**Answer Area**

can use conditional access policies to control sessions in real time.

|                                                                        |
|------------------------------------------------------------------------|
| Azure Active Directory (Azure AD) Privileged Identity Management (PIM) |
| Azure Defender                                                         |
| Azure Sentinel                                                         |
| Microsoft Cloud App Security                                           |

### NEW QUESTION # 238

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

**Answer Area**

| Statements                                                                             | Yes                   | No                    |
|----------------------------------------------------------------------------------------|-----------------------|-----------------------|
| Azure Active Directory (Azure AD) is deployed to an on-premises environment.           | <input type="radio"/> | <input type="radio"/> |
| Azure Active Directory (Azure AD) is provided as part of a Microsoft 365 subscription. | <input type="radio"/> | <input type="radio"/> |
| Azure Active Directory (Azure AD) is an identity and access management service.        | <input type="radio"/> | <input type="radio"/> |

**Answer:**

Explanation:

**Answer Area**

| Statements                                                                             | Yes                              | No                               |
|----------------------------------------------------------------------------------------|----------------------------------|----------------------------------|
| Azure Active Directory (Azure AD) is deployed to an on-premises environment.           | <input type="radio"/>            | <input checked="" type="radio"/> |
| Azure Active Directory (Azure AD) is provided as part of a Microsoft 365 subscription. | <input checked="" type="radio"/> | <input type="radio"/>            |
| Azure Active Directory (Azure AD) is an identity and access management service.        | <input checked="" type="radio"/> | <input type="radio"/>            |

Explanation

Graphical user interface, text, application, email Description automatically generated

## Answer Area

| Statements                                                                             | Yes                              | No                               |
|----------------------------------------------------------------------------------------|----------------------------------|----------------------------------|
| Azure Active Directory (Azure AD) is deployed to an on-premises environment.           | <input type="radio"/>            | <input checked="" type="radio"/> |
| Azure Active Directory (Azure AD) is provided as part of a Microsoft 365 subscription. | <input checked="" type="radio"/> | <input type="radio"/>            |
| Azure Active Directory (Azure AD) is an identity and access management service.        | <input checked="" type="radio"/> | <input type="radio"/>            |

Box 1: No

Azure Active Directory (Azure AD) is a cloud-based user identity and authentication service.

Box 2: Yes

Microsoft 365 uses Azure Active Directory (Azure AD). Azure Active Directory (Azure AD) is included with your Microsoft 365 subscription.

Box 3: Yes

Azure Active Directory (Azure AD) is a cloud-based user identity and authentication service.

## NEW QUESTION # 239

Match the types of compliance score actions to the appropriate tasks.

To answer, drag the appropriate action type from the column on the left to its task on the right. Each type may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

| Compliance score action                   | Answer Area                                                                                                         |
|-------------------------------------------|---------------------------------------------------------------------------------------------------------------------|
| <input type="text" value="Corrective"/>   | <input type="text" value="Action"/> Use encryption to protect data at rest.                                         |
| <input type="text" value="Detective"/>    | <input type="text" value="Action"/> Actively monitor systems to identify irregularities that might represent risks. |
| <input type="text" value="Preventative"/> |                                                                                                                     |

Answer:

Explanation:

| Compliance score action                            | Answer Area                                                                                                                       |
|----------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| <input checked="" type="text" value="Corrective"/> | <input checked="" type="text" value="Preventative"/> Use encryption to protect data at rest.                                      |
| <input checked="" type="text" value="Detective"/>  | <input checked="" type="text" value="Detective"/> Actively monitor systems to identify irregularities that might represent risks. |
| <input type="text" value="Preventative"/>          |                                                                                                                                   |
