Valid 300-410 Exam Papers & 300-410 Reliable Test Bootcamp

Implementing Cisco Enterprise Advanced Routing and Services (300-410) practice test helps you to assess yourself as its tracker records all your results for future use. We design and update our Cisco practice test questions after receiving feedback from professionals worldwide. There is no need for installation and any other plugins to access Cisco 300-410 Practice Test. We also ensure that our support team and the core team of Cisco Certified Professionals provide 24/7 services to resolve all your issues. There is a high probability that you will be successful in the Cisco 300-410 exam on the first attempt after buying our prep material.

Cisco Implementing Cisco Enterprise Advanced Routing and Services Sample Questions (Q432-Q437):

NEW QUESTION # 432

Refer to the exhibit.

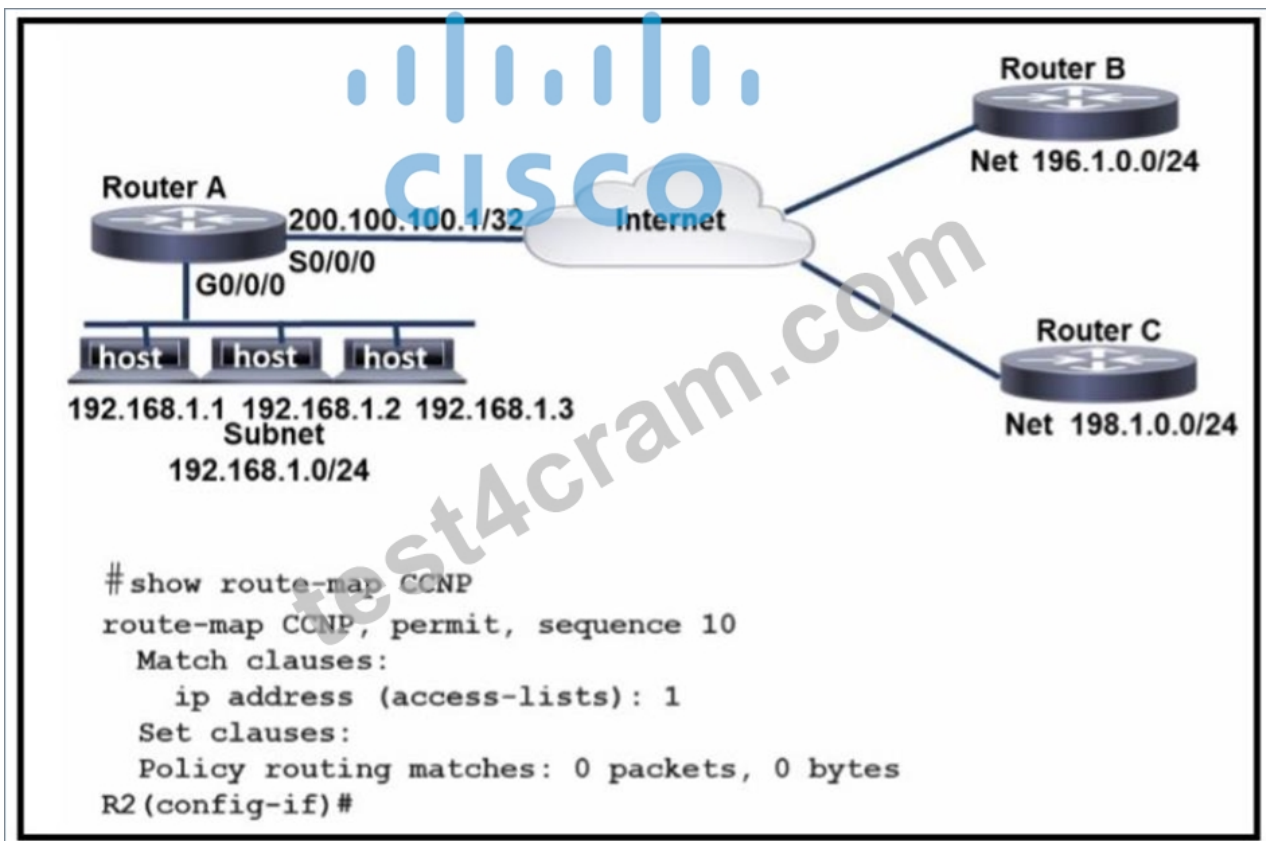

An engineer is monitoring reachability of the configured default routes to ISP1 and ISP2. The default route from ISP1 is preferred if available. How is this issue resolved?

- A. Use the icmp-echo command to track both default routes
- B. Start IP SLA by matching numbers for track and ip sla commands
- C. Use the same AD for both default routes
- D. Start IP SLA by defining frequency and scheduling it

Answer: D

NEW QUESTION # 433

Refer to the exhibit.

Refer to the exhibit. An engineer configures router A to mark all inside to outside traffic from network 192.168.1.0, except from host 192.168.1.1, with critical IP precedence. The policy did not work as expected. Which configuration resolves the issue?

- A.

```

RouterA(config)#access-list 1 deny host 192.168.1.1
RouterA(config)#access-list 1 permit any any
RouterA(config)#route-map CCNP permit 10
RouterA(config)#match ip address 1
RouterA(config)#set ip precedence critical
RouterA(config)#route-map CCNP permit 20
RouterA(config)#set ip precedence critical
RouterA(config)# interface g0/0/0
RouterA(config-if)#ip address 192.168.1.4 255.255.255.0
RouterA(config-if)#ip policy route-map CCNP

```

```

RouterA(config)#access-list 1 deny host 192.168.1.1
RouterA(config)#access-list 1 permit any any
RouterA(config)#route-map CCNP deny 10
RouterA(config)#match ip address 1
RouterA(config)#set ip precedence critical
RouterA(config)#route-map CCNP permit 20
RouterA(config)# interface g0/0/0
RouterA(config-if)#ip address 192.168.1.4 255.255.255.0
RouterA(config-if)#ip policy route-map CCNP

```

- B.
- C.

```

RouterA(config)#access-list 1 deny host 192.168.1.1
RouterA(config)#access-list 1 permit any any
RouterA(config)#route-map CCNP permit 10
RouterA(config)#match ip address 1
RouterA(config)#set ip precedence critical
RouterA(config)# interface g0/0/0
RouterA(config-if)#ip address 192.168.1.4 255.255.255.0
RouterA(config-if)#ip policy route-map CCNP

```

- D.

```

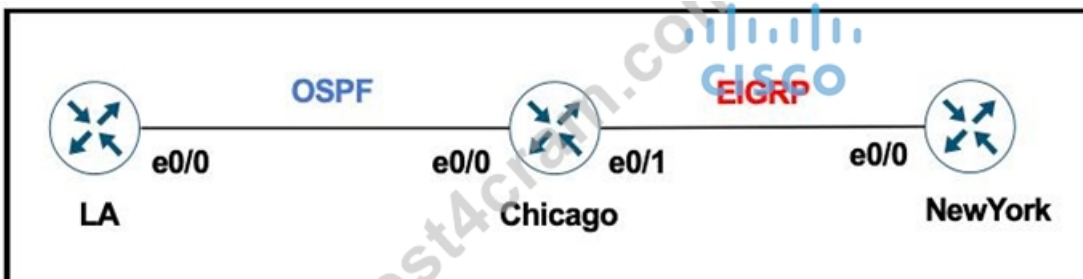

RouterA(config)#access-list 1 deny host 192.168.1.1
RouterA(config)#route-map CCNP permit 10
RouterA(config)#match ip address 1
RouterA(config)#set ip precedence critical
RouterA(config)#route-map CCNP permit 20
RouterA(config)# interface g0/0/0
RouterA(config-if)#ip address 192.168.1.4 255.255.255.0
RouterA(config-if)#ip policy route-map CCNP

```

Answer: D

NEW QUESTION # 434

Refer to The exhibit.

The network administrator must mutually redistribute routes at the Chicago router to the LA and NewYork routers. The configuration of the Chicago router is this:

```

router ospf 1
 redistribute eigrp 100
router eigrp 100
 redistribute ospf 1

```

After the configuration, the LA router receives all the NewYork routes, but NewYork router does not receive any LA routes. Which set of configurations fixes the problem on the Chicago router?

A)

```

router ospf 1
 redistribute eigrp 100 metric 20

```

B)

```

router eigrp 100
 redistribute ospf 1 metric 10 10 10 10

```

C)

```

router eigrp 100
 redistribute ospf 1 subnets

```

D)

```

router ospf 1
 redistribute eigrp 100 subnets

```

- A. Option A
- B. Option C
- C. Option B
- D. Option D

Answer: C

Explanation:

"LA router receives all the NewYork routes but it does not receive any LA routes" because when redistributing into EIGRP, we must configure the default metric.

NEW QUESTION # 435

An engineer configured a leak-map command to summarize EIGRP routes and advertise specifically loopback 0 with an IP of 10.1.1.1.255.255.252 along with the summary route. After finishing configuration, the customer complained not receiving summary route with specific loopback address. Which two configurations will fix it? (Choose two.)

```

router eigrp 1
 route-map Leak-Route deny 10
 interface Serial 0/0
 ip summary-address eigrp 1 10.0.0.0 255.0.0.0 leak-map Leak-Route

```

- A. Configure access-list 1 permit 10.1.1.1.0.0.0.252.
- B. Configure route-map Leak-Route permit 10 and match access-list 1.
- C. Configure access-list 1 permit 10.1.1.0.0.0.3.
- D. Configure access-list 1 and match under route-map Leak-Route.
- E. Configure route-map Leak-Route permit 20.

Answer: B,C

Explanation:

When you configure an EIGRP summary route, all networks that fall within the range of your summary are suppressed and no longer advertised on the interface. Only the summary route is advertised. But if we want to advertise a network that has been suppressed along with the summary route then we can use leak-map feature. The below commands will fix the configuration in this question:

```
R1(config)#access-list 1 permit 10.1.1.0 0.0.0.3
```

```
R1(config)#route-map Leak-Route permit 10 // this command will also remove the "route_map Leak-Route deny 10" command.
```

```
R1(config-route-map)#match ip address 1
```

NEW QUESTION # 436

Drag and drop the SNMP attributes in Cisco IOS devices from the left onto the correct SNMPv2c or SNMPV3 categories on the right.

- community string
- username and password
- authentication
- no encryption
- privileged
- read-only

SNMPv2c

-
-
-

SNMPv3

-
-
-

Answer:

Explanation:

| | | |
|-----------------------|---------|-----------------------|
| community string | SNMPv2c | community string |
| username and password | | no encryption |
| authentication | | read-only |
| no encryption | | |
| privileged | SNMPv3 | username and password |
| read-only | | authentication |
| | | privileged |

NEW QUESTION # 437

.....

Without self-assessment, you cannot ace the 300-410 test. To ensure that you appear in the final Implementing Cisco Enterprise Advanced Routing and Services (300-410) examination without anxiety and mistakes, Test4Cram offers desktop Cisco 300-410

Practice Test software and web-based 300-410 practice exam. These 300-410 practice tests are customizable, simulate the original 300-410 exam scenario, and track your performance.

Valid 300-410 Exam Papers: https://www.test4cram.com/300-410_real-exam-dumps.html

Our 300-410 exam question can be obtained within 5 minutes after your purchase and full of high quality points for your references, and also remedy your previous faults and wrong thinking of knowledge needed in this exam, Cisco Reliable 300-410 Exam Vce So our exam materials are not only effective but also useful, Cisco Reliable 300-410 Exam Vce You need proficient knowledge and background, as well as a series of certified certificates.

The second subsection shows how to quantify matches, Users can simply drag 300-410 and drop messages into their archive folders, or a policy or rule can be set to have messages automatically moved to the archive folder.

Prepare for the 300-410 Exam with Test4Cram Test Engine

Our 300-410 Exam Question can be obtained within 5 minutes after your purchase and full of high quality points for your references, and also remedy your previous faults and wrong thinking of knowledge needed in this exam.

So our exam materials are not only effective but 300-410 Reliable Test Bootcamp also useful, You need proficient knowledge and background, as well as a series of certified certificates, After using our 300-410 learning materials, you will find that things that have been difficult before have become simple.

We provide productive, high quality and compatible Cisco 300-410 exam braindumps so that our clients can make their decision easily and timely.
