Actually, just think of our COBIT-2019 Test Prep as the best way to pass the exam is myopic. They can not only achieve this, but ingeniously help you remember more content at the same time.

ISACA COBIT 2019 Foundation Sample Questions (Q158-Q163):

NEW QUESTION # 158

Which of the following **MUST** be done before an enterprise can determine performance measures for a process improvement initiative?

- A. Conduct a capabilities assessment
- B. Perform a process risk assessment
- C. Calculate return on investment (ROI)

Answer: A

Explanation:

Conducting a capabilities assessment must be done before an enterprise can determine performance measures for a process improvement initiative. A capabilities assessment is a method of measuring and evaluating how well a process or activity is performed in terms of effectiveness, efficiency, completeness, reliability, etc. A capabilities assessment can be done using different models or frameworks, such as CMMI or ISO/IEC

15504. A capabilities assessment helps an enterprise to determine performance measures for a process improvement initiative by providing a baseline or benchmark for the current state of a process, as well as identifying its strengths, weaknesses, gaps, and improvement opportunities. 13 References: COBIT 2019 Framework: Introduction and Methodology , COBIT Process Assessment Model (PAM): Using COBIT 5

NEW QUESTION # 159

Which of the following BEST describes the "managed innovation" management objective of the COBIT core model?

- A. Optimize available IT capabilities to support the IT strategy and roadmap.
- B. Support the digital transformation strategy of the organization and deliver the desired value.
- C. Achieve competitive advantage, improve customer experience and improve operational effectiveness.

Answer: C

NEW QUESTION # 160

Which of the following is a common characteristic of process capability levels 2 to 5?

- A. The process's performance is monitored.
- B. The process's purpose is achieved.
- C. The process's description is well defined.

Answer: C

Explanation:

According to the COBIT 2019 Process Assessment Model, a common characteristic of process capability levels 2 to 5 is that the process's description is well-defined. This means that the process has a clear purpose, scope, inputs, outputs, activities, roles, responsibilities, interfaces, controls, measures, practices and procedures that are documented and maintained. A well-defined process enables consistent execution and improvement across the enterprise.2, p. 16 References: 2: COBIT 2019 Process Assessment Model: Using COBIT 2019

NEW QUESTION # 161

Which of the following is a KEY principle of an enterprise governance system?

- A. It should focus only on technology and information processing that takes place in cost centers
- B. It should focus on all technology and information processing, regardless of where processing takes place.
- C. It should focus only on technology and information processing that takes place within the IT function.

Answer: B

Explanation:

A key principle of an enterprise governance system is that it should focus on all technology and information processing, regardless of where processing takes place. This means that the governance system should cover not only the IT function, but also the business processes, functions, and units that use or rely on I&T. It also means that the governance system should address the external entities that provide or consume I&T services or data, such as customers, suppliers, partners, regulators, etc. COBIT adopts a holistic view of enterprise I&T that encompasses all internal and external stakeholders.14 References: COBIT 2019 Framework: Introduction and Methodology, COBIT 2019 Framework: Governance System

NEW QUESTION # 162

Once IT governance is implemented, what is the NEXT phase in the life cycle of governance?
