CompTIA FC0-U71 Exam Syllabus Topics:

Topic	Details
Topic 1	• Software Development Concepts: This section of the exam measures the skills of Junior Software Developers and introduces foundational knowledge of programming logic, data structures, and the software development life cycle. It includes awareness of coding concepts, algorithm basics, and scripting used in automated and task-based environments.
Topic 2	• Applications and Software: This section of the exam measures the skills of Entry-Level Technical Analysts and covers commonly used software applications and their purposes. It involves understanding operating systems, mobile and desktop software, and the basics of software installation and configuration. This domain also touches on licensing and application support tools.
Topic 3	• IT Concepts and Terminology: This section of the exam measures skills of aspiring IT Support Assistants and covers foundational knowledge such as types of computing devices, basic troubleshooting concepts, and understanding of common terminology. Candidates should grasp basic operational terms, roles of software and hardware, and be familiar with emerging tech like IoT and cloud computing.

Topic 4	• Data and Database Fundamentals: This section of the exam measures the skills of Entry-Level Data Assistants and covers data management principles, types of data, and basic database structures. It includes an understanding of database types, simple queries, data integrity, and the importance of data in decision-making and business operations.
Topic 5	• Infrastructure: This section of the exam measures skills of Network Support Trainees and covers essential knowledge of device setup, networking concepts, and physical and wireless connectivity. It includes an understanding of IP addressing, cables, ports, and basic infrastructure components like routers and switches necessary for setting up secure, functional networks.

CompTIA Tech+ Certification Exam Sample Questions (Q104-Q109):

NEW QUESTION # 104
A user has concerns about device theft because they are working on a laptop at a local coffee shop. Which of the following physical devices would be best to protect the laptop?

- A. Firewall
- B. Privacy shield
- C. USB lock
- D. Cable lock

Answer: D

Explanation:
A cable lock physically secures a laptop to a stationary object, helping to prevent theft in public spaces like coffee shops.
Other options:
*Firewall protects against network threats,
*Privacy shield prevents screen snooping,
*USB lock restricts port access but doesn't prevent theft.

NEW QUESTION # 105
A user's device is experiencing slow processing performance when multiple applications are running at the same time. Which of the following components is causing this issue?

- A. RAM
- B. Motherboard
- C. Storage
- D. NIC

Answer: A

Explanation:
RAM (Random Access Memory) is responsible for temporarily storing data for running applications. When multiple applications run simultaneously and RAM is insufficient, the system slows down due to excessive paging or swapping.
Other options:
*Storage affects data retrieval speed but less directly impacts multitasking performance,
*Motherboard connects components but isn't usually the cause of slow processing itself,
*NIC handles network connections, unrelated to processing speed.

NEW QUESTION # 106
Which of the following is reset when a workstation is turned off?

- A. RAM
- B. BIOS
- C. NIC
- D. CPU

Answer: A

Explanation:
RAM (Random Access Memory) is volatile memory, meaning it loses all stored data when power is turned off.
BIOS, NIC, and CPU retain their configurations or functions independently of power state.

NEW QUESTION # 107

A web page is displaying outdated credentials when a user enters information in an online form. Which of the following actions should the user complete first to fix the issue?

- A. Change the user profile
- B. Clear the cache
- C. Turn off pop-up blockers
- D. Remove add-ons

Answer: B

Explanation:
Web browsers store cached data to improve loading speeds and remember form inputs. If outdated credentials are appearing, clearing the cache ensures that old stored data is removed and the page loads fresh content.
"Cached data can include stored form data, which may result in outdated information being auto-filled. Clearing the browser cache resolves this." - CompTIA ITF+ Official Curriculum Correct answer: C

NEW QUESTION # 108

A user logs in with the same credentials across multiple websites. Which of the following password policies would most likely prevent this practice?

- A. Privacy
- B. Complexity
- C. Length
- D. Reuse

Answer: D

Explanation:
A password reuse policy prevents users from using the same password across multiple platforms or reusing previously used passwords. This is a best practice to reduce the risk of credential stuffing attacks.
"Password reuse policies help ensure users do not reuse old or existing passwords across multiple platforms, reducing exposure from compromised accounts." - CompTIA ITF+ Security Objectives Correct answer: A
