Salesforce Certified Experience Cloud Consultant Sample Questions (Q144-Q149):

NEW QUESTION # 144

Cloud Kicks (CK) wants to organize content on its site so that users can easily search and brows for information. Which three features should CK use to accomplish this goal?

- A. Navigation Tree
- B. Content Topics
- C. Navigational Topics
- D. Content Graph
- E. Featured Topic

Answer: A,B,D

Explanation:

Three features that CK should use to organize content on its site are Content Topics, Content Graph, and Navigation Tree. Content Topics are keywords or phrases that help users find and organize content in Experience Cloud sites. Content Topics can be assigned

to any content, such as articles, posts, or files.

Content Graph is a feature that analyzes the relationships between content and topics and suggests relevant content to users based on their interests and preferences. NavigationTree is a component that allows you to create a hierarchical structure of topics and subtopics that users can browse through to find content.

NEW QUESTION # 145

What is the most efficient way that a Salesforce Admin can create a single Experience Cloud Site user from a Contact?

- A. Email the Contact a link to the Self-Registration page for the site.
- B. Use Data Loader to add the Contact in Salesforce as a Customer user.
- C. Enable the Account as a Customer Account so all Contacts in that Account become Customer users.
- **D. Enable the Contact in Salesforce as a Customer user.**

Answer: D

Explanation:

This option allows the Salesforce Admin to create a customer user from an existing contact that is associated with a customer account. The customer user inherits the role, profile, and permission sets from the contact.

The Salesforce Admin can also specify a username, email address, and nickname for the customer user.

NEW QUESTION # 146

Dreamscape Flowers recently launched three Experience Cloud sites for North America, Europe, and Asia Pacific regions. The Community managers have installed the Salesforce Communities Management package and are getting useful insights on adoption and engagement.

During the Community managers' weekly meeting, the Community manager for Europe mentioned that the preconfigured Insights reports cannot be used for their Experience Cloud site.

What is the reason for this issue?

- A. The Community manager for Europe does not have System Administrator privileges.
- B. The Experience Cloud site for Europe has more than a million users.
- **C. The preconfigured Insights reports need to be modified to meet GDPR requirements.**
- D. The Experience Cloud site for Europe is not using Chatter which is needed to use the preconfigured Insights reports.

Answer: C

Explanation:

The reason for this issue is that the preconfigured Insights reports need to be modified to meet GDPR requirements. Insights is a feature that allows you to measure and analyze the adoption and engagement of your Experience Cloud sites using preconfigured reports and dashboards. However, some of these reports may not comply with GDPR, which is a regulation that protects the privacy and data rights of individuals in the European Union. To use Insights for the Experience Cloud site for Europe, the Community manager needs to modify the preconfigured reports to meet GDPR requirements, such as anonymizing user data, obtaining user consent, and deleting user data upon request.

NEW QUESTION # 147

The mission of No More Homelessness (NMH) is to help every homeless person in the best possible manner through its Experience Cloud site. NMH's site manager wants to set up search engine optimization (SEO) to ensure NMH's public Experience Cloud site is visible to search engines.

Which two practices does the site manager need to do to ensure SEO is implemented successfully?

Choose 2 answers

- **A. Check whether the Experience site is public and activated. Pencil & Paper**
- B. Check whether manual sitemap refresh happens on the last day of every month.
- C. Check whether the SEO Institute has provided the approval for the site with end date.
- **D. Check whether a custom robots.txt file to control indexing has been created.**

Answer: A,D

Explanation:

A robots.txt file is a text file that tells web crawlers which pages or files the crawler can or can't request from your site. This is used mainly to avoid overloading your site with requests; it is not a mechanism for keeping a web page out of Google. You can create a custom robots.txt file for your Experience Cloud site to control how search engines index your site.

To make your Experience Cloud site visible to search engines, you also need to make sure that your site is public and activated. A public site allows anyone on the internet to access your site without logging in. An activated site is live and ready for visitors.

NEW QUESTION # 148

Ursa Major Solar (UMS) would like to render a header and footer from an external content management system into its customer portal.

Which feature should UMS use to accomplish this?

- A. Rich Content Editor
- B. Compact Header Properties
- C. CMS Connect
- D. Developer Console

Answer: C

Explanation:

CMS Connect allows you to display content from an external content management system (CMS) in your Experience Cloud site. You can use CMS Connect to render a header and footer from your CMS in your site, as well as other content types such as articles, banners, or images.

NEW QUESTION # 149

.....
