Pass Guaranteed Quiz 2026 VMCE_v12: Efficient Minimum Veeam Certified Engineer v12 Pass Score

From the view of specialized examination point, it is necessary to teach you tips about the exam. You need to outsmart, and do not give your future the chance of failure. TestPassKing is a great resource site. It includes Veeam VMCE_v12 Exam Materials, study materials and technical materials, as well as exam training and detailed explanation and answers. The website which provide exam information are surged in recent years. This may cause you clueless when you prepare the Veeam VMCE_v12 Exam. TestPassKing's Veeam VMCE_v12 exam training materials are effective training materials that proven by professionals and the candidates who passed the exam. It can help you to pass the exam certification easily.

Veeam Certified Engineer v12 Sample Questions (Q92-Q97):

NEW QUESTION # 92

A power outage on Site A is expected during the night. The disaster recovery strategy has been implemented (see diagram). What is the correct way to start replicated VMs on Site B to minimize data loss?

- A. Execute "Permanent failover" from vCenter.
- B. Execute "Planned failover".
- C. Power on VMs manually through vCenter.
- D. Execute "Failover plan".

Answer: B

Explanation:

A planned failover is a process that allows for the seamless switching from the original VMs at Site A to their replicas at Site B with no data loss. This is the correct course of action when a power outage is expected, as it is a controlled process that ensures that all data is synchronized before the switch is made. This action minimizes data loss and ensures that the VMs on Site B are up-to-date.

NEW QUESTION # 93

In the war against ransomware, a company decided to implement tape backup. The infrastructure contains VMware VMs and physical Windows servers. What is the most efficient approach to getting all servers onto tape?

- **A. Create backup jobs, then create backup to tape jobs.**
- B. Create file to tape jobs and write directly to tape.
- C. Create backup to tape jobs and write directly to tape.
- D. Create backup jobs, then create file to tape jobs.

Answer: A

Explanation:

The most efficient approach to getting all servers onto tape, considering there are both VMware VMs and physical Windows servers in the infrastructure, is to first create backup jobs that target both the VMs and the physical servers. After these backups are stored on a disk-based repository, you can then create backup to tape jobs. This method leverages Veeam's ability to handle both types of environments and ensures that all data is efficiently backed up to tape for offsite storage and ransomware protection.

NEW QUESTION # 94

An engineer has a NAS file share to protect.

What preliminary step must be taken to create a NAS backup job?

- A. Add a Managed Server with the IP address of the NAS Filer
- **B. Add a File Share under Inventory and choose NAS Filer**
- C. Register the file server under Storage Infrastructure in the VBR console
- D. Define file exclusions in the job

Answer: B

Explanation:

Before creating a NAS backup job, an engineer must add the NAS file share to the Veeam Backup & Replication (VBR) console under the Inventory section. This involves specifying the NAS Filer and the particular file share to be protected. This step allows Veeam to recognize the file share as a valid source for backup operations.

NEW QUESTION # 95

An administrator needs to dynamically add VMware VMs that have a custom application installed to a backup job, and also require an RPO of eight hours. How can this job be created?

- **A. Create a backup job based on vSphere tags.**
- B. Use the REST API to scan the VM inventory for machines that match the criteria.
- C. In Enterprise Manager, create a dynamic group of VMs that contain both tags.
- D. Modify a custom CSV file to be scanned before the start of each job.

Answer: A

NEW QUESTION # 96

The director of a business needs a folder of MS Office files restored from the corporate shared drive. This drive sits on a Windows VM backed up by Veeam Backup & Replication. The director wants the files restored to their original location and to replace the original files. What functionality will be used to restore the folder using the Veeam Guest OS restoration wizard?

- A. Restore the files using the "Hold" function. The director can then determine the status of the original and restored files.
- B. Restore the files using the "Replace" function. Original files will be removed.
- C. Restore the files using the "Keep" function. Original files will be untouched.
- **D. Restore the files using the "Overwrite" function. Original files will be removed.**

Answer: D
