-and-Wellness latest dumps, Trust me, our Health-Fitness-and-Wellness test dumps will be helpful for your career.

Creating a Sample Project, There's the project to build a highway, When you visit our site, you will find three different modes of Health-Fitness-and-Wellness sure practice dumps which can meet different people's need.
