BTW, DOWNLOAD part of BraindumpStudy AZ-400 dumps from Cloud Storage: <https://drive.google.com/open?id=14MNXX-UPwx0IvbgoLj70flKht15u9Rn>

One of the main unique qualities of the BraindumpStudy Google Exam Questions is its ease of use. Our practice exam simulators are user and beginner friendly. You can use Microsoft PDF dumps and Web-based software without installation. Designing and Implementing Microsoft DevOps Solutions (AZ-400) PDF questions work on all the devices like smartphones, Macs, tablets, Windows, etc. We know that it is hard to stay and study for the Microsoft AZ-400 exam dumps in one place for a long time.

The AZ-400 exam is intended for individuals who work as DevOps professionals or in a similar role. This includes developers, release managers, automation engineers, and IT professionals who are responsible for implementing and managing the DevOps pipeline. AZ-400 exam is also suitable for individuals who want to pursue a career in DevOps and want to demonstrate their knowledge and skills in this area.

## What is the Microsoft AZ-400 exam?

Pearson VUE is the official administrator of the Microsoft AZ-400 exam. Therefore, the candidates have to register for and schedule this test on its website. To register for the exam, they must pay the fee of \$165. This amount applies to a single delivery of the test. The exam is available in English, Korean, Simplified Chinese, and Japanese. The students can expect around 40-60 questions and the time allowed for the completion of the test is 120 minutes. Different question formats may be included in the delivery of the exam, such as multiple choice, scenario-based, drag and drop, build list, active screen, short answer, and case studies.

The Microsoft AZ-400 exam covers different domains. The candidates must develop high competence in these topic areas before attempting the certification test.

- **Defining & Implementing Continuous Integration: 20-25%**

The questions related to this topic will measure the competence of the learners in designing build automation; designing a strategy for package management; designing a strategy for application infrastructure management; implementing a build strategy; maintaining a build strategy; designing processes for standardizing build throughout an organization.

- **Defining & Implementing a Continuous Delivery & Release Management Strategy: 10-15%**

The last domain of the Microsoft AZ-400 Exam will evaluate your knowledge and skills in developing deployment templates and scripts; implementing a solution for orchestration automation; planning the strategy for the deployment environment.

- **Facilitating Collaboration & Communication: 10-15%**

This section requires that the examinees develop their skills in communicating deployment as well as releasing information with the business stakeholders; automating communication with the team members; generating documentation for the DevOps process.

- **Developing an Instrumentation Strategy: 5-10%**

The exam questions from this topic will measure the skills and knowledge of the applicants in designing as well as implementing logging, designing as well as implementing telemetry, and integrating logging & monitoring solutions.

- **Developing a Compliance & Security Plan: 10-15%**

This subject area will evaluate the skills and competence of the test takers in designing an authorization and authentication strategy, designing a strategy for a sensitive information strategy, developing compliance and security, designing the mechanisms for governance enforcement.

The Microsoft AZ-400 exam consists of 40-60 multiple-choice and multiple-response questions, which have to be completed within two hours. The cost of the exam is \$165 USD, and there is a 15% discount available for Microsoft Certified Professionals (MCPs). The passing score for the exam is 700 out of 1000 points.

## Most Probable Real Microsoft Exam Questions in Microsoft AZ-400 PDF Format

Most of the study material providers fail to provide insight on the AZ-400 real exam questions to the candidates of certification exams. There is such scene with BraindumpStudy products. They are in fact made, keeping in mind the AZ-400 Actual Exam. Thus every AZ-400 exam dumps is set in line with the format of real exam and introduces the candidate to it perfectly.

## Microsoft Designing and Implementing Microsoft DevOps Solutions Sample Questions (Q305-Q310):

### NEW QUESTION # 305

You manage build and release pipelines by using Azure DevOps. Your entire managed environment resides in Azure.

You need to configure a service endpoint for accessing Azure Key Vault secrets. The solution must meet the following requirements: Ensure that the secrets are retrieved by Azure DevOps.

Avoid persisting credentials and tokens in Azure DevOps.

How should you configure the service endpoint? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

### Answer:

Explanation:

□ Reference:

<https://docs.microsoft.com/en-us/azure/devops/pipelines/tasks/deploy/azure-key-vault>

<https://docs.microsoft.com/en-us/azure/active-directory/managed-identities-azure-resources/overview>

### NEW QUESTION # 306

You are planning projects for three customers. Each customer's preferred process for work items is shown in the following table.

□ The customers all plan to use Azure DevOps for work item management.

Which work item process should you use for each customer? To answer, drag the appropriate work item process to the correct customers. Each work item process may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

□

### Answer:

Explanation:

□ Explanation:

□ Box 1: Scrum

Choose Scrum when your team practices Scrum. This process works great if you want to track product backlog items (PBIs) and bugs on the Kanban board, or break PBIs and bugs down into tasks on the taskboard.

Box 2: Agile

Choose Agile when your team uses Agile planning methods, including Scrum, and tracks development and test activities separately.

This process works great if you want to track user stories and (optionally) bugs on the Kanban board, or track bugs and tasks on the taskboard.

**Box 3: CMMI**

Choose CMMI when your team follows more formal project methods that require a framework for process improvement and an auditable record of decisions. With this process, you can track requirements, change requests, risks, and reviews.

**NEW QUESTION # 307**

You use Get for source control.

You delete a file, commit the changes, and continue to work.

You need to recover the deleted file.

Which three commands should you run in sequence? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

Explanation

**NEW QUESTION # 308**

You have several apps that use an Azure SQL Database named db1.

You need to ensure that queries to db1 are tuned by Azure over time. The solution must only apply to db1.

To complete this task, sign in to the Microsoft Azure portal.

**Answer:**

Explanation:

See solution below.

Explanation:

1. To enable automatic tuning on a single database, navigate to the database in the Azure portal and select Automatic tuning.

2. Select the automatic tuning options you want to enable and select Apply.

Note: Individual automatic tuning settings can be separately configured for each database. You can manually configure an individual automatic tuning option, or specify that an option inherits its settings from the server.

Reference:

<https://docs.microsoft.com/en-us/azure/azure-sql/database/automatic-tuning-enable>

**NEW QUESTION # 309**

You have an Azure Repos repository that contains large PSD files. You need to configure Git LFS to manage all the files.

How should you complete the script? To answer, drag the appropriate access levels to the correct groups. Each access level may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation

**NEW QUESTION # 310**

.....
