

# **100% Pass SAP - C-BCBTP-2502 - Updated New SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Exam Objectives**

BONUS!!! Download part of Itcerttest C-BCBTP-2502 dumps for free: <https://drive.google.com/open?id=16msK5iQtwehXw2CiryA1zPGWG3E99JH>

No matter you are exam candidates of high caliber or newbies, our SAP C-BCBTP-2502 exam quiz will be your propulsion to gain the best results with least time and reasonable money. Not only because the outstanding content of SAP C-BCBTP-2502 Real Dumps that produced by our professional expert but also for the reason that we have excellent vocational moral to improve our SAP C-BCBTP-2502 learning materials quality.

In order to let you have a deep understanding of our C-BCBTP-2502 learning guide, our company designed the free demos for our customers. We will provide you with free demos of our study materials before you buy our products. If you want to know our C-BCBTP-2502 training materials, you can download them from the web page of our company. If you use the free demos of our C-BCBTP-2502 study engine, you will find that our products are very useful for you to pass your C-BCBTP-2502 exam and get the certification.

## **C-BCBTP-2502 VCE dumps: SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite & C-BCBTP-2502 test prep**

Learning our C-BCBTP-2502 study materials will fulfill your dreams. Nothing will stop you as long as you are rich. Also, respect and power is gained through knowledge and skills. If you want to get a higher position in the company, you must have the ability to defeat other excellent colleagues. Just come to our website and pick the C-BCBTP-2502 training engine. And you will become the best with our C-BCBTP-2502 learning questions.

## SAP C-BCBTP-2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.</li></ul>

## SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Sample Questions (Q33-Q38):

### NEW QUESTION # 33

Which of the following are key products of SAP Business Technology Platform (SAP BTP)? (Choose two).

- A. SAP HANA Cloud
- B. SAP Integration Suite
- C. SAP Ariba
- D. SAP SuccessFactors

**Answer: A,B**

Explanation:

SAP Business Technology Platform (SAP BTP) is organized into four primary functional pillars: Database and Data Management, Analytics, Application Development and Integration, and Intelligent Technologies.

SAP HANA Cloud serves as the foundation of the Database and Data Management pillar, providing a single, integrated powerhouse for all enterprise data. It offers the speed of in-memory processing combined with the scalability of the cloud, allowing businesses to manage large volumes of data while providing a "single source of truth." On the other hand, SAP Integration Suite is the cornerstone of the Integration pillar. It is an integration platform-as-a-service (iPaaS) that allows organizations to seamlessly connect SAP and non-SAP applications, whether they reside on-premise or in the cloud. It provides pre-built content and connectors that significantly reduce the complexity of landscape orchestration. In contrast, SAP Ariba and SAP SuccessFactors are specialized Software-as-a-Service (SaaS) applications. While they are part of the broader SAP ecosystem and often run on or integrate via BTP, they are considered line-of-business (LoB) solutions rather than core components of the technology platform itself. Understanding this distinction is vital for positioning BTP as the underlying "glue" that enables the "Intelligent Enterprise" strategy by providing the technical tools necessary to extend and integrate these LoB applications.

### NEW QUESTION # 34

What is the key advantage of using SAP Business Application Studio?

- A. Requires on-premise deployment for all applications.
- B. Provides a cloud-native development environment with modern tooling.
- C. Restricts the use of external DevOps integrations.
- D. Eliminates the need for full-stack development.

**Answer: B**

Explanation:

SAP Business Application Studio (BAS) is the next-generation development environment on SAP BTP, evolving from the previous SAP Web IDE. Its primary advantage lies in providing a cloud-native development environment that mimics a local desktop experience while being accessible entirely via a web browser. It is built on the open-source "Theia" framework (similar to VS Code),

which allows developers to use modern tooling, terminal access, and a wide array of extensions tailored specifically for SAP-centric development, such as SAP Fiori, SAP Cloud Application Programming Model (CAP), and mobile development. Positioning BAS as a core part of the SAP Business Suite ecosystem is crucial because it simplifies the "setup" phase of development. Developers no longer need to configure complex local environments; instead, they use pre-configured "Dev Spaces" optimized for specific business scenarios. This ensures consistency across development teams and streamlines the path from coding to deployment on the SAP BTP Cloud Foundry or Kyma runtimes. By integrating seamlessly with Git for version control and supporting standard DevOps practices, BAS allows enterprises to modernize their development lifecycle, moving away from legacy monolithic structures toward agile, microservices-based extensions that enhance the core SAP landscape without disrupting it.

#### NEW QUESTION # 35

Which of the following SAP BTP components enhances enterprise data governance?

- A. SAP AppGyver
- B. SAP Concur
- C. SAP Data Intelligence
- D. SAP BusinessObjects BI

**Answer: C**

Explanation:

Data governance is the practice of ensuring that data is accurate, available, and secure across an organization.

SAP Data Intelligence is the primary component within SAP BTP that addresses this need. It provides advanced metadata management and data cataloging capabilities, which are the foundations of governance. A data catalog acts like a "search engine" for enterprise data, allowing users to understand the origin (lineage), quality, and sensitivity of the information they are working with. In a complex SAP Business Suite environment, data often moves through multiple stages and systems. SAP Data Intelligence tracks this "data lineage," showing how data was transformed as it moved from an ERP system to a reporting dashboard. This transparency is crucial for regulatory compliance (like GDPR) and for building trust in the data used for decision-making. If a financial report looks incorrect, governance tools allow IT to trace the data back to its source to find the error. By positioning Data Intelligence as the governance hub, SAP BTP ensures that the "Intelligent Enterprise" is built on a foundation of high-quality, trusted data. This is a significant differentiator from tools like SAP BusinessObjects (which focuses on reporting) or SAP Concur (which focuses on expenses), as Data Intelligence provides the underlying control layer for the entire data ecosystem.

#### NEW QUESTION # 36

Which of the following capabilities does SAP AI Core provide?

- A. Transactional data management for ERP systems.
- B. Predictive analytics and machine learning model deployment.
- C. Hardware infrastructure for AI development.
- D. Strictly rule-based automation without AI capabilities.

**Answer: B**

Explanation:

SAP AI Core is a vital service within the "Intelligent Technologies" pillar of SAP BTP, designed to handle the heavy lifting of artificial intelligence at an enterprise scale. Its primary capability is providing a standardized, highly scalable runtime for predictive analytics and machine learning (ML) model deployment. In the modern SAP Business Suite, "intelligence" is no longer just a buzzword; it is a functional requirement. SAP AI Core allows businesses to take raw data from their systems, train sophisticated models, and then deploy those models into production environments where they can serve real-time predictions.

This service is unique because it supports the full lifecycle of an AI model, including execution and monitoring. It allows developers to integrate AI features into their applications while maintaining "AI Ethics" and transparency, which are critical for enterprise compliance. Unlike standard transactional databases that focus on record-keeping, SAP AI Core focuses on "inference"-using data to generate new insights and automate complex decisions. By positioning SAP AI Core as the engine for intelligence, SAP BTP ensures that organizations can move beyond basic automation toward advanced, self-learning processes that improve over time, such as predictive maintenance in manufacturing or intelligent lead scoring in sales.

#### NEW QUESTION # 37

Which SAP BTP product is critical for financial forecasting and analytics?

- **A. SAP HANA Cloud**
- B. SAP Business Network
- C. SAP Ariba
- D. SAP Fieldglass

**Answer: A**

Explanation:

For financial forecasting to be effective, it requires the ability to process massive amounts of historical and real-time data with extreme speed. SAP HANA Cloud is the critical foundational product on SAP BTP that enables this. As a cloud-native, in-memory database, it allows for the convergence of transactional (OLTP) and analytical (OLAP) processing. This means that finance teams can run complex forecasting models directly on live transactional data without the need for time-consuming data transfers to separate data warehouses.

In the context of the SAP Business Suite, SAP HANA Cloud acts as the "single source of truth." It provides the high-performance data engine required by tools like SAP Analytics Cloud to perform predictive modeling and "what-if" simulations. Whether a company is predicting cash flow, modeling market volatility, or performing year-end consolidations, HANA Cloud ensures that the underlying data is accessible and processed in sub-seconds. This capability is essential for modern finance departments that must move from descriptive analytics (what happened) to predictive and prescriptive analytics (what will happen and what should we do). While Ariba and Fieldglass provide the source data for procurement and contingent labor, it is SAP HANA Cloud that provides the computational power necessary to turn that data into strategic financial insights.

## NEW QUESTION # 38

.....

We will provide 24-hour online service for you on our C-BCBTP-2502 exam questions. If you can't decide what kind of C-BCBTP-2502 exam practice to choose, you shall have a chance to consult us, You can ask the questions that you want to know about our C-BCBTP-2502 Study Guide, we will listen to you carefully, according to your C-BCBTP-2502 exam, we guarantee to meet your requirements without wasting your purchasing funds.
