Latest Experience-Cloud-Consultant Exam Simulator, Reliable Experience-Cloud-Consultant Exam Tips

Different from other similar education platforms, the Experience-Cloud-Consultant study materials will allocate materials for multi-plate distribution, rather than random accumulation without classification. How users improve their learning efficiency is greatly influenced by the scientific and rational design and layout of the learning platform. The Experience-Cloud-Consultant study materials are absorbed in the advantages of the traditional learning platform and realize their shortcomings, so as to develop the Experience-Cloud-Consultant Study Materials more suitable for users of various cultural levels. If just one or two plates, the user will inevitably be tired in the process of learning on the memory and visual fatigue, and the Experience-Cloud-Consultant study materials provided many study parts of the plates is good enough to arouse the enthusiasm of the user, allow the user to keep attention of highly concentrated.

Salesforce Certified Experience Cloud Consultant Sample Questions (Q135-Q140):

NEW QUESTION # 135

A manager at Ursa Major Solar is responsible for creating and editing only the community users for the Partner Community they have recently set up using Experience Cloud. However, the manager is able to make organizational changes to the user records of the internal users as well.

What could be the possible issue here?

- A. The manager has been given the Manage Profiles and Permission Sets permission.
- **B. The manager has been given the Manage User permission.**
- C. The manager has been given the Manage Customer Users permission.
- D. The manager has been given the Manage External Users permission.

Answer: B

Explanation:

This permission allows the manager to create, edit, and delete all users in the org, including internal users.

This permission overrides the sharing settings and role hierarchy that normally restrict access to user records. To limit the manager's access to only community users, the manager should be given the Manage External Users permission instead.

NEW QUESTION # 136

Cloud Kicks has recently rolled out a new Experience Cloud site for its customers. The site has been activated and the contacts have been enabled as customer users. However, none of the users received their login credentials in an email.

What caused this issue?

- A. The welcome emails were not enabled for the site.
- B. The roles were not enabled for the users.
- **C. The sender's email address was changed and not verified.**
- D. The sender's email address was changed while it was pending verification.

Answer: C

Explanation:

One possible cause of this issue is that the sender's email address was changed and not verified. The sender's email address is the email address that appears as the sender of the welcome emails to the customer users. If the sender's email address is changed, it needs to be verified by clicking on a link in a verification email. If the verification is not completed, the welcome emails will not be sent.

NEW QUESTION # 137

Northern Trail Outfitters (NTO) aims to provide personalization by encouraging its individual customers to self-register in its B2C Experience site. NTO is not looking to create a placeholder account.

NTO Experience consultant has set up self-registration in its Login and Registration pages. NTO's site manager has configured the "Allow external users to self-register" option. NTO uses Customer Community Plus Licenses. Which two steps are needed to complete self-registration in NTO's Experience site?

Choose 2 answers

- A. Ensure that the Contact field is empty in the registration section.
- B. **Contact Sales customer Support to enable Person Accounts.**
- C. Contact Salesforce Customer Support to enable Communities Self Registration Controller.
- D. **Ensure that the Account field is empty in the registration section.**

Answer: B,D

Explanation:

To complete self-registration in NTO's Experience site without creating a placeholder account, NTO needs to take two steps: Ensure that the Account field is empty in the registration section. This will allow NTO to create individual customers without associating them with an account.

Contact Sales customer Support to enable Person Accounts. Person Accounts are a feature that allows NTO to store information about individual customers in a single record, instead of using separate account and contact records. NTO needs to contact Salesforce Customer Support to enable Person Accounts in its org.

NEW QUESTION # 138

Ursa Major Solar (UMS) wants to differentiate between the leads created by partners and the leads created by its own Sales team. All lead records are shared with partners; however, some of the information captured by the Sales team on the lead record should not be shared with partners.

Which two steps should UMS take at a minimum in order to meet the requirement?

Choose 2 answers

- A. Create a separate channel for partners in PRM Workspaces.
- B. Enable "Lead Sharing" in Digital Experience settings.
- C. **Create Lead Record Types for Lead Distribution.**
- D. **Create Page Layouts for Lead Distribution.**

Answer: C,D

Explanation:

To differentiate between the leads created by partners and the leads created by its own Sales team, UMS should create lead record types and page layouts for lead distribution. A record type is a way to offer different business processes, picklist values, and page layouts to different users based on their profiles. A page layout is a way to control the layout and organization of detail and edit pages in Salesforce. By creating lead record types and page layouts, UMS can customize the fields and values that are displayed to partners and Sales team members.

NEW QUESTION # 139

Which three permissions are included for a delegated administrator?

Choose 3 answers

- A. **Generate new passwords for external users.**
- B. **Create and edit external user records.**
- C. **Manage permissions sets for external users on their account.**
- D. Add external users to multiple accounts.
- E. Manage object access for external users.

Answer: A,B,C

Explanation:

Three permissions that are included for a delegated administrator are A, D, and E. A delegated administrator is a user who has limited administrative privileges to perform certain user management tasks on behalf of an administrator. A delegated administrator can create and edit external user records, generate new passwords for external users, and manage permission sets for external users on their account. A delegated administrator cannot manage object access or add external users to multiple accounts.

NEW QUESTION # 140
