Real4dumps CrowdStrike CCFA-200b practice test includes the best learning materials, original questions, study guide, high quality test questions and test answers. You should be able to pass the exam standing on your head. Because Real4dumps CrowdStrike CCFA-200b braindump is the real stuff, 100% guarantee to pass the exam.

CrowdStrike Falcon Administrator Sample Questions (Q228-Q233):

NEW QUESTION # 228
The Customer ID (CID) is important in which of the following scenarios?

- A. When adding a user to the Falcon console under the Users application
- B. When performing a Host Search
- C. When performing the sensor installation process
- D. When setting up API keys

Answer: C

Explanation:
The Customer ID (CID) is important in which of the following scenarios: when performing the sensor installation process and when

setting up API keys. The CID is a unique identifier for your organization that is required for authenticating your sensor installation and communication with the Falcon cloud. You need to provide your CID when installing the Falcon sensor on a host, either by using a command-line parameter or by using the falconctl tool. The CID is also required for setting up API keys, which are used for accessing the Falcon platform programmatically via the Falcon APIs. You need to provide your CID when creating an API client and key in the API Clients and Keys page in the Falcon console.

NEW QUESTION # 229

You have a Windows host on your network in Reduced functionality mode (RFM). While the system is in RFM, which of the following is TRUE?

- A. Prevention patterns will not be triggered
- B. Event reporting will be unavailable
- C. System monitoring will be unavailable
- D. Some detection patterns and preventions will not be triggered

Answer: D

Explanation:
The option that is true when a Windows host is in Reduced Functionality Mode (RFM) is that some detection patterns and preventions will not be triggered. RFM is a mode that limits the sensor's functionality due to license expiration, network connectivity loss, or certificate validation failure. When a Windows sensor is in RFM, it will only provide basic prevention capabilities, such as blocking known malware hashes and preventing script execution from the %TEMP% directory.
The sensor will not send any telemetry or detection events to the Falcon platform, and will not receive any policy or update changes from the Falcon cloud. This means that some detection patterns and preventions that rely on telemetry, machine learning, or cloud analysis will not be triggered.

NEW QUESTION # 230

You are the Falcon Administrator for your organization, and you want to ensure you have accountability for the actions your Falcon users take.
What is the retention period of the audit logs within Falcon?

- A. One year
- B. 90 days
- C. 180 days
- D. 30 days

Answer: B

NEW QUESTION # 231

You are deploying the Falcon sensor to a total of 500 hosts. Hosts in an Organizational Unit (OU) will need a specific exclusion that was previously identified. This OU is expected to add members over the next quarter.
What is the best way to create a host group for this OU?

- A. Create a dynamic group with an assignment rule that filters for the OU
- B. Create a static group with from list of host names in the OU
- C. Create a static group with from list of all 500 host names.
- D. Create a dynamic group with an assignment rule that excludes the OU

Answer: A

NEW QUESTION # 232

Where can you find your company's Customer ID (CID)?

- A. The CID is a secret key used for Falcon communication and is never shared with the customer
- B. The CID is located at Hosts setup and management > Deploy > Sensor Downloads and is listed along with the checksum
- C. The CID is only available by calling support

- D. The CID is located at Hosts > Host Management

Answer: B

Explanation:
The CID (Customer ID) is located at Hosts setup and management > Deploy > Sensor Downloads and is listed along with the checksum. The CID is a unique identifier for your organization that is required for authenticating your sensor installation and communication with the Falcon cloud. The checksum is a value that verifies the integrity of the sensor download file.
You can find your CID and checksum at the top of the Sensor Downloads page.

NEW QUESTION # 233

......
