

# VMCE\_v12 Reliable Braindumps Book | New VMCE\_v12 Exam Test

2026 Latest Dumpkiller VMCE\_v12 PDF Dumps and VMCE\_v12 Exam Engine Free Share: [https://drive.google.com/open?id=14v\\_Brs4cWkd0BkGwpczxb2u7aP\\_Bv5L](https://drive.google.com/open?id=14v_Brs4cWkd0BkGwpczxb2u7aP_Bv5L)

To keep with the fast-paced social life, we make commitment to all of our customers that we provide the fastest delivery services on our VMCE\_v12 study guide for your time consideration. As most of the people tend to use express delivery to save time, our VMCE\_v12 Preparation exam will be sent out within 5-10 minutes after purchasing. As long as you pay at our platform, we will deliver the relevant VMCE\_v12 exam materials to your mailbox within the given time.

If candidates need to buy the VMCE\_v12 exam dumps for the exam, they must care for the pass rate. The pass rate of our VMCE\_v12 exam dumps is over 98%, and we can ensure that you can pass it. If you have some questions about the VMCE\_v12 Exam Materials, you can consult us. Furthermore, we have the technicians for our website, and they will check network environment safety at times, we offer you a clean and safety online network environment for you.

## New Veeam VMCE\_v12 Exam Test & VMCE\_v12 Customized Lab Simulation

Candidates who are preparing for the Veeam exam suffer greatly in their search for preparation material. You won't need anything else if you prepare for the exam with our Veeam VMCE\_v12 Exam Questions. Our experts have prepared Veeam Certified Engineer v12 with dumps questions that will eliminate your chances of failing the exam.

### Veeam VMCE\_v12 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Scale-out Backup Repository: This section of the exam covers the description of the architecture, placement policies, and data tiers.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Recovery scenarios and features: This section covers the impact of various recovery procedures and choosing the most viable recovery technique.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Backup data optimizations: This section covers the need for object storage to be backed up and the supported object storage solutions while utilizing repositories.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>• Veeam Data Platform: This section deals with the identification and description of the goal of each major product in the Veeam Data Platform.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Data protection strategies: This section of the exam covers an overview of data protection strategies.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• Moving or copying backups: This section of the exam covers use cases for backup processes using VeeamMover.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• Verifying recoverability: This section of the exam covers the creation of automated tests to ensure recoverability from backups and replicas.</li> </ul>
Topic 8	<ul style="list-style-type: none"> <li>• Transport modes: This section aims to analyze different methods to collect and read data from the production environment.</li> </ul>
Topic 9	<ul style="list-style-type: none"> <li>• Unstructured data backup: This section is about highlighting vital features required to protect unstructured data.</li> </ul>
Topic 10	<ul style="list-style-type: none"> <li>• Enacting a recovery: This section is about getting practice in recovering various recoveries with diverse data.</li> </ul>
Topic 11	<ul style="list-style-type: none"> <li>• Risk scenarios: This section covers exploring various risk scenarios and identifying the type of risks we may face in the environment.</li> </ul>
Topic 12	<ul style="list-style-type: none"> <li>• Backup copies: This section ensures the process of recoverability and adheres to the 3-2-1 Rule with backup copy processes.</li> </ul>
Topic 13	<ul style="list-style-type: none"> <li>• Veeam Backup Enterprise Manager: The section describes the use cases for Veeam Backup Enterprise Manager.</li> </ul>
Topic 14	<ul style="list-style-type: none"> <li>• Virtual machine backup: This section of the exam covers protecting the VMware and Hyper V to safeguard VMware that follows SLAs.</li> </ul>
Topic 15	<ul style="list-style-type: none"> <li>• Agent backup: This section of the exam covers the identification of protection groups for automating the installation of Veeam Agents.</li> </ul>
Topic 16	<ul style="list-style-type: none"> <li>• Core components: This section of the exam covers exploring the functionality of Veeam Backup &amp; Replication and system requirements.</li> </ul>
Topic 17	<ul style="list-style-type: none"> <li>• Replication: This section of the exam covers the description of use cases, architectures, and elements of replication jobs.</li> </ul>

## Veeam Certified Engineer v12 Sample Questions (Q111-Q116):

### NEW QUESTION # 111

A backup administrator must enable guest file system indexing for a backup job of a Microsoft Windows file server VM. All required credentials are added to the Veeam Backup & Replication server. VMware Tools (VIX) cannot be used due to security regulations. What should be done to make it possible in the following environment?

- A. Use the proxy server as a guest interaction proxy
- B. Connect the ESXi host to the VM network
- C. Use the Veeam Backup & Replication server as a guest interaction proxy
- D. Install a file system indexing plugin on the Microsoft Windows file server

**Answer: A**

Explanation:

If VMware Tools (VIX) cannot be used due to security regulations, the backup administrator can use the proxy server as a guest interaction proxy to enable guest file system indexing for a backup job. The guest interaction proxy is responsible for the deployment

and coordination of guest processing tasks, such as guest file system indexing, which does not require VIX. References:

- \* Veeam Backup & Replication User Guide: Guest Interaction Proxy
- \* Veeam Knowledge Base: Configuring Guest Interaction Proxies

#### NEW QUESTION # 112

A 3-node Microsoft SQL Always On cluster is running in a VMware environment.

The RPOs are:

- \* 1 day for the cluster nodes
- \* 15 minutes for the log files

How should the cluster be backed up?

- A. Veeam Agent for Windows - Create a managed by server backup job for all 3 nodes. Use Application-Aware Processing to back up the database once a day.
- B. Veeam Enterprise Plug-in for Microsoft SQL - Install the Plug-in on each node in cluster. Use Microsoft SQL Server Management Studio to create the backups.
- **C. Veeam Backup and Replication - Create a VMware backup job, include the 3 nodes of the cluster. Use Application-Aware Processing to back up the transaction logs every 15 minutes.**
- D. Veeam Agent for Windows - Create a managed by agent backup policy for all 3 nodes. Use a log shipping server to back up the transaction logs every 15 minutes.

**Answer: C**

Explanation:

For backing up a 3-node Microsoft SQL Always On cluster running in a VMware environment with the specified Recovery Point Objectives (RPOs), the most suitable option is A: Veeam Backup and Replication - Create a VMware backup job, include the 3 nodes of the cluster. Use Application-Aware Processing to back up the transaction logs every 15 minutes. This approach allows for the entire SQL cluster nodes to be backed up as part of a regular VM backup job, which satisfies the 1-day RPO for the cluster nodes. The Application-Aware Processing feature of Veeam Backup & Replication ensures that the SQL databases are in a consistent state during backup. Moreover, this feature allows for the transaction logs to be backed up separately at a more frequent interval, in this case, every 15 minutes, meeting the 15-minute RPO requirement for the log files. This dual approach ensures comprehensive protection for both the SQL cluster nodes and the critical transaction logs, aligning with the specified RPOs.

#### NEW QUESTION # 113

Which recovery capability is available for Continuous Data Protection replication?

- A. The replica virtual machine can be synched in real time.
- B. The replica virtual machine can be application consistent as frequently as every 15 minutes.
- **C. The replica virtual machine can be restored to a state a few seconds or minutes earlier.**
- D. The replica virtual machine can be powered on even if the Veeam Backup & Replication server is unavailable

**Answer: C**

Explanation:

The key benefit of Veeam's Continuous Data Protection is its ultra-fine recovery points - allowing you to roll your replica back to any state just seconds or minutes before a failure.

#### NEW QUESTION # 114

A backup administrator is called in to review a new Veeam deployment created by a coworker.

The backup administrator takes the following notes:

- 12 backup jobs
- 1 SOBR configured with AWS S3 Performance Tier
- 1 Repository configured on Hardened Immutable Repository

The administrator also notes that six jobs are configured to use the SOBR and six jobs are configured to use the Hardened Immutable Repository.

What should the backup administrator report to the other coworker regarding the 3-2-1 backup strategy?

- A. This needs the Hardened Immutable Repository added to the capacity tier.

- B. This will save costs with the Archive Tier in the SOBR.
- C. This meets the 3-2-1 best practices requirements.
- D. This only has 1 copy of the backup data.

**Answer: D**

Explanation:

The 3-2-1 backup strategy is a best practice that suggests having three total copies of your data, two of which are local but on different devices or media, and one copy offsite. In the described scenario, although there is an offsite component (SOBR with AWS S3 Performance Tier), and a local hardened immutable repository, there is no indication of a second local copy on a different device or media. This means that there is only one local copy of the backup data and one offsite copy. Therefore, the setup does not meet the 3-2-1 best practices requirement, which would involve having at least one more local copy on different media or device.

#### NEW QUESTION # 115

A daily backup job for seven Hyper-V VMs has been configured at the main site, keeping 14 days' worth of backup files. They want to get a copy of the VM backups to a repository at the disaster recovery site. They want to keep six months' worth of backup files at the disaster recovery site. They also need to be able to restore the VMs to any given day within two months and any given week within the six months. How should a backup copy job be configured to meet these requirements?

- A. Use periodic copy (pruning) mode, keeping 62 days of retention and six monthly GFS restore points.
- B. Use periodic copy (pruning) mode, keeping 180 days of retention.
- C. Use immediate copy (mirroring) mode, keeping 180 days of retention.
- D. Use immediate copy (mirroring) mode, keeping 62 days of retention and 26 weekly GFS restore points.

**Answer: A**

Explanation:

To meet the specified requirements, configuring a backup copy job in periodic copy (pruning) mode with 62 days of retention and six monthly Grandfather-Father-Son (GFS) restore points is the best approach. This setup allows for daily backups for up to two months and weekly backups for up to six months, aligning with the desired restore capabilities. References: Veeam Backup & Replication User Guide, Veeam GFS Retention Policy Explanation

#### NEW QUESTION # 116

.....

The update for our VMCE\_v12 learning guide will be free for one year and half price concession will be offered one year later. In addition to the constantly update, we have been working hard to improve the quality of our VMCE\_v12 Preparation prep. I believe that with the help of our study materials, the exam is no longer an annoyance. Hope you can give not only our VMCE\_v12 training materials but also yourself a chance.
