

Salesforce Salesforce-Certified-Administrator Bootcamp | Salesforce-Certified-Administrator PDF Dumps Free Download

DOWNLOAD the newest ActualCollection Salesforce-Certified-Administrator PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1uLYUNqAW5Ddi1eIXeTKoTZnwhEZgnKi6>

The Salesforce Salesforce-Certified-Administrator practice exam material is available in three different formats i.e Salesforce Salesforce-Certified-Administrator dumps PDF format, web-based practice test software, and desktop Salesforce-Certified-Administrator practice exam software. PDF format is pretty much easy to use for the ones who always have their smart devices and love to prepare for Salesforce-Certified-Administrator Exam from them. Applicants can also make notes of printed Salesforce Certified Administrator (Salesforce-Certified-Administrator) exam material so they can use it anywhere in order to pass Salesforce Salesforce-Certified-Administrator Certification with a good score.

Salesforce is a leading customer relationship management (CRM) platform that is widely used across different industries. The Salesforce platform offers a wide range of tools and features that enable businesses to improve their sales, marketing, and customer service efforts. The Salesforce Certified Administrator (SCA) credential is designed for professionals who work with the Salesforce platform and want to demonstrate their expertise and knowledge of Salesforce administration.

Salesforce-Certified-Administrator exam is a comprehensive test that covers a wide range of topics related to Salesforce administration. It tests the candidate's knowledge and skills in areas such as user management, security and access, customization, data management, and analytics. Salesforce-Certified-Administrator Exam is designed to ensure that the candidate has a thorough understanding of the Salesforce platform and is capable of handling various administrative tasks.

Salesforce Certified Administrator certification exam is an essential certification for individuals who work with Salesforce applications. It validates the knowledge and skills needed to manage and maintain Salesforce implementations effectively. Holding the certification can lead to better career prospects and higher salaries, making it a valuable investment for anyone looking to advance their career in the Salesforce ecosystem.

Salesforce Certified Administrator Sample Questions (Q205-Q210):

NEW QUESTION # 205

An administrator at Northern Trail Outfitters is creating a validation rule.

Which two functions should the administrator use when creating a validation rule?

Choose 2 answers

- A. Formula return type
- **B. Error message location**
- **C. Error condition formula**
- D. Rule active date

Answer: B,C

Explanation:

Explanation

Two functions that an administrator should use when creating a validation rule are:

Error condition formula, which defines when an error should occur based on record fields and values Error message location, which specifies where on the page layout an error message should appear when triggered by an error condition formula Formula return type and rule active date are not functions used for validation rules. NEW QUESTION # 206

An administrator has been asked to update a flow that was created as part of a recent update. When the administrator opens the flow for editing, the Flow toolbox offers only four elements: Assignment, Decision, Get Records, and Loop.

What would cause this?

- A. The version of the flow is inactive.
- B. The version of the flow is activated.
- C. The flow is a screen flow.
- **D. The flow is a before save flow.**

Answer: D

Explanation:

Explanation

Before save flows only support four elements: Assignment, Decision, Get Records, and Loop.

NEW QUESTION # 207

The IT manager at universal Containers is doing an audit of the systems security.

How should the administrator provide a summary of the org's security health?

- A. Change the Organization-Wide Default to private to restrict visibility.
- **B. Run a Health Check to identify vulnerabilities.**
- C. Turn on Event Monitoring to track user events.
- D. Download the last six months of user login data.

Answer: B

Explanation:

Explanation

To provide a summary of org's security health, an administrator should run a Health Check that compares org's settings against baseline settings defined by Salesforce Security Baseline Standard or industry standards such as CIS (Center for Internet Security)

Benchmark Standard. Health Check generates an overall health score based on how org's settings match with baseline settings for various security categories such as Password Policies, Network Access, Session Settings etc. Health Check also provides recommendations for improving org's security health score by adjusting settings that do not match with baseline settings. Changing Org-Wide Default to private, turning on Event Monitoring, or downloading user login data will not provide a summary of org's security health. References:

https://help.salesforce.com/s/articleView?id=sf.security_health_check.htm&type=5

NEW QUESTION # 208

An administrator is building a Lightning app and sees a message that a My Domain must be set up first. What should the administrator take into consideration when enabling My Domain?

- A. Single sign-on must be disabled prior to implementing My Domain.
- B. The URL instance for a My Domain stays the same for every release
- C. A deployed My Domain is irreversible and renaming is unavailable.
- **D. The login for all internal and external users changes to the My Domain login**

Answer: D

Explanation:

Explanation

My Domain is a feature that allows administrators to create a custom domain name for their Salesforce org that replaces their instance URL (such as na35.salesforce.com). My Domain provides benefits such as improved security; enhanced branding; faster navigation; access to Lightning components; etc. However, one of the considerations when enabling My Domain is that it changes how users log in to Salesforce - instead of using their instance URL login (such as login.salesforce.com), they have to use their My Domain login (such as mydomain.my.salesforce.com). This applies to all internal and external users who access Salesforce via web browser or mobile app. References:

https://help.salesforce.com/s/articleView?id=sf.domain_name_overview.htm&type=5

NEW QUESTION # 209

Ursa Major classifies its accounts as Silver, Gold, or Platinum Level. When a new case is created for a Silver or Gold partner, it should go to the Regular Support Queue. When an account is Platinum Level, it should automatically go to the Priority Support Queue. What should the administrator use to achieve this?

- A. Escalation Rules
- B. Workflow Rules
- **C. Assignment Rules**
- D. Case Rules

Answer: C

Explanation:

Explanation

Assignment rules are tools that allow administrators to automatically route records to users or queues based on certain criteria. For example, an assignment rule can assign cases to different queues based on case priority, origin, type, or other fields. Assignment rules can be triggered when records are created manually, via email, web, or API. Assignment rules consist of multiple rule entries that define the criteria and actions for each assignment scenario. References:
