빨리 Fast2test 덤프를 장바구니에 넣으시죠. 그러면 100프로 자신감으로 응시하셔서 한번에 안전하게 패스하실 수 있습니다. 단 한번으로Salesforce Plat-Admn-301인증시험을 패스한다..... 여러분은 절대 후회할 일 없습니다.

Salesforce Plat-Admn-301 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> • Objects and Applications: This section of the exam measures the skills of a Salesforce Business Analyst and covers selecting appropriate object and application-level solutions to meet business needs. It focuses on identifying when to use master-detail relationships, lookups, junction objects, related lists, record types, Schema Builder, and Object Creator. The section also includes improving UI and user experience using App Manager, Lightning App Builder, Dynamic Forms, standard Lightning components, console apps, and tools like the Lightning page analyze button.
주제 2	<ul style="list-style-type: none"> • Cloud Applications: This section of the exam measures skills of Salesforce Consultant and covers the standard Salesforce capabilities that support sales and service operations. It includes features such as products, price books, schedules, orders, quotes, and the tools that help with forecasting and territory management. The section also describes how to create Salesforce Knowledge articles, manage entitlements, support service workflows, and enable interactions through chat, case feed, Omni-Channel, console apps, and Experience Cloud sites. It also introduces the broader Salesforce suite that extends core platform functionality.
주제 3	<ul style="list-style-type: none"> • Data and Analytics Management: This section of the exam measures skills of Salesforce Data Analyst and covers data quality assessment, data enrichment, and duplicate management. It explains how to choose appropriate reporting and analytics tools for advanced requirements, including custom report types, snapshots, formulas, joined reports, and dashboard configurations. It also covers methods for connecting external data sources using big objects, external objects, data warehouses, data lakes, and Salesforce Connect. Finally, it describes the suitable tools and methods for importing data, including Data Loader, Data Import Wizard, and external IDs.
주제 4	<ul style="list-style-type: none"> • Process Automation: This section of the exam measures skills of Salesforce Consultant and covers choosing the right automation tools to solve complex business problems. It focuses on understanding the capabilities and limitations of declarative tools, identifying the right troubleshooting methods, and applying automation correctly within Salesforce's order of execution. This section emphasizes designing efficient, scalable automation using workflow tools, flows, and other declarative features.

주제 5	<ul style="list-style-type: none"> • Environment Management and Deployment: This section of the exam measures skills of Salesforce Administrator and covers moving metadata between environments using tools such as sandboxes, change sets, and managed or unmanaged AppExchange packages. It explains the capabilities and best practices related to deploying changes through change sets to ensure smooth and controlled migrations.

Salesforce Plat-Admn-301최고품질 덤프데모, Plat-Admn-301적중율 높은 시험덤프

IT인증 시험에 도전해보려는 분들은 회사에 다니는 분들이 대부분입니다. 승진을 위해서나 연봉협상을 위해서나 자격증 취득은 지금시대의 필수입니다. Fast2test의Salesforce인증 Plat-Admn-301덤프는 회사다니느라 바쁜 나날을 보내고 있는 분들을 위해 준비한 시험준비공부자료입니다. Fast2test의Salesforce인증 Plat-Admn-301덤프를 구매하여 pdf버전을 공부하고 소프트웨어버전으로 시험환경을 익혀 시험보는게 두렵지 않게 해드립니다. 문제가 적고 가격이 저렴해 누구나 부담없이 애용 가능합니다. Fast2test의Salesforce인증 Plat-Admn-301덤프를 데려가 주시면 기적을 안겨드릴게요.

최신 Salesforce Administrator Plat-Admn-301 무료 샘플문제 (Q147-Q152):

질문 # 147

The finance director at Cloud Kicks asks the administrator for an exception report that shows all B2C accounts that are missing the credit card number. The credit card number is a classic encrypted field.

What action should the administrator take to meet this requirement?

- A. Unmask the encrypted credit card number field to make it available and add a custom filter to a report where credit card number is blank.
- B. Add 'View Encrypted Fields' to a permission set assigned to Finance and system administrators and a summary report filtered by credit card number.
- C. Build a custom checkbox called 'Has Credit Card' that Finance checks when a credit card is recorded and a tabular report filtered on the checkbox equal to false.
- **D. Create a summary report that includes a cross-filter to the Account object with a sub-filter for credit card number equal to null.**

정답: D

설명:

A summary report with a cross-filter is a type of report that allows you to summarize data by grouping rows and columns and applying filters based on related objects and fields. A cross-filter is a filter that lets you include or exclude records in your report based on related objects and their fields. In this case, you can create a summary report that includes a cross-filter to the Account object with a sub-filter for credit card number equal to null. This will show you all B2C accounts that are missing the credit card number, regardless of whether it is encrypted or not. 질문 # 148

A custom object called Item has a many-to-many relationship with the Account and Quota objects. At Cloud Kicks, account owners are changed frequently while ownership of Quota records remains unchanged. When an account owner is updated, the new account owner can only see Item records if they are also the owner of the Quota record.

What step should the administrator take to give access to all Item records?

Change the data format of the Quota relationship field from master-detail to lookup.

- A. Re-assign the Quota master-detail to the primary and the
- **B. Give the account owner Read access to both the Account and the Quota objects**
- C. Account master-detail to secondary.
- D. Create a Quota criteria-based sharing rule using ISCHANGED for the Account Owner field.

정답: B

설명:

Giving the account owner Read access to both the Account and the Quota objects will give access to all Item records. Since Item is a junction object between Account and Quota, users need to have at least Read access to both parent objects to see Item records. If users have access to only one parent object, they will not be able to see Item records related to the other parent object.

질문 # 149

Cloud Kicks has a Process Builder which should trigger upon a status change from on approval process. The Process Builder triggers if the status is updated manually, but not as a result of the approval process update.

What could the administrator do to troubleshoot the issue?

- **A. Check the Reevaluate Workflow Rules After Field Change box on the Approval Process Field Update Action.**
- B. Check the Approval Process to make sure it is on the correct version.
- C. Change the value with a Specific New Field Value so the Process Builder knows what value to look for.
- D. Turn Recursion the Process Builder under the Advanced Settings so the Process Builder fires again.

정답: A

설명:

Check the Reevaluate Workflow Rules After Field Change box on the Approval Process Field Update Action is what the administrator should do to troubleshoot the issue. This option allows the approval process field update to trigger any workflow rules or processes that are based on the updated field value. If this option is not checked, the approval process field update will not trigger any workflow rules or processes, and the Process Builder will not fire

질문 # 150

At Cloud Kicks, the Sales team uses a specific dashboard to see how they are doing daily. The team has asked the administrator for an easier way to see this dashboard.

What should the administrator recommend?

- **A. Add the dashboard to the Sales team's home page.**
- B. Update the Sales team's app with a new dashboard.
- C. Email the dashboard to the Sales Team every morning.
- D. Create a custom app with a dashboard.

정답: A

설명:

A dashboard is a visual display of key metrics and trends for records in your org. Dashboards allow users to quickly monitor performance and identify trends or issues at a glance. To make it easier for users to see a dashboard they use frequently, administrators can add it to their home page using Lightning App Builder. This way, users can see their dashboard every time they log in or go to their home tab without having to navigate elsewhere. 질문 # 151

Support staff at Cloud Kicks work on multiple accounts and opportunities at the same time. Currently, they are switching between browser tabs, which is tedious and confusing. Support managers put in a request for a better agent experience.

What should an administrator recommend?

- **A. Implement Service Console.**
- B. Create a screen flow to pull all related opportunities onto one page.
- C. Enable Subtab Record Browsing in the Setup menu.
- D. Configure Split Lit Views.

정답: A
