P.S. Free & New MB-335 dumps are available on Google Drive shared by ExamcollectionPass: <https://drive.google.com/open?id=1Bsx dy8DvaL2tf527yqDafb0WUkDNwgPG>

Over the past few years, we have gathered hundreds of industry experts, defeated countless difficulties, and finally formed a complete learning product - MB-335 test answers, which are tailor-made for students who want to obtain Microsoft certificates. According to statistics, by far, our MB-335 Guide Torrent has achieved a high pass rate of 98% to 99%, which exceeds all others to a considerable extent. At the same time, there are specialized staffs to check whether the Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert test torrent is updated every day.

To appear for MB-335 exam, one must have a solid understanding of business processes, plant operations, and logistics functions. Additionally, a thorough understanding of Dynamics 365 Supply Chain Management modules is also necessary to ace the exam. MB-335 exam comes with a total of 40-60 questions and has a duration of 180 minutes.

The MB-335 exam measures the candidate's ability to identify and manage the various elements of Supply Chain Management, including product information management, inventory management, warehouse management, transportation management, and quality management. MB-335 exam also evaluates the candidate's proficiency in implementing and configuring different aspects of Dynamics 365 Supply Chain Management, such as sales and purchase order processing, intercompany trading, and financial management.

Microsoft MB-335 Exam is highly valued in the market and is a significant asset for those who are looking to advance their career in the field of Supply Chain Management. Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert certification demonstrates an individual's expertise in the latest technologies and practices that are used in the industry. It is widely recognized as evidence of proficiency in Supply Chain Management and sets candidates apart in a highly competitive job market.

# Microsoft MB-335 QUESTIONS: A TERRIFIC EXAM PREPARATION SOURCE [2026]

Experts before starting the compilation of "the MB-335 latest questions", has put all the contents of the knowledge point build a clear framework in mind, though it needs a long wait, but product experts and not give up, but always adhere to the effort, in the end, they finished all the compilation. So, you're lucky enough to meet our MB-335 Test Guide I, and it's all the work of the experts. If you want to pass the qualifying MB-335 exam with high quality, choose our MB-335 exam questions. We are absolutely responsible for you. Don't hesitate!

## Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q199-Q204):

### NEW QUESTION # 199

You need to implement the scheduled Kanban requirements.

Which rules should you use? To answer, drag the appropriate rules to the correct requirements. Each rule may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

Topic 1, Fabrikam inc sanitation cleaning solutions

Background

Fabrikam Inc. is a manufacturer of sanitation cleaning solutions and equipment including carpet/floor cleaners, pressure washers, scrubbers and vacuums.

Fabrikam Inc. is a single legal entity based in New York city.

\_ Current environment

Products manufactured

\* Cleaning equipment

o floor cleaner

o pressure washers

o scrubbers

o vacuums

\* Liquid cleaning solutions

o No scent

o Orange scent (subcontracted to a vendor named VendorA)

o Pine scent (subcontracted to a vendor named VendorA)

The production quantity for the finished unscented liquid cleaning solution is 40-liters. IngredientC 'or unscented liquid cleaning solution is stored in inventory in 50-liter barrels and allocated in 50-liter increments.

Two barrels of IngredientC are used to produce a barrel of unscented liquid cleaning solution.

Production sites

\* The Eastern United States facility manufactures equipment.

\* The Western United States facility manufactures liquid cleaning solutions.

\* Raw materials and finished products are stocked at the warehouse and distributed from the warehouse.

Warehouse facilities

The warehouse consists of the following zones:

\_ Requirements

Cleaning equipment manufacturing

You identify the following requirements for manufacturing cleaning equipment:

\* Production is Make to Stock and must be scheduled at an operational level.

\* Machine equipment is produced on an assembly line. Scheduling must be based on production orders.

\* Finished products must be packaged and shipped directly from the warehouse.

\* To reduce delivery times and excess inventory, equipment must be produced as needed.

\* The ability to schedule production must be based on resource capacity and the availability of required materials.

\* Production order operations must be scheduled to start only when capacity and materials are available at the same time and in the required quantities.

Liquid cleaning solution manufacturing

\* Production is Make to Order and is scheduled at the job level. Products must be manufactured in batches.

- \* Finished products must be packaged and shipped directly from the warehouse.
- \* You must be able to calculate the estimated consumption of ingredients and ensure that the amount is divisible by the number of units the raw material is available.
- \* Formula changes must be reviewed and approved. You must ensure that approved formulas cannot be deleted or edited. Approved formulas may be deactivated.
- \* An ingredient used to manufacture unscented cleaning solution is defined as a restricted product. You must be able to automatically print a product safety data sheet (PSDS) with the packing slip for any order that includes unscented cleaning solution.
- \* Production must be scheduled to start by date and time according to the order that is specified by the production route.
- \* You must implement a scheduled Kanban rule that meets the following requirements:
  - o Prevent overloading a work cell for scheduled Kanbans.
  - o Visualize excess inventory in a supermarket.
  - o Store products in supermarkets before they are consumed or shipped.
- \* You must link relevant financial dimension data to the inventory transactions at each site to ensure that you can trace profit and loss figures directly to East site and West site respectively.
- \* You must set up production operations for sub-contracting of Pine scent and Orange scent solution to VendorA to ensure that a purchase order is automatically created based on estimation of a production order.

#### Costing

- \* The price of raw materials used for manufacturing unscented cleaning solution must be tracked based upon commodity exchange pricing. The margin and cost multiplier must be set up for commodity traded raw material.
- \* You must set up cost calculation groups to ensure that indirect costs that originate in the manufacturing of finished goods are recognized and absorbed into the product cost.
- \* The production manager needs to set up picking list journals and BOM item consumption.

#### Reporting

- \* Production control parameters must be setup for reporting of automatic BOM and Route consumption.
- \* You must create reports that include information about cost records and categories for items, and calculation formulas for indirect costs.
- \* You must treat manufactured items as purchased items for cost roll-up purposes during BOM calculations and reporting.
- \* You must configure automatic route consumption in connection with the automatic running of Report as finished.

#### Inventory control

You must not be required to track the lot number for items when you enter inventory information into the system. Lot numbers for items must be entered when items are picked from inventory.

#### Issues

Users report the following issues:

- \* The production manager observes that items are being deducted from inventory two times on production jobs. A shop supervisor mistakenly registers the process for assembling batteries for the pressure washers to Registered as prepared. You must reschedule the process for a future date.
- \* Customer1 orders 20 barrels of unscented solution. The order is confirmed. Production must be scheduled to start on December 21 to meet the customer's delivery deadline.
- \* User2 reports that costs for manufactured items are twice as high as expected.
- \* UserD reports that the formula for the liquid cleaning solution sometimes changes during production. You must enforce the policies regarding formula editing for current and future use.

### NEW QUESTION # 200

You need to create the production orders for standard model bicycles.

Which method should you use?

- A. All production orders form
- B. Sales order line
- C. Released item
- D. Master planning execution
- E. Supply schedule form

**Answer: E**

Explanation:

Topic 4, Case Study 4, Fabrikam inc.

Fabrikam, Inc. is a discrete manufacturer of outdoor patio furniture. The company originated as a sole owner working from a home garage, then moved into a commercial storage space, and later into a full manufacturing facility. The company operates as two

operating legal entities, one in the United States and the other in Mexico.

As the company grew, the existing software systems failed to grow with it. This meant that financial reporting was managed in an outdated accounting system; raw materials planning, production, and inventory control were managed in another system; and cost calculations were tracked in multiple spreadsheets managed by analysts.

Current environment

The Fabrikam, inc. engineering team uses a third-party computer-aided design (CAD) system for drawings.

These drawings are later introduced into one or more companies for sale. A customer service center handles complaint calls and places orders for distributors.

The current system landscape creates a lack of controls and visibility across the systems, leading to overages of some raw materials, shortages on others, and large quantities of scrap. Heavy production volume provides little to no room for system downtime. The staff manually creates production orders, which leads to double work for system entry later. This delay has a ripple effect into the materials planning.

The company currently sources teakwood from India, making it a more expensive and high-end material.

Cedar and redwood are both sourced from the Western US. Truck driver shortages across the nation have caused shipping costs to rise sharply.

Fabrikam, Inc. recently decided to expand into the gas firepit market. All products are currently being prototyped. The company decides that the firepit prototype should be initially available only in the United States. The firepits will be manufactured only in Nevada and Arizona. The firepits are produced as prototyping; this production line operates only on Mondays.

Fabrikam, Inc. has purchased new manufacturing equipment for the firepit metal fabrication. This purchase includes a warranty, which requires that the company perform routine maintenance. Fabrikam, inc. elects to complete the maintenance in house on a quarterly schedule and maintain appropriate records for warranty purposes. The metal fabrication equipment consists of three separate machines used in a single production process.

Fabrikam, Inc. made the decision to move to Dynamics 365 Supply Chain Management.

Application and environment

\* Fabrikam, inc. must move systems and processing to software as a service (SaaS) whenever possible because the company does not have enough IT staff to support hardware.

Inventory and costing

\* Finished goods fall into three categories:

\* Wood furniture (teak, cedar, redwood) o Outdoor heating (firepits, gas heaters)

\* Each outdoor heating item with slight variations, such as a chrome or steel finish, must have a unique item number, o Repair parts (nuts and bolts, ignitors, and other parts)

\* The system must account for the fact that Fabrikam, inc. must take legal ownership of teakwood at the time of shipment, not at the time of receipt into the warehouse.

\* The company must accrue for the costs of the teakwood materials as soon as the company takes ownership.

The company takes ownership at the time of shipment, which is posted prior to physical receipt at the warehouse.

Engineering

\* Engineers who specialize in gas consumer goods will design the firepits and are the only users with authority to release the products for sale.

\* Engineering must notify customer service of any open orders that may contain a released product version that may be discontinued or delayed.

\* The change request workflow must route to the engineer.

Production

\* The raw material and subcomponent goods for the firepit must be managed by the engineer. This means the engineer must oversee any new items, material changes, address problems, and so on.

\* The metal fabrication equipment must be tracked at the locations where the firepits are produced.

\* The production team must operate on an all-day/everyday model, with each team operating in a 12-hour shift. This is a recent change to keep up with high demand for products, as well as for planning a new product line.

\* Raw material and subcomponent items for the firepit prototype must not be available for use until engineering is ready for the prototype product release.

\* Due to the production staff schedule, all equipment must be planned according to the staffing.

\* Maintenance for each of the three pieces of machinery must be scheduled at the same time so that only the local maintenance technician works on the equipment.

\* When the firepits are ready for the test market they must made be available for sale.

\* The United States operating company must review any engineering products before they are available for sales or production orders,

\* The engineering team must release the engineering product into the United States operating company,

\* The engineering BOM lines must not be removed by the United States operating company.

Application and environment

\* The operations manager is concerned that system downtime is so frequent that It is impacting efficiency due to the all-day/everyday production operation model.

Inventory and costing

- \* Fabrikam, inc. marketing campaigns in the desert states of Arizona- Nevada, and New Mexico have led to an increased demand for teakwood furniture to endure weather elements. Supply and demand for this wood lowered expected margins with increased shipping costs and price increases from the vendors.
- \* User1 reports that the inventory value of the teakwood is not on the financial reports, even though ownership of the product begins at the port of shipment,
- \* Upon receipt into the physical warehouse, User2 reports that the warehouse workers received less teakwood than the ordered amount on the purchase order.
- Engineering and production
- \* As the firepits are produced and feedback received from the test market, records must be maintained of each revision to the firepit design.
- \* Firepits must have attributes associated with them to specify the type of gas line that is available for the firepit such as natural gas or propane.
- \* Customer service is receiving calls that the firepit ignition switch does not always work as expected. This issue was reported through an engineering change request.
- \* User3 reports resource issues on the production shop floor due to system maintenance issues and other delays. The company does not want User3 or the other workers to stop production.
- \* User4 reports that a bolt needed for cedar wood furniture is out of stock. A temporary substitution bolt was identified prior to starting the production order.
- \* User5 reports that a hinge for redwood furniture will be discontinued at the end of the year. Production must reflect an updated part.
- \* A large order was placed for 1,500 pieces of teakwood furniture and production orders must start as soon as possible.
- \* Users reports the following:
- \* Only 100 pieces of furniture can be produced on the night shift due to resourcing. Enough raw materials are on hand to complete 100 pieces, but not enough to produce all 1.500 pieces.
- \* The production floor is organized into dedicated production lines, each with their own warehouse. The warehouse workers must pick the raw materials to the correct warehouse location.

#### NEW QUESTION # 201

A manufacturing company uses Dynamics 365 Supply Chain Management.

The company identifies a bill of materials (BOM) item that needs to be recalled for a product The engineering department needs to link customer support incidents and knowledgebase articles related to the product change.

Other items affected by this change must reference the same support incidents and knowledgebase articles.

You need to recommend features to facilitate this business process.

Which features should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

#### NEW QUESTION # 202

A company implements Dynamics 365 Supply Chain Management.

You run a master plan each week.

You need to resolve the issue in the scenario.

What should you do? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

#### NEW QUESTION # 203

You need to configure the options for the new limited-edition bicycle for the summer season. Which configurations should you use?

To answer, select the appropriate options in the answer area. NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

**NEW QUESTION # 204**

.....

The Microsoft MB-335 Certification Exam is one of the valuable credentials that are designed to prove an Microsoft aspirant's technical expertise. With the Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) certificate they can be competitive and updated in the highly competitive market. The Microsoft Certification Questions offers a great opportunity for beginners and experienced professionals to not only validate their skills but also advance their careers.
