

Mule-Arch-201최신인증시험덤프데모, Mule-Arch-201 시험대비덤프최신샘플

참고: ExamPassdump에서 Google Drive로 공유하는 무료, 최신 Mule-Arch-201 시험 문제집이 있습니다:
<https://drive.google.com/open?id=1WyZcZhgBR6GYKwyzd69LiWa62eSqBdrR>

Salesforce Mule-Arch-201인증시험패스는 아주 어렵습니다. 자기에맞는 현명한 학습자료선택은 성공을 내딛는 첫발입니다. 퍼펙트한 자료만의 시험에 성공할 수 있습니다. Pass4Tes시험문제와 답이야 말로 퍼펙트한 자료이죠. 우리 Salesforce Mule-Arch-201인증시험자료는 100%보장을 드립니다. 또한 구매 후 일년무료 업데이트버전을 받을 수 있는 기회를 얻을 수 있습니다.

제일 빠른 시일내에 제일 간단한 방법으로Salesforce인증 Mule-Arch-201시험을 패스하는 방법이 없냐구요? ExamPassdump의Salesforce인증 Mule-Arch-201덤프를 공부하시면 가능합니다. ExamPassdump의Salesforce인증 Mule-Arch-201덤프는 많은 분들이 검증한 가장 유력한Salesforce인증 Mule-Arch-201시험공부자료입니다. 덤프의 문제만 기억하시면 패스는 문제없기에 제일 빠른 시일내에 시험을 패스하여 자격증 취득이 가능합니다.

>> Mule-Arch-201최신 인증시험 덤프데모 <<

Mule-Arch-201시험대비 덤프 최신 샘플 - Mule-Arch-201퍼펙트 덤프데모 문제 다운

경쟁율이 치열한 IT업계에서 아무런 목표없이 아무런 희망없이 무미건조한 생활을 하고 계시나요? 다른 사람들이

모두 취득하고 있는 자격증에 관심도 없는 분은 치열한 경쟁속에서 살아남기 어렵습니다. Salesforce인증 Mule-Arch-201시험패스가 힘들다한들 ExamPassdump덤프만 있으면 어려운 시험도 쉬워질수 밖에 없습니다. Salesforce인증 Mule-Arch-201덤프에 있는 문제만 잘 이해하고 습득하신다면 Salesforce인증 Mule-Arch-201시험을 패스하여 자격증을 취득해 자신의 경쟁력을 업그레이드하여 경쟁시대에서 안전감을 보유할수 있습니다.

최신 Salesforce MuleSoft Mule-Arch-201 무료샘플문제 (Q115-Q120):

질문 # 115

An organization wants to make sure only known partners can invoke the organization's APIs. To achieve this security goal, the organization wants to enforce a Client ID Enforcement policy in API Manager so that only registered partner applications can invoke the organization's APIs. In what type of API implementation does MuleSoft recommend adding an API proxy to enforce the Client ID Enforcement policy, rather than embedding the policy directly in the application's JVM?

- A. A Non-Mule application
- B. A Mule 3 application using APIkit
- C. A Mule 3 or Mule 4 application modified with custom Java code
- D. A Mule 4 application with an API specification

정답: A

설명:

Correct Answer: A Non-Mule application

>> All type of Mule applications (Mule 3/ Mule 4/ with APIkit/ with Custom Java Code etc) running on Mule Runtimes support the Embedded Policy Enforcement on them.

>> The only option that cannot have or does not support embedded policy enforcement and must have API Proxy is for Non-Mule Applications.

So, Non-Mule application is the right answer.

질문 # 116

An organization wants to create a Center for Enablement (C4E). The IT director schedules a series of meetings with IT senior managers.

What should be on the agenda of the first meeting?

- A. Define C4E objectives, mission statement, guiding principles, a
- B. Explore API monetization options based on identified use cases through MuleSoft
- C. A walk through of common-services best practices for logging, auditing, exception handling, caching, security via policy, and rate limiting/throttling via policy
- D. Specify operating model for the MuleSoft Integrations division

정답: A

설명:

In the initial meeting for establishing a Center for Enablement (C4E), it's essential to lay the foundational vision, objectives, and guiding principles for the team. Here's why this is crucial:

Clear Vision and Mission:

Defining the mission statement and objectives at the start ensures alignment within the organization and clarifies the C4E's role in supporting API-led development and integration practices.

Guiding Principles:

Establishing guiding principles will help the C4E maintain consistent practices and strategies across projects. This serves as a framework for decisions and fosters shared understanding among IT leaders and stakeholders.

of Correct Answer (A):

By prioritizing the C4E's objectives and mission, the organization builds a solid foundation, paving the way for subsequent meetings focused on technical standards, processes, and operating models.

of Incorrect Options:

Option B (API monetization) and Option C (common services best practices) are specific topics better suited for later discussions. Option D (specifying the operating model) is an important step but typically follows the establishment of the C4E's objectives and vision.

Reference

For more on C4E objectives and foundational setup, refer to MuleSoft's documentation on establishing a C4E and the roles and

mission statements recommended for such initiatives.

질문 # 117

A company is using an on-prem cluster in the data center as a runtime plane and MuleSoft-hosted control plane. How can the company monitor the detailed performance metrics on the Mule applications deployed to the cluster from the control plane?

- A. The settings of the Monitoring section in the control plane must be updated to enable detailed logging on the metrics to be captured
- B. Due to the potential performance impact on the runtime nodes, the Monitoring agent should be installed on a separate server
- C. Monitoring Agent must be installed on each node in the cluster
- D. There is no action needed as the on-prem runtime automatically sends the performance data to the control plane

정답: C

설명:

Monitoring On-Premise Mule Applications:

For Mule applications deployed on an on-premises cluster, monitoring detailed performance metrics requires communication with the MuleSoft-hosted control plane. The control plane, when used with on-premises runtimes, relies on Anypoint Monitoring and requires a Monitoring Agent to gather and send detailed performance metrics.

Setting Up Monitoring:

To enable detailed metrics, the Monitoring Agent must be installed on each node in the cluster where Mule applications are deployed. This agent collects data on memory usage, CPU load, response times, and other metrics, and sends it to the control plane for aggregation and visualization.

Evaluating the Options:

Option A: Updating settings in the control plane alone does not enable detailed monitoring; the agent must be installed on each node to capture detailed metrics.

Option B (Correct Answer): Installing the Monitoring Agent on each node ensures that each runtime node in the cluster can send its metrics to the control plane, enabling detailed monitoring.

Option C: Installing the agent on a separate server would not be effective, as each node in the cluster needs to independently report its metrics to ensure full visibility.

Option D: The on-prem runtime does not automatically send detailed metrics to the control plane without the Monitoring Agent installed.

Conclusion:

Option B is the correct answer, as installing the Monitoring Agent on each node is essential for detailed performance monitoring of on-prem applications in a cluster.

Refer to MuleSoft's documentation on configuring Anypoint Monitoring for on-premises deployments and using the Monitoring Agent.

질문 # 118

The application network is recomposable: it is built for change because it "bends but does not break"

- A. FALSE
- B. TRUE

정답: B

설명:

>> Application Network is a disposable architecture.

>> Which means, it can be altered without disturbing entire architecture and its components.

>> It bends as per requirements or design changes but does not break

질문 # 119

A company stores financial transaction data in two legacy systems. For each legacy system, a separate, dedicated System API (SAPI) exposes data for that legacy system. A Process API (PAPI) merges the data retrieved from all of the System APIs into a

common format. Several API clients call the PAPI through its public domain name.

The company now wants to expose a subset of financial data to a newly developed mobile application that uses a different Bounded Context Data Model. The company wants to follow MuleSoft's best practices for building out an effective application network. Following MuleSoft's best practices, how can the company expose financial data needed by the mobile application in a way that minimizes the impact on the currently running API clients, API implementations, and support asset reuse?

- A. Add two new Experience APIs (EAPI-1 and EAPI-2).
Add Mobile PAPI-2 to expose the Intended subset of financial data as requested.
Both PAPIs access the Legacy Systems via SAPI-1 and SAPI-2.
- B. Add two new Experience APIs (EAPI-1 and EAPI-2).
Add Mobile PAPI-2 to expose the Intended subset of financial data as requested.
Both PAPIs access the Legacy Systems via SAPI-1 and SAPI-2.
- C. Create a new mobile Experience API (EAPI) that exposes that subset of PAPI endpoints.
Add transformation logic to the mobile Experience API implementation to make mobile data compatible with the required PAPIs.

- D. Develop and deploy a new PAPI implementation with data transformation and ... logic to support this required endpoints of both mobile and web clients.
Deploy an API Proxy with an endpoint from API Manager that redirects the existing PAPI endpoints to the new PAPI.

정답: B

설명:

To achieve the goal of exposing financial data to a new mobile application while following MuleSoft's best practices, the company should follow an API-led connectivity approach. This approach ensures minimal disruption to existing clients, maximizes reusability, and respects the separation of concerns across API layers.

of Solution:

Experience APIs for Client-Specific Requirements:

Create two new Experience APIs (EAPI-1 and EAPI-2) for the mobile application, tailored to meet the specific data and format requirements of the mobile application. These APIs encapsulate the client-specific needs and provide a custom interface without impacting other clients.

Process API Layer for Data Transformation:

By adding Mobile PAPI-2, we allow the mobile application to access the required subset of data, formatted according to the mobile application's requirements. This approach ensures that data transformation and aggregation are handled in the Process layer, maintaining consistency and reusability across different applications.

Reuse of System APIs:

Both the new Mobile PAPI-2 and existing PAPI-1 access data from System APIs (SAPI-1 and SAPI-2), which continue to expose data from each legacy system in a consistent, reusable manner. This avoids duplicating logic and ensures that data access remains centralized and manageable.

Why Option A is Correct:

Option A aligns with MuleSoft's best practices by isolating client-specific requirements in the Experience layer, utilizing Process APIs for data orchestration and transformation, and maintaining reusable System APIs for backend access.

This approach also ensures that the current API clients are not impacted, as new clients (e.g., the mobile app) interact with newly defined Experience APIs without modifying the existing API setup.

of Incorrect Options:

Option B: This option seems similar but lacks clarity on the separation of mobile-specific requirements and does not explicitly mention data transformation, which is essential in this scenario.

Option C: Creating a single mobile Experience API that exposes a subset of PAPI endpoints directly adds unnecessary complexity and may violate the separation of concerns, as transformation logic should not be in the Experience layer.

Option D: Deploying a new PAPI and using an API Proxy to redirect existing endpoints would add unnecessary complexity, disrupt the current API clients, and increase maintenance efforts.

Reference

For additional guidance, refer to MuleSoft documentation on API-led connectivity best practices and best practices for structuring Experience, Process, and System APIs.

질문 # 120

.....

ExamPassdump에서 제공하는 제품들은 품질이 아주 좋으며 또 업뎃속도도 아주 빠릅니다 만약 우리가 제공하는 Salesforce Mule-Arch-201인증시험관련 덤프를 구매하신다면Salesforce Mule-Arch-201시험은 손쉽게 성공적으로 패스하실 수 있습니다.

Mule-Arch-201시험대비 덤프 최신 샘플 : https://www.exampassdump.com/Mule-Arch-201_valid-braindumps.html

ExamPassdump는 제일 전면적인Salesforce Mule-Arch-201인증시험자료의 문제와 답을 가지고 있습니다, ExamPassdump Mule-Arch-201시험대비 덤프 최신 샘플의 도움을 받겠다고 하면 우리는 무조건 최선을 다하여 한번에 패스하도록 도와드릴 것입니다, Salesforce인증 Mule-Arch-201덤프는 실제Salesforce인증 Mule-Arch-201시험문제에 초점을 맞추어 제작한 최신버전 덤프로서 시험패스율이 100%에 달합니다, Mule-Arch-201시험문제가 바뀌면 덤프도 업데이트하여 고객님의 최신버전을 무료로 발송해드리는데 만약 Mule-Arch-201시험에서 떨어지면 구매일로부터 60일내에 환불신청하시면 덤프비용 전액을 환불처리해드립니다, Salesforce Mule-Arch-201인증시험은 전문적인 관련지식을 테스트하는 인증시험입니다.

오늘 밤에는 아프지 마, 천무진은 숨기지 않고 적의를 드러내는 당자윤을 가만히 바라봤다, ExamPassdump는 제일 전면적인Salesforce Mule-Arch-201인증시험자료의 문제와 답을 가지고 있습니다, ExamPassdump의 도움을 받겠다고 하면 우리는 무조건 최선을 다하여 한번에 패스하도록 도와드릴 것입니다.

퍼펙트한 Mule-Arch-201최신 인증시험 덤프데모 최신버전 덤프자료

Salesforce인증 Mule-Arch-201덤프는 실제Salesforce인증 Mule-Arch-201시험문제에 초점을 맞추어 제작한 최신버전 덤프로서 시험패스율이 100%에 달합니다, Mule-Arch-201시험문제가 바뀌면 덤프도 업데이트하여 고객님의 최신 버전을 무료로 발송해드리는데 만약 Mule-Arch-201시험에서 떨어지면 구매일로부터 60일내에 환불신청하시면 덤프비용 전액을 환불처리해드립니다.
