

2026 DP-203 Reliable Study Plan 100% Pass | High-quality DP-203: Data Engineering on Microsoft Azure 100% Pass

Mathematics						
2025-2026						
JUNIOR HIGH SCHOOL						
Name of the Teacher	ALVE MAE T. TORZAR		Grade Level	10	Section AQUAMARINE	
Quarter	3rd	Week Number	7	Date of Coverage		
I. OBJECTIVE						
A. Content Standards	The learner demonstrates understanding of key concepts of combinatorics and probability.					
B. Performance Standards	The learner is able to use precise counting technique and probability in formulating conclusions and making decisions.					
C. Most Essential Learning Competency	Illustrates the probability of a union of two events. (M10SP-IIIG-1) •Illustrates experiment, outcomes, sample space and event SEL: The learners evaluate the consequences of their actions in making decisions. CSE: The learners will understand the gender preference of others.					
D. Learning Objectives	By the end of the lesson, the learners 1.) Identify sample spaces for various experiments. 2.) Accurately count and list the number of occurrences of an outcome in an experiment. 3.) Value the importance of probability (sample space, events and outcomes) in real-life situations.					
E. Teaching Philosophy	Essentialism is an educational philosophy based on the belief that students should learn a core set of knowledge and skills to become productive members of the society. Constructivism is a student centered philosophy often built around inquiry, problem-solving, and hands-on activities. Existentialism in education is a student-centered philosophy that emphasizes individual freedom, choice, and self-determination.					
II. CONTENT						
A. Subject	Mathematics 10	Topic	Experiments, Sample Space, Simple Events, and Outcomes			
III. LEARNING RESOURCES						
A. References						
1. Lesson Exemplar for Mathematics	Grade 10	Other Learning Resources				
2. Learning Activity Sheet in Mathematics	Grade 10	Learn Test Statistics (2024, June 23) Sample Spaces, Events, and Their Probabilities Learn Test Statistics (2024, June 23) Sample Spaces, Events, and Their Probabilities Learn Test Statistics (2024, June 23) Sample Spaces, Events, and Their Probabilities Learn Test Statistics (2024, June 23) Sample Spaces, Events, and Their Probabilities Learn Test Statistics (2024, June 23) Sample Spaces, Events, and Their Probabilities				
3. Textbook Pages						
4. Additional Materials from Learning Resources (LRMDS) Portal						
IV. PROCEDURE						
Preliminary Activity	<ul style="list-style-type: none"> 4 Prayer 4 Checking of Attendance 4 Classroom Rules <ul style="list-style-type: none"> • Respect • Listen • Be Prepared • Be on time • Try your best • Have fun 4 Thought of the Day: <ul style="list-style-type: none"> “You cannot control all the events that happen to you, but you can decide not to be reduced by them.” — Maya Angelou 					Annotation

P.S. Free & New DP-203 dumps are available on Google Drive shared by TestPassKing: <https://drive.google.com/open?id=183Ja00JuNzwTx1LG3mf7OojzLmP69Hnr>

Microsoft DP-203 training materials have won great success in the market. Tens of thousands of the candidates are learning on our DP-203 practice engine. First of all, our Microsoft DP-203 study dumps cover all related tests about computers. It will be easy for you to find your prepared learning material. If you are suspicious of our DP-203 Exam Questions, you can download the free demo from our official websites.

Our excellent DP-203 study materials beckon exam candidates around the world with their attractive characters. Our experts made significant contribution to their excellence. So we can say bluntly that our DP-203 actual exam is the best. Our effort in building the content of our DP-203 Practice Questions lead to the development of practice materials and strengthen their perfection. So our DP-203 training prep is definitely making your review more durable.

>> DP-203 Reliable Study Plan <<

DP-203 New Dumps Book | Exam DP-203 Vce Format

The most attractive thing about a learning platform is not the size of his question bank, nor the amount of learning resources, but more importantly, it is necessary to have a good control over the annual propositional trend. The DP-203 quiz guide through

research and analysis of the annual questions, found that there are a lot of hidden rules are worth exploring, plus we have a powerful team of experts, so the rule can be summed up and use. The DP-203 prepare torrent can be based on the analysis of the annual questions, it is concluded that a series of important conclusions related to the DP-203 qualification examination, combining with the relevant knowledge of recent years, then predict the direction which can determine this year's DP-203 exam. DP-203 test material will improve the ability to accurately forecast the topic and proposition trend this year.

Microsoft Data Engineering on Microsoft Azure Sample Questions (Q293-Q298):

NEW QUESTION # 293

You have an Azure Stream Analytics job that is a Stream Analytics project solution in Microsoft Visual Studio. The job accepts data generated by IoT devices in the JSON format.

You need to modify the job to accept data generated by the IoT devices in the Protobuf format.

Which three actions should you perform from Visual Studio on sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer Area
Change the Event Serialization Format to Protobuf in the input.json file of the job and reference the DLL.	
Add an Azure Stream Analytics Custom Deserializer Project (.NET) project to the solution.	
Add .NET deserializer code for Protobuf to the custom deserializer project.	
Add .NET deserializer code for Protobuf to the Stream Analytics project.	
Add an Azure Stream Analytics Application project to the solution.	

Answer:

Explanation:

Actions	Answer Area
Change the Event Serialization Format to Protobuf in the input.json file of the job and reference the DLL.	
Add an Azure Stream Analytics Custom Deserializer Project (.NET) project to the solution.	
Add .NET deserializer code for Protobuf to the custom deserializer project.	
Add .NET deserializer code for Protobuf to the Stream Analytics project.	
Add an Azure Stream Analytics Application project to the solution.	

Explanation:

Add an Azure Stream Analytics Custom Deserializer Project (.NET) project to the solution.

Add .NET deserializer code for Protobuf to the custom deserializer project.

Add an Azure Stream Analytics Application project to the solution.

Step 1: Add an Azure Stream Analytics Custom Deserializer Project (.NET) project to the solution.

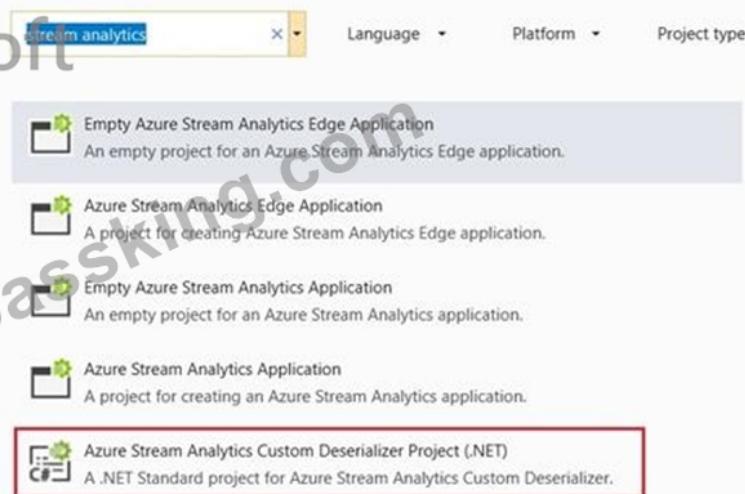

Create a custom deserializer

1. Open Visual Studio and select File > New > Project. Search for Stream Analytics and select Azure Stream Analytics Custom Deserializer Project (.NET). Give the project a name, like ProtobufDeserializer.

Create a new project

Recent project templates

A list of your recently accessed templates will be displayed here.

2. In Solution Explorer, right-click your ProtobufDeserializer project and select Manage NuGet Packages from the menu. Then install the Microsoft.Azure.StreamAnalytics and Google.Protobuf.NuGet packages.

3. Add the MessageBodyProto class and the MessageBodyDeserializer class to your project.

4. Build the ProtobufDeserializer project.

Step 2: Add .NET deserializer code for Protobuf to the custom deserializer project Azure Stream Analytics has built-in support for three data formats: JSON, CSV, and Avro. With custom .NET deserializers, you can read data from other formats such as Protocol Buffer, Bond and other user defined formats for both cloud and edge jobs.

Step 3: Add an Azure Stream Analytics Application project to the solution Add an Azure Stream Analytics project

* In Solution Explorer, right-click the ProtobufDeserializer solution and select Add > New Project. Under Azure Stream Analytics > Stream Analytics, choose Azure Stream Analytics Application. Name it ProtobufCloudDeserializer and select OK.

* Right-click References under the ProtobufCloudDeserializer Azure Stream Analytics project. Under Projects, add Protobuf Deserializer. It should be automatically populated for you.

Reference:

<https://docs.microsoft.com/en-us/azure/stream-analytics/custom-deserializer>

NEW QUESTION # 294

You have an Azure Synapse Analytics dedicated SQL pool named pool1.

You plan to implement a star schema in pool1 and create a new table named DimCustomer by using the following code.

```

CREATE TABLE dbo.[DimCustomer](
    [CustomerKey] int NOT NULL,
    [CustomerSourceID] [int] NOT NULL,
    [Title] [nvarchar](8) NULL,
    [FirstName] [nvarchar](50) NOT NULL,
    [MiddleName] [nvarchar](50) NULL,
    [LastName] [nvarchar](50) NOT NULL,
    [Suffix] [nvarchar](10) NULL,
    [CompanyName] [nvarchar](128) NULL,
    [SalesPerson] [nvarchar](256) NULL,
    [EmailAddress] [nvarchar](50) NULL,
    [Phone] [nvarchar](15) NULL,
    [InsertedDate] [datetime] NOT NULL,
    [ModifiedDate] [datetime] NOT NULL,
    [HashKey] [varchar](100) NOT NULL,
    [IsCurrentRow] [bit] NOT NULL
)
WITH
(
    DISTRIBUTION = REPLICATE,
    CLUSTERED COLUMNSTORE INDEX
);
GO

```

You need to ensure that DimCustomer has the necessary columns to support a Type 2 slowly changing dimension (SCD). Which two columns should you add? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. [EffectiveStartDate] [datetime] NOT NULL
- B. [RowID] [bigint] NOT NULL
- C. [EffectiveEndDate] [datetime] NOT NULL
- D. [HistoricalSalesPerson] [nvarchar](256) NOT NULL
- E. [PreviousModifiedDate] [datetime] NOT NULL

Answer: C,D

NEW QUESTION # 295

You are implementing an Azure Stream Analytics solution to process event data from devices.

The devices output events when there is a fault and emit a repeat of the event every five seconds until the fault is resolved. The devices output a heartbeat event every five seconds after a previous event if there are no faults present.

A sample of the events is shown in the following table.

DeviceID	EventType	EventTime
78cc5ht9-w357-684r-w4fr-kr16h6p9874e	HeartBeat	2020-12-01T19:00.000Z
78cc5ht9-w357-684r-w4fr-kr16h6p9874e	HeartBeat	2020-12-01T19:05.000Z
78cc5ht9-w357-684r-w4fr-kr16h6p9874e	TemperatureSensorFault	2020-12-01T19:07.000Z

You need to calculate the uptime between the faults.

How should you complete the Stream Analytics SQL query? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

```
SELECT  
DeviceID,  
MIN(EventTime) as StartTime,  
MAX(EventTime) as EndTime,  
DATEDIFF(second, MIN(EventTime), MAX(EventTime)) AS duration_in_seconds  
FROM input TIMESTAMP BY EventTime
```

```
WHERE EventType='HeartBeat'  
WHERE LAG(EventType, 1) OVER (LIMIT DURATION(second,5)) <> EventType  
WHERE IsFirst(second,5) = 1
```

```
GROUP BY
```

```
DeviceID
```

```
,SessionWindow(second, 5, 50000) OVER (PARTITION BY DeviceID)  
,TumblingWindow(second,5)  
HAVING DATEDIFF(second, MIN(EventTime), MAX(EventTime)) > 5
```

Answer:

Explanation:

```
SELECT  
DeviceID,  
MIN(EventTime) as StartTime,  
MAX(EventTime) as EndTime,  
DATEDIFF(second, MIN(EventTime), MAX(EventTime)) AS duration_in_seconds  
FROM input TIMESTAMP BY EventTime
```

```
WHERE EventType='HeartBeat'  
WHERE LAG(EventType, 1) OVER (LIMIT DURATION(second,5)) <> EventType  
WHERE IsFirst(second,5) = 1
```

```
GROUP BY
```

```
DeviceID
```

```
,SessionWindow(second, 5, 50000) OVER (PARTITION BY DeviceID)  
,TumblingWindow(second,5)  
HAVING DATEDIFF(second, MIN(EventTime), MAX(EventTime)) > 5
```

Reference:

<https://docs.microsoft.com/en-us/stream-analytics-query/session-window-azure-stream-analytics>
<https://docs.microsoft.com/en-us/stream-analytics-query/tumbling-window-azure-stream-analytics>

NEW QUESTION # 296

You are building a database in an Azure Synapse Analytics serverless SQL pool.
You have data stored in Parquet files in an Azure Data Lake Storage Gen2 container.
Records are structured as shown in the following sample.

```
{  
  "id": 123,  
  "address_housenumber": "19c",  
  "address_line": "Memory Lane",  
  "applicant1_name": "Jane",  
  "applicant2_name": "Dev"  
}
```

The records contain two applicants at most.

You need to build a table that includes only the address fields.

How should you complete the Transact-SQL statement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

```
CREATE EXTERNAL TABLE applications  
CREATE TABLE  
CREATE VIEW  
WITH (  
    LOCATION = 'applications/',  
    DATA_SOURCE = applications_ds,  
    FILE_FORMAT = applications_file_format  
)  
AS  
SELECT id, [address_housenumber] as addresshousenumber, [address_line1] as addressline1  
FROM  
    (BULK 'https://contosol1.dfs.core.windows.net/applications/year=*/*.parquet'  
CROSS APPLY  
OPENJSON  
OPENROWSET  
FORMAT='PARQUET') AS [r]  
GO
```

Answer:

Explanation:

Answer Area

```
CREATE EXTERNAL TABLE applications  
CREATE TABLE  
CREATE VIEW  
WITH (  
    LOCATION = 'applications/',  
    DATA_SOURCE = applications_ds,  
    FILE_FORMAT = applications_file_format  
)  
AS  
SELECT id, [address_housenumber] as addresshousenumber, [address_line1] as addressline1  
FROM  
    (BULK 'https://contosol1.dfs.core.windows.net/applications/year=*/*.parquet'  
CROSS APPLY  
OPENJSON  
OPENROWSET  
FORMAT='PARQUET') AS [r]  
GO
```

Explanation

Box 1: CREATE EXTERNAL TABLE

An external table points to data located in Hadoop, Azure Storage blob, or Azure Data Lake Storage. External tables are used to read data from files or write data to files in Azure Storage. With Synapse SQL, you can use external tables to read external data

using dedicated SQL pool or serverless SQL pool.

Syntax:

CREATE EXTERNAL TABLE { database_name.schema_name.table_name | schema_name.table_name | table_name } (<column_definition> [...n]) WITH (LOCATION = 'folder_or_filepath', DATA_SOURCE = external_data_source_name, FILE_FORMAT = external_file_format_name)

Box 2. OPENROWSET When using serverless SQL pool, CETAS is used to create an external table and export query results to Azure Storage Blob or Azure Data Lake Storage Gen2.

Example:

AS

```
SELECT decennialTime, stateName, SUM(population) AS population
FROM
OPENROWSET(BULK
'https://azureopendatastorage.blob.core.windows.net/censusdatacontainer/release/us_population_county/year=/*'
FORMAT=PARQUET) AS [r] GROUP BY decennialTime, stateName GO
Reference:
https://docs.microsoft.com/en-us/azure/synapse-analytics/sql/develop-tables-external-tables
```

NEW QUESTION # 297

You have an Azure Data Factory pipeline that has the activity shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

Answer Area

Stored procedure1 will execute if Web1 and Set variable1 [answer choice].

complete
fail
succeed

These are the selections for the statement Stored procedure1 will execute if Web1 and Set variable1 [answer choice].

If Web1 fails and Set variable2 succeeds, the pipeline status will be [answer choice].

Canceled
Failed
Succeeded

These are the selections for the statement If Web1 fails and Set variable2 succeeds, the pipeline status will be [answer choice].

Answer:

Explanation:

Answer Area

Stored procedure1 will execute if Web1 and Set variable1 [answer choice].

complete
fail
succeed

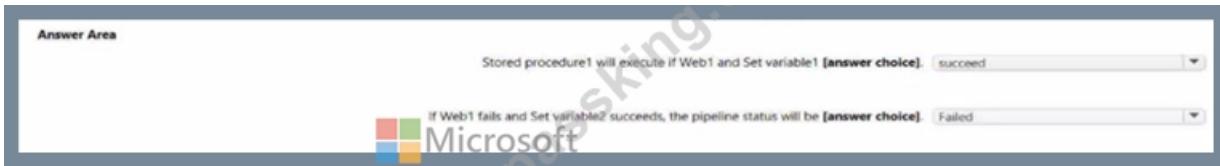

These are the selections for the statement Stored procedure1 will execute if Web1 and Set variable1 [answer choice].

If Web1 fails and Set variable2 succeeds, the pipeline status will be [answer choice].

Canceled
Failed
Succeeded

These are the selections for the statement If Web1 fails and Set variable2 succeeds, the pipeline status will be [answer choice].
