Conduct effective penetration tests using 1Y0-205 Reliable Test Price

For easy use, ExamsReviews provides you with different version 1Y0-205 exam dumps. PDF version dumps are easy to read and reproduce the real exam. SOFT version dumps is a test engine which can measure what your preparations for the exam. If you want to know whether you prepare well for the 1Y0-205 test, you can take advantage of the SOFT version dumps to measure your ability. So you can quickly know your weaknesses and shortcomings, which is helpful to your further study.

Citrix Virtual Apps and Desktops Administration Sample Questions (Q62-Q67):

NEW QUESTION # 62

A Citrix Administrator is looking to provide apps and desktops to users. Project requirements dictate that management and maintenance should be minimized for the administrator, while still maintain control of the Virtual Delivery Agent (VDA machines). (Choose three.)

- A. Google Cloud Platform
- B. XenServer

- C. Amazon Web Services
- D. Nutanix Acropolis
- E. Microsoft Azure
- F. Microsoft HyperV

Answer: A,C,E

Explanation:

Using public cloud platforms such as AWS, GCP, or Azure with Citrix Cloud services minimizes infrastructure management and maintenance for the administrator, while still providing control over the VDA machines. The cloud provider handles most of the underlying infrastructure, reducing administrative overhead.

NEW QUESTION # 63

A Virtual Delivery Agent (VDA) is unable to register with the Delivery Controller. Which three factors could be causing this issue? (Choose three.)

- A. Incorrectly configured Citrix policy in Active Directory
- B. Improperly configured firewalls
- C. Incorrectly configured reverse DNS lookups in a forest
- D. Time differences between VDA-enabled machines and the Domain Controller
- E. Citrix ICA service NOT running

Answer: B,D,E

Explanation:

Improperly configured firewalls can block communication between the VDA and Delivery Controller.

Time differences greater than 5 minutes between the VDA and Domain Controller can prevent Kerberos authentication, leading to registration failure.

The Citrix ICA service (BrokerAgent) must be running for the VDA to register; if stopped, registration will fail.

NEW QUESTION # 64

Scenario: A Citrix Administrator needs to gather historical reporting statistics from the Virtual Delivery Agent (VDA) machines, as users are reporting latency and overall performance issues within their sessions. The administrator believes these issues are related to high CPU and memory usage. What can the administrator enable to gather this monitoring data from the VDA machines?

- A. Resource Monitoring HDX policy in Citrix Studio
- B. Trends > Sessions within Citrix Director
- C. Process Monitoring HDX policy in Citrix Studio
- D. Trends > Machine Usage within Citrix Director

Answer: A

Explanation:

Enabling the Resource Monitoring HDX policy allows collection of CPU and memory utilization data from VDA machines. This data is then sent to Citrix Director for historical reporting, helping administrators analyze performance issues such as latency caused by high resource usage.

NEW QUESTION # 65

A Citrix Administrator is tasked with configuring Autoscale in an on-prem Citrix Virtual Apps and Desktops environment. However, when launching Citrix Studio and locating the Delivery Group, the option to Manage Autoscale is missing. What must the administrator do to enable and configure Autoscale using a GUI interface?

- A. Use Citrix Web Studio instead of Citrix Studio
- B. use PowerShell to enable Autoscale
- C. Enable Autoscale using a GPO
- D. Enable Autoscale using a Citrix Policy

Answer: A

Explanation:

Autoscale management is only available through Citrix Web Studio, not the traditional Citrix Studio console. To enable and configure Autoscale with a GUI, the administrator must use Web Studio.

NEW QUESTION # 66

A user calls the help desk to report that when launching any application from within their published desktop session, it takes a long time and the overall performance is poor. Which Citrix Director report can a Citrix Administrator use to initiate the investigation of the issue?

- A. Launch Failures in Trends
- B. Load Evaluator in Trends
- C. Session Data in Filters
- D. Machine Utilization in Machine Details

Answer: C

Explanation:

The Session Data in Filters report in Citrix Director provides detailed performance metrics for individual user sessions, including logon duration, application launch times, and resource utilization. This report is the best starting point to investigate performance complaints within a published desktop session.

NEW QUESTION # 67

.....

The ExamsReviews Citrix 1Y0-205 exam questions is 100% verified and tested. ExamsReviews Citrix 1Y0-205 exam practice questions and answers is the practice test software. In ExamsReviews, you will find the best exam preparation material. The material including practice questions and answers. The information we have could give you the opportunity to practice issues, and ultimately achieve your goal that through Citrix 1Y0-205 Exam Certification.
