Salesforce Certified Administrator Sample Questions (Q119-Q124):

NEW QUESTION # 119

Which objects can be customized for history tracking?

- A. Campaigns, Contracts, Custom Objects, and Solutions
- **B. Cases, Leads, Solutions, Contracts, and Custom Objects**
- C. Opportunities, Leads, and Contracts
- D. Solutions, Cases, Leads and Opportunities

Answer: B

NEW QUESTION # 120

The IT manager at universal Containers is doing an audit of the systems security. How should the administrator provide a summary of the org's security health?

- A. Change the Organization-Wide Default to private to restrict visibility.
- **B. Run a Health Check to identify vulnerabilities.**
- C. Download the last six months of user login data.
- D. Turn on Event Monitoring to track user events.

Answer: B

Explanation:

Explanation

To provide a summary of org's security health, an administrator should run a Health Check that compares org's settings against baseline settings defined by Salesforce Security Baseline Standard or industry standards such as CIS (Center for Internet Security) Benchmark Standard. Health Check generates an overall health score based on how org's settings match with baseline settings for various security categories such as Password Policies, Network Access, Session Settings etc. Health Check also provides recommendations for improving org's security health score by adjusting settings that do not match with baseline settings. Changing Org-Wide Default to private, turning on Event Monitoring, or downloading user login data will not provide a summary of org's security health. References:
