100% Pass 500-220 - High-quality New Engineering Cisco Meraki Solutions Exam Camp

Now you do not need to worry about the relevancy and top standard of Exam4Docs Engineering Cisco Meraki Solutions (500-220) exam questions. These Cisco 500-220 dumps are designed and verified by qualified Engineering Cisco Meraki Solutions (500-220) exam trainers. Now you can trust Exam4Docs Engineering Cisco Meraki Solutions (500-220) practice questions and start preparation without wasting further time.

Cisco 500-220 certification exam focuses on testing the skills of individuals in designing, deploying, and managing Cisco Meraki cloud-based solutions. 500-220 exam is designed to test the candidate's knowledge of Cisco Meraki products and solutions, including wireless, switching, security, and enterprise mobility management. 500-220 exam is a comprehensive test of the candidates' skills in deploying and managing Cisco Meraki products.

Cisco 500-220 (Engineering Cisco Meraki Solutions) Certification Exam is a professional-level certification designed for network engineers who wish to demonstrate expertise in the implementation and management of Cisco Meraki solutions. 500-220 exam covers a range of topics, including Meraki architecture and design, network configuration and management, security and troubleshooting, and cloud-based networking.

Enhance Skills and Boost Confidence with Cisco 500-220 Practice Test Software

The software of 500-220 guide torrent boosts varied self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our 500-220 exam questions boost timing function and the function to stimulate the exam. Our product sets the timer to stimulate the exam to adjust the speed and keep alert. Our 500-220 test torrents have simplified the complicated notions and add the instances, the stimulation and the diagrams to explain any hard-to-explain contents. So it is worthy for you to buy our 500-220 exam questions.

Cisco 500-220 (Engineering Cisco Meraki Solutions) Exam is a certification exam that is designed to test the knowledge and skills of IT professionals in deploying and managing Cisco's Meraki solutions. It is a challenging exam that requires a strong understanding of Meraki solutions and their deployment. Candidates who pass the exam will be recognized as experts in Meraki solutions and will be able to demonstrate their skills to employers and clients.

Cisco Engineering Cisco Meraki Solutions Sample Questions (Q47-Q52):

NEW QUESTION # 47
Refer to the exhibit.
Which two actions are required to optimize load balancing asymmetrically with a 4:1 ratio between links?
(Choose two.)

- A. Change the primary uplink to "none".
- B. Set the speed of the cellular uplink to zero.
- C. Change the assigned speeds of WAN 1 and WAN 2 so that the ratio is 4:1.
- D. Enable load balancing.
- E. Add an internet traffic preference that defines the load-balancing ratio as 4:1.

Answer: C,D

Explanation:
Explanation
To clarify, to optimize load balancing asymmetrically with a 4:1 ratio between links, two actions that are required are:
Enable load balancing: This option allows the MX to use both of its uplinks for load balancing. When load balancing is enabled under Security & SD-WAN > Configure > SD-WAN & Traffic shaping, traffic flows will be distributed between the two uplinks proportional to the WAN 1 and WAN 2 bandwidths specified under Uplink configuration1.
Change the assigned speeds of WAN 1 and WAN 2 so that the ratio is 4:1: The assigned speed of a WAN link is a value that indicates the bandwidth available on that link. By changing the assigned speeds of WAN 1 and WAN 2 so that they reflect the desired load-balancing ratio, the administrator can ensure that the MX uses both links efficiently and proportionally1. For example, if WAN 1 has a bandwidth of 100 Mbps and WAN 2 has a bandwidth of 25 Mbps, then setting their assigned speeds to 100 Mbps and 25 Mbps respectively will achieve a 4:1 load-balancing ratio.

NEW QUESTION # 48
A customer wants to use Microsoft Azure to host corporate application servers.
Which feature does the customer get by using a vMX appliance rather than connecting directly to Azure by VPN?

- A. next-generation firewall
- B. SD-WAN
- C. malware protection
- D. intrusion prevention

Answer: B

Explanation:
Explanation
https://documentation.meraki.com/MX/MX_Installation_Guides/vMX_Setup_Guide_for_Microsoft_Azure

NEW QUESTION # 49
Which information do the MXs in a High Availability pair share?

- A. stateful firewall database
- B. spanning-tree state
- C. DHCP association database
- D. time synchronization state

Answer: B

NEW QUESTION # 50
What is out of scope when considering the Best practices for high-density wireless designs?

- A. maximum beamforming
- B. band selection
- C. number of SSIDs
- D. minimum bitrate

Answer: A

Explanation:
Explanation

NEW QUESTION # 51

Which information is used to calculate whether a WAN link has high usage?

- A. total number of devices that are actively passing traffic
- B. value under Security & SD WAN > SD WAN & Traffic Shaping > Uplink Configuration
- C. total historical throughput of an uplink
- D. data under Security & SD WAN > Appliance Status > Uplink > Live Data

Answer: B

Explanation:
Explanation
Which information is used to calculate whether a WAN link has high usage not how to view (To accurately identify high utilization, users must set the ISP-provided bandwidth limits under Security and SD-WAN > SD-WAN and Traffic Shaping > Uplink Configuration for each uplink. If the bandwidth usage is higher than
80% of the defined limit, it will mark that uplink as High Usage.)
