

# AIGP Detailed Answers - Latest AIGP Exam Online

BONUS!!! Download part of PracticeVCE AIGP dumps for free: <https://drive.google.com/open?id=1Yjc1SyETpE126ymMwgLUCY-TJgPAI3X3>

After you purchase AIGP exam questions, you should always pay attention to your email address. Once there is a new version, we will send updated information to your email address. As we all know, the authority of a product matches its hit rate. How high the authority of AIGP Real Exam is, I don't need to say any more. You just know what you will know. You can't really find a product that has a higher hit rate than our AIGP study materials!

## IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.</li></ul>

**Topic 4**

- Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.

## **Latest IAPP AIGP Exam Online & Exam AIGP Prep**

In cyber age, it's essential to pass the AIGP exam to prove ability especially for lots of office workers. Our company, with a history of ten years, has been committed to making efforts on developing AIGP exam guides in this field. Since the establishment, we have won wonderful feedback from customers and ceaseless business and continuously worked on developing our AIGP Exam prepare to make it more received by the public. Moreover, our understanding of the importance of information technology has reached a new level. Efforts have been made in our experts to help our candidates successfully pass AIGP exam. Seldom dose the e-market have an authorized study materials for reference.

### **IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q60-Q65):**

#### **NEW QUESTION # 60**

A US company has developed an AI system, CrimeBuster 7909, that collects information about incarcerated individuals that predicts whether someone is likely to commit another crime if released from prison. When considering expanding to the EU market, this type of technology would:

- A. Be subject to approval by the relevant EU authority.
- B. Require the application of privacy enhancing technologies.
- C. Require the company to register the tool with the EU database.
- D. Be banned under the EU AI Act.

**Answer: D**

#### **NEW QUESTION # 61**

A US hospital plans to develop an AI that will review available patient data in order to propose an initial diagnosis to licensed physicians. The hospital will implement a policy that requires physicians to consider the AI proposal, but conduct their own physical examinations prior to making a final diagnosis.

An important ethical concern with this plan is?

- A. Whether the AI will have an error rate comparable to human physicians.
- B. Whether physicians understand how the AI works.
- C. Whether the AI was trained on a representative dataset.
- D. Whether patients will receive an economic benefit from the use of AI.

**Answer: C**

Explanation:

The core ethical concern when deploying diagnostic AI in a healthcare setting is ensuring fairness and accuracy across diverse patient populations. If the AI is trained on a dataset that is not representative of the population it will serve, it risks reinforcing health disparities and leading to misdiagnoses.

From the AI Governance in Practice Report 2025:

"Training datasets lacking in diversity can produce outputs that systematically underperform for certain groups... this can lead to inaccurate or biased outcomes in healthcare settings." (p. 41)

"Bias, discrimination and fairness challenge... inadequate or nonrepresentative training data can result in AI systems that propagate historical disparities." (p. 42) While physician oversight may reduce risk, biased data can still shape clinical decision-making.

- \* A- Economic benefit is not central to ethical risk here.
- \* C- Important but less critical than data representativeness.
- \* D- Error rate matters but is addressed via validation; it's not the core ethical issue.

### NEW QUESTION # 62

Business A sells software that provides users with writing and grammar assistance. Business B is a cloud services provider that trains its own AI models.

- \* Business A has decided to add generative AI features to their software.
- \* Rather than create their own generative AI model, Business A has chosen to license a model from Business B:
- \* Business A will then integrate the model into their writing assistance software to provide generative AI capabilities.
- \* Business A is most concerned that its writing assistance software could recommend toxic or obscene text to its users.

Which of the following governance processes should Business A take to best protect its users against potentially inappropriate text?

- A. Business A should establish a user reporting feature that allows users to flag toxic or obscene text, and report any incidents to Business B.
- B. Business A should ask Business B for detailed documentation on the generative AI model's training data and whether it contained toxic or obscene sources.
- **C. Business A should test that the AI model performs as expected and meets their minimum requirements for filtering toxic or obscene text.**
- D. Business A should fine-tune the AI model on user-generated text that has been verified to be appropriate.

#### Answer: C

Explanation:

Business A is integrating a generative AI model licensed from a third party (Business B) and is primarily concerned with the risk of toxic or obscene outputs being delivered to users. In this scenario, testing and validation of the AI model for such content risks is the most direct and effective governance strategy.

According to the AI Governance in Practice Report 2024, organizations that deploy AI must engage in performance monitoring protocols and ensure systems perform adequately for their intended purposes, including filtering harmful content:

"Operational governance... development of #Performance monitoring protocols to ensure systems perform adequately for their intended purposes." (p. 12)

"Product governance... includes: #System impact assessments to identify and address risk prior to product development or deployment." (p. 11) Furthermore, under the EU AI Act, which sets the global standard many organizations aim to align with, there is a clear obligation to test and monitor systems for potential harmful behavior:

"The act imposes regulatory obligations... such as establishing appropriate accountability structures, assessing system impact, providing technical documentation, establishing risk management protocols and monitoring performance..." (p. 7) Option B directly reflects this best practice of pre-deployment testing and validation to ensure that the model aligns with Business A's minimum content safety requirements.

Let's now evaluate the incorrect options:

- \* A. Fine-tuning on verified user-generated text may improve model alignment but does not guarantee that the model will generalize correctly, especially if Business A lacks access to model internals (common in third-party licensing scenarios). Fine-tuning also introduces its own risks and may be contractually restricted.
- \* C. A user reporting feature is reactive, not preventive. While helpful for long-term monitoring and mitigation, it does not prevent the initial harm of toxic outputs, which is Business A's primary concern.
- \* D. Requesting documentation from Business B is useful for transparency and risk management, but it does not replace independent verification that the model meets Business A's content safety standards.

Thus, testing the model's behavior for unacceptable outputs before deployment is the most aligned approach with AI governance best practices and obligations.

### NEW QUESTION # 63

What type of organizational risk is associated with AI's resource-intensive computing demands?

- A. Security risk.
- B. People risk.
- C. Third-party risk.
- **D. Environmental risk.**

#### Answer: D

#### Explanation:

AI's resource-intensive computing demands pose significant environmental risks. High-performance computing required for training and deploying AI models often leads to substantial energy consumption, which can result in increased carbon emissions and other environmental impacts. This is particularly relevant given the growing concern over climate change and the environmental footprint of technology. Organizations need to consider these environmental risks when developing AI systems, potentially exploring more energy-efficient methods and renewable energy sources to mitigate the environmental impact.

#### NEW QUESTION # 64

A company that deploys AI but is not currently a provider or developer intends to develop and market its own AI system. Which obligation would then be likely to apply?

- A. Developing a reporting plan for any observed algorithmic discrimination or harms to individuals' rights and freedoms.
- B. Developing documentation on the system, the potential risks and the safeguards applied.
- **C. Implementing a risk management framework.**
- D. Conducting an impact assessment including a post-deployment monitoring plan.

#### Answer: C

#### Explanation:

Once the company becomes a provider of an AI system, it becomes subject to the EU AI Act's provider obligations, the foundational one being the requirement to implement a formal risk- management framework for the system throughout its lifecycle.

#### NEW QUESTION # 65

.....

Do not hesitate to seek our extraordinary IAPP AIGP practice material to make a name in the field of Technology. PracticeVCE has designed the IAPP AIGP product in three formats. You will find their specifications below to comprehend them better.
