100% Pass SAP - C-ACDET-2506 - SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite–Efficient Clear Exam

Success is has method. You can be successful as long as you make the right choices. ExamDiscuss's SAP C-ACDET-2506 exam training materials are tailored specifically for IT professionals. It can help you pass the exam successfully. If you're still catching your expertise to prepare for the exam, then you chose the wrong method. This is not only time-consuming and laborious, but also is likely to fail. But the remedy is not too late, go to buy ExamDiscuss's SAP C-ACDET-2506 Exam Training materials quickly. With it, you will get a different life. Remember, the fate is in your own hands.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 2	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

Topic 3	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

Latest C-ACDET-2506 Learning Material - C-ACDET-2506 Reliable Test Camp

C-ACDET-2506 test guide is an examination material written by many industry experts based on the examination outlines of the calendar year and industry development trends. Its main purpose is to help students who want to obtain the certification of C-ACDET-2506 to successfully pass the exam. Compared with other materials available on the market, the main feature of C-ACDET-2506 exam materials doesn't like other materials simply list knowledge points. It allows students to find time-saving and efficient learning methods while memorizing knowledge points. With C-ACDET-2506 study braindumps, learning from day and night will never happen. You can learn more with less time. You will become a master of learning in the eyes of others. With C-ACDET-2506 study braindumps, successfully passing the exam will no longer be a dream.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q58-Q63):

NEW QUESTION # 58
In a Greenfield deployment scenario, how should translation migrations be performed for header field labels, help tips, and validity condition error messages?

- A. Create a package to migrate translations by ICM.
- B. Translations are included in migrations and are listed as AMLStringResource in the migration UI.
- C. Contact an SAP Deployment lead for customization help.
- D. User with Partner Administrator can configure translation.

Answer: B

Explanation:
In Greenfield deployments, translations for custom field labels, help tips, and validation/error messages are migrated as part of the configuration migration package and are represented in the migration UI as AMLStringResource entries. This structured approach ensures all language-specific content is consistently moved alongside configuration settings.
While administrators and deployment leads may support translation tasks, the migration of translation strings is managed automatically via this AML-based mechanism, not through manual reconfiguration or separate ICM packages.
This ensures a seamless multilingual user experience immediately upon go-live without requiring additional manual translation imports.

NEW QUESTION # 59
You need to revise a published form template. What steps do you follow?

- A. Clone and change ID
- B. Create a new version, edit, test, and publish
- C. Delete and recreate
- D. Edit directly in production

Answer: B

Explanation:
SAP Ariba requires that revisions to published form templates be handled through creating a new version of the template, then editing and testing the draft version before publishing it. The system maintains the prior published version active while you work on the new draft, ensuring no disruption. Cloning and changing IDs is unnecessary and not best practice. Direct edits on published templates are not permitted, and deleting and recreating loses version history and control. This versioning mechanism supports safe, auditable template changes.

NEW QUESTION # 60

When performing migration to production for a Greenfield customer, which item needs to be made available in Production prior to creating the migration package in Intelligent Configuration Manager (ICM)?

- A. Translations
- B. Locations
- C. Approval Rules
- D. Users

Answer: A

Explanation:
Before creating and deploying migration packages with the Intelligent Configuration Manager (ICM), translation string resource files (custom field labels, help tips, validation messages, etc.) must be uploaded into Productionvia AML & Translations Upload. This ensures that migration bundles referencing these translations do not cause missing label or localization issues post-migration. Locations, users, and approval rules are either migrated as part of configuration packages or managed separately, and do not require prior upload to Production before creating migration packages.

NEW QUESTION # 61

Which scenarios are applicable when moving templates from the test site to the production site by Intelligent Configuration Manager (ICM)? (Select 2 correct answers)

- A. Draft templates on the source site are skipped.
- B. New templates that successfully migrated to the production site are in Draft state.
- C. Batch imports are available for templates when migrating configuration bundles.
- D. Published templates with flex master data references in the test site are migrated to the production site during the first migration attempt.

Answer: A,B

Explanation:
ICM only migratespublished templates; draft templates are skipped (A). When templates are imported into production, they arrive indraft stateby default to allow review and publishing before use (C). Batch imports for templates (B) are not supported; migration is typically handled per template. Flex master data references require manual migration steps and are not migrated automatically during the initial template transfer (D).

NEW QUESTION # 62

How can you set the order of your custom Contract Workspace fields? Note: There are 2 correct answers to this question.

- A. Select Field Configuration, find the class, and select the Layout tab. Here you can drag and drop the order of the fields. Once all changes are performed, publish all changes via Customizing Publish.
- B. Select Field Configuration and under the advanced tab select property Sequence. Fields are sorted by this field in the UI. Once all changes are performed, publish all changes via Customizing Publish.
- C. The fields are presented in alphabetical order of the field label. By carefully choosing the
- D. Navigate to the UI where the class is presented, select Customize in the banner, select Edit, and drag and drop the fields in the order they should be presented. Once all changes are performed, publish all changes via Customizing → Publish

Answer: A,D

NEW QUESTION # 63
