Nutanix Certified Associate v6.10 Sample Questions (Q20-Q25):

NEW QUESTION # 20

An administrator is using LCM at a connected site to update various components on a Nutanix cluster and notices that the LCM Framework is not updated to the current version.

What step should the administrator take to ensure LCM is updated to the latest release?

- A. Perform an inventory.

- B. Upgrade AOS
- C. Restart genesis across the cluster.
- D. Run an NCC health check.

Answer: A

Explanation:

The correct answer is C. Perform an inventory.

To ensure the LCM Framework and its associated component metadata are updated, the administrator must perform a fresh LCM inventory. This process:

- * Retrieves the latest metadata and framework version from the Nutanix support portal (if the cluster is connected).
- * Detects current component versions and identifies available updates.

Clarifications:

- * A (Upgrade AOS): LCM is independent of AOS version updates.
- * B (Restart genesis): Unnecessary and not relevant to LCM framework versioning.
- * D (NCC): Useful for cluster health, but does not affect LCM updates.

NEW QUESTION # 21

For dark site clusters, what should be downloaded prior to running an LCM Inventory or updates?

- A. Nutanix Prism Central
- **B. Nutanix Compatibility Bundle**
- C. Nutanix Foundation Platform
- D. Nutanix Foundation

Answer: B

Explanation:

For dark site clusters, the Nutanix Compatibility Bundle must be downloaded prior to running LCM Inventory or updates. This bundle contains the necessary metadata and software binaries to perform inventory collection and upgrades in environments without internet connectivity.

- * A. Nutanix Foundation: Incorrect, as Foundation is used for initial deployments, not for LCM updates.
- * B. Nutanix Compatibility Bundle: Correct, as it contains the necessary files for offline LCM operations.
- * C. Nutanix Prism Central: Incorrect, as this does not pertain to offline updates.
- * D. Nutanix Foundation Platform: Incorrect, as this is not required for LCM Inventory or updates.

NEW QUESTION # 22

When configuring dual encryption, which key management method is supported?

- A. Lockdown Mode Enabled
- B. Trusted Platform Module
- C. Native Key Manager
- **D. External Key Manager**

Answer: D

NEW QUESTION # 23

How many copies of the metadata are maintained within a Redundancy Factor 3 cluster?

- A. 0

- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

In a Redundancy Factor 3 (RF3) cluster, 5 copies of the metadata are maintained to ensure data durability and cluster resiliency. RF3 provides fault tolerance against up to two simultaneous failures (e.g., node or disk failures) and requires more metadata copies to achieve this level of protection.

Other redundancy factors:

* RF2 maintains 3 copies of metadata.

* RF3 requires at least 5 metadata copies to protect against additional failures.

NEW QUESTION # 24

An administrator has spent time correcting specific issues that have been identified by NCC Health Checks in Prism Element. How can just the checks that previously did not pass be executed again to confirm they are all resolved?

- A. Run LCM Pre-Upgrade to trigger NCC Checks.
- **B. Select Only Failed And Warning Checks.**
- C. Run ncc health checks run_all.
- D. Select Run Check for each check worked.

Answer: B
