

SAP C_ACDET_2506 Valid Exam Vce | C_ACDET_2506 Latest Practice Materials

You are lucky to be here with our C_ACDET_2506 training materials for we are the exact vendor who devote ourselves to produce the best C_ACDET_2506 exam questions and helping our customers successfully get their dreaming certification of C_ACDET_2506 Real Exam. We own the first-class team of professional experts and customers' servers concentrating on the improvement of our C_ACDET_2506 study guide. So your success is guaranteed.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	<ul style="list-style-type: none">Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 3	<ul style="list-style-type: none">Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

C_ACDET_2506 Latest Practice Materials & Trustworthy C_ACDET_2506 Exam Content

Once you have used our C_ACDET_2506 exam training in a network environment, you no longer need an internet connection the next time you use it, and you can choose to use C_ACDET_2506 exam training at your own right. Our C_ACDET_2506 Exam Training do not limit the equipment, do not worry about the network, this will reduce you many learning obstacles, as long as you want to use C_ACDET_2506 test guide, you can enter the learning state.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q47-Q52):

NEW QUESTION # 47

While working on a customer project, the customer asks if specific details can be captured and made available in reporting for a sourcing project or contract that doesn't fit the standard fields. What is the recommended way to handle this scenario?

- A. Configure as many custom fields as possible for data capture purposes.
- B. Create a Microsoft Form from the Actions menu for managing all the requirements.
- C. Suggest the customer put a Word document on the template and capture all information in that document.
- D. Create a dynamic form (dform) where common data can be synced with the project header through customization.

Answer: A

Explanation:

The recommended approach is to configure custom fields for capturing non-standard data in sourcing projects or contracts. Custom fields allow structured data capture directly within SAP Ariba, which can then be fully included in reporting and analytics. Documents like Word files (A) are unstructured and not reportable. Dynamic forms synced with project headers (B) are not supported as standard functionality. External tools like Microsoft Forms (C) do not integrate with SAP Ariba's reporting capabilities. Custom fields can include picklists, validation rules, translations, and help tips, enabling flexible, maintainable data collection aligned with reporting and compliance needs.

NEW QUESTION # 48

Which document must be returned to SAP before a Deployment Lead can be assigned to the project?

- A. Delivery Engagement Readiness Checklist
- B. Deployment Overview
- C. Solution Design Matrix
- D. Enablement Workbook

Answer: A

Explanation:

The Delivery Engagement Readiness Checklist is a critical gatekeeper document that confirms all prerequisites and readiness criteria have been met before SAP assigns a Deployment Lead to a project. This checklist ensures project scope, resourcing, access, and other foundational elements are in place to proceed.

Other documents like Deployment Overview and Enablement Workbook are informative or internal project management tools but do not formally trigger Deployment Lead assignment. The Solution Design Matrix is a design artifact and not a staffing gating document.

This process supports structured project governance and resource allocation within SAP.

NEW QUESTION # 49

Which of the following data elements must be manually loaded into the Production environment after full configuration migration is completed using the Intelligent Configuration Manager (ICM)? Note: There are 2 correct answers to this question.

- A. Relation and Relation Entries
- B. User to Group Mapping
- C. Enumerations
- D. Units of Measure

Answer: A,C

NEW QUESTION # 50

Which of the following accurately describes the migration of flex master data templates using the migration tool?

- A. Only the data of the flex master data templates is migrated; templates must be created manually.
- B. Neither the templates nor the data is migrated using the tool
- C. The templates are migrated by the tool, but the data must be loaded manually later.
- D. Both the templates and their data are fully migrated by the tool.

Answer: C

NEW QUESTION # 51

A French translation of a custom field label needs to be updated. Where do you update it?

- A. Field Configuration + Label
- B. Customization Manager - Views
- C. AML & Translations Upload
- D. Layout tab

Answer: C

Explanation:

SAP Ariba handles translations for custom field labels, help tips, and validation messages through the AML & Translations Upload mechanism. Administrators export the translation JSON or spreadsheet file, update the French (or other language) entries, and then re-import the updated file to apply translations.

Field Configuration + Label (C) sets the base language label but does not manage translations for other languages. The Customization Manager Views and Layout tabs are unrelated to translation management.

This method centralizes translation management and supports multiple languages consistently across the application.

NEW QUESTION # 52

.....

Services like quick downloading within five minutes, convenient and safe payment channels made for your convenience. Even newbies will be tricky about this process. Unlike product from stores, quick browse of our C_ACDET_2506 practice materials can give you the professional impression wholly. So, they are both efficient in practicing and downloading process. By the way, we also have free demo as freebies for your reference to make your purchase more effective.
