

Online F5CAB4 Version, Valid F5CAB4 Exam Test

If you want to check the quality and validity of our F5 F5CAB4 exam questions, then you can click on the free demos on the website. The free demo has three versions. We only send you the PDF version of the F5 F5CAB4 study questions. We have shown the rest two versions on our website.

F5 F5CAB4 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Explain authentication methods: This section focuses on user management including creating• modifying users, configuring remote authentication providers, and implementing group-based access control.
Topic 2	<ul style="list-style-type: none">• Identify configured system services: This domain covers verifying proper configuration of essential services including DNS, NTP, SNMP, and syslog.
Topic 3	<ul style="list-style-type: none">• Apply procedural concepts required to create, manage, and restore a UCS archive: This domain covers UCS backup and restore procedures, understanding backup use cases, proper storage practices, and UCS file contents including private keys.
Topic 4	<ul style="list-style-type: none">• Given a scenario, interpret Service status: This section teaches interpreting service states, analyzing netstat output, and determining whether services are listening on specific ports.
Topic 5	<ul style="list-style-type: none">• Given a scenario, determine device upgrade eligibility: This domain covers determining appropriate timing for software and platform upgrades and strategies to minimize downtime during upgrades.
Topic 6	<ul style="list-style-type: none">• Identify and report current device status: This domain covers monitoring BIG-IP operational status through LCD panels, dashboards, Network Map, GUI• TMSH commands, and checking high availability states.
Topic 7	<ul style="list-style-type: none">• Apply procedural concepts required to manage the state of a high availability pair: This domain covers controlling and monitoring failover states in high availability pairs, including forcing standby• offline modes, reporting failover status, and verifying device trust.

Valid F5CAB4 Exam Test | Vce F5CAB4 Exam

You can free download part of TestPDF's exercises and answers about F5 certification F5CAB4 exam as a try, then you will be more confident to choose our TestPDF's products to prepare your F5 Certification F5CAB4 Exam. Please add TestPDF's products in your cart quickly.

F5 BIG-IP Administration Control Plane Administration Sample Questions (Q37-Q42):

NEW QUESTION # 37

The BIG-IP appliance fails to boot. The BIG-IP Administrator needs to run the End User Diagnostics (EUD) utility to collect data to send to F5 Support. Where can the BIG-IP Administrator access this utility?

- A. External VLAN interface
- **B. Console Port**
- C. Internal VLAN interface
- D. Management Port

Answer: B

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: The EUD is a 33hardware-level diagnostic tool that runs outside of the TMOS operating system. Because it is used when the system cannot boot or is in a pre-boot state, it cannot be accessed via the GUI or management network. The administrator must connect physically via the serial Console Port to interact with the boot menu and initiate the hardware tests.

NEW QUESTION # 38

A BIG-IP Administrator is conducting maintenance on one BIG-IP appliance in an HA Pair. Why should the BIG-IP Administrator put the appliance into FORCED_OFFLINE state?

- A. To preserve existing connections to Virtual Servers and reduce the CPU load
- **B. To terminate existing connections to Virtual Servers and prevent the appliance from becoming active**
- C. To allow new connections to Virtual Servers and ensure the appliance becomes active
- D. To terminate connections to the management IP and decrease persistent connections

Answer: B

Explanation:

Comprehensive and Detailed Explanation From BIG-IP Administration Control Plane Administration documents: Placing a device in the FORCED_OFFLINE state is a critical procedural concept for HA maintenance111213. 1415Unlike simply being 'Standby16', the FORCED_OFFLINE state ensures that17t the Control Plane will not participate in failover selection, effectively preventing the device from becoming 'Active' even if the peer fails18. This state also allows the administrator to terminate existing connections to ensure no traffic is being processed during the maintenance window19.

NEW QUESTION # 39

A BIG-IP Administrator plans to resolve a non-critical issue with a BIG-IP device in 2 weeks. What Severity level should be assigned to this type of F5 support ticket?

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

F5 Support uses a specific scale to categorize the urgency of technical issues, which helps the Control Plane management team prioritize resources effectively.

- * Severity 1 (Critical): Used for emergency situations where a production site is completely down, or there is a critical impact on business operations with no workaround available.
- * Severity 2 (High): Assigned when a system is severely degraded, or a primary function is significantly impacted, but the site remains operational in a degraded state.
- * Severity 3 (Medium): Applicable for issues where there is a partial loss of non-critical functionality, or the system is failing intermittently but the core business is not currently impacted.
- * Severity 4 (Low): This is the appropriate level for non-critical issues, general "how-to" questions, or maintenance planning. Since the administrator plans to resolve this issue in two weeks, it falls under the category of a low-priority maintenance task that does not require an immediate response from F5 support.

NEW QUESTION # 40

A BIG-IP Administrator wants to allow management access only from a specific subnet. Where should this be configured?

- **A. System > Platform**
- B. System > Users
- C. Network > Routes
- D. Network > Self IPs (Port Lockdown)

Answer: A

Explanation:

Management access security is a primary Control Plane configuration task³.

* Management Interface Security: The BIG-IP system provides a dedicated management port that is separate from the TMM (Traffic Management Microkernel) data interfaces⁴⁴⁴⁴.

* System Platform Settings: Under the System > Platform section of the Configuration Utility, an administrator can define specific IP addresses or subnets that are permitted to access the device via SSH or HTTPS (the GUI).

* Port Lockdown Difference: While "Port Lockdown" settings under Network > Self IPs control access to the device through self-IP addresses on data VLANs, they do not manage the security of the dedicated management port .

* Access Control Lists: For robust security, F5 recommends using the "IP Allow" or "httpd Allow" lists found in the platform settings to prevent malicious brute-force attempts or unauthorized access from non-management networks .

NEW QUESTION # 41

A BIG-IP Administrator needs to determine who changed a Virtual Server configuration. In which log file would the BIG-IP Administrator find this data? (Choose one answer)

- **A. /var/log/audit**
- B. /var/log/secure
- C. /var/log/ltn

Answer: A

Explanation:

The audit log (/var/log/audit) records configuration changes made on the BIG-IP system, including:

- * Who made the change (user account)
- * What was changed (for example, a virtual server modification)
- * When the change occurred
- * How it was performed (GUI, TMSH, or API)

Why the other options are incorrect:

- * /var/log/secure logs authentication events such as login successes and failures, not configuration changes.
 - * /var/log/ltn logs traffic-management and runtime LTM events, not administrative configuration modifications.
- Therefore, the correct log file for tracking who changed a virtual server is /var/log/audit.

NEW QUESTION # 42

.....

By browsing this website, all there versions of F5CAB4 practice materials can be chosen according to your taste or preference. In addition, we provide free updates to users for one year long. If the user finds anything unclear in the F5CAB4 practice materials

exam, we will send email to fix it, and our team will answer all of your questions related to the F5CAB4 practice materials. If the user fails in the F5CAB4 practice exam for any reason, we will refund the money after this process. We promise that you can get through the challenge within a week.
