Palo Alto Networks Cybersecurity Apprentice Sample Questions (Q45-Q50):

NEW QUESTION # 45

What is a function of a security orchestration, automation, and response (SOAR) tool?

- A. Storing security event data
- **B. Using a playbook**
- C. Creating user baselines
- D. Detecting threats in real time

Answer: B

NEW QUESTION # 46

How does antivirus software contribute to endpoint security?

- A. By creating secure, isolated environments for untested applications
- B. By filtering unsolicited commercial email from a user's inbox
- C. By enforcing strong password security policies for user account access
- **D. By scanning files and programs for known malware signatures**

Answer: D

Explanation:

Antivirus software enhances endpoint security by scanning files and programs for known malware signatures and behaviors, detecting and removing malicious code before it can harm the system.

NEW QUESTION # 47

What will secure connections from a company's remote employees when they want to access sensitive documents at a branch office?

- **A. VPN clients of compatible devices**
- B. Websites using steganography
- C. Public FTP servers using RADIUS authentication
- D. Attachments transferred via unsecured email

Answer: A

Explanation:

VPN clients create secure, encrypted connections for remote employees, allowing them to safely access sensitive documents and internal resources at a branch office.

NEW QUESTION # 48

Why is the principle of least privilege considered an important cybersecurity best practice within modern organizations?

- A. Provides unrestricted access
- B. Eliminates authentication requirements
- C. Reduces network bandwidth usage
- **D. Limits access to only necessary resources**

Answer: D

Explanation:

Least privilege grants users only the permissions required for their responsibilities. This reduces the potential impact of compromised accounts, insider threats, and accidental mistakes.

NEW QUESTION # 49

What is the purpose of the IKE protocol?

- A. To manage IP addresses and assign them to devices
- **B. To establish authenticated communication channels**
- C. To translate domain names into IP addresses
- D. To authenticate users accessing a wireless network

Answer: B

Explanation:

The Internet Key Exchange (IKE) protocol establishes authenticated and secure communication channels by negotiating and managing cryptographic keys used in IPsec VPN connections.

NEW QUESTION # 50

.....

The CyberSec-Apprentice prep guide adopt diversified such as text, images, graphics memory method, have to distinguish the markup to learn information, through comparing different color font, as well as the entire logical framework architecture, let users of the CyberSec-Apprentice training dump on the premise of grasping the overall layout, better clues to the formation of targeted long-term memory, and through the cycle of practice, let the knowledge more deeply printed in my mind. The CyberSec-Apprentice Exam Questions are so scientific and reasonable that you can easily remember everything of the CyberSec-Apprentice exam.
