PMI Agile Certified Practitioner Sample Questions (Q117-Q122):

NEW QUESTION # 117

An agile practitioner notices that team members are disengaged. As a result, the team's velocity has decreased. What should the agile practitioner do to get the team back on track?

- A. Remove stories to increase velocity.
- **B. Hold a standup to address the issue.**
- C. Escalate the issue to the project sponsor.
- D. Facilitate a team retrospective.

Answer: B

NEW QUESTION # 118

An agile practitioner wants to ensure that stakeholders have current information about a project's progress. What should the agile practitioner do?

- **A. Post a project board in an area where all can view it**
- B. Frequently update the online project management office (PMO) repository site
- C. Regularly circulate an updated, detailed version of the project plan
- D. Invite the stakeholders to daily stand up

Answer: A

NEW QUESTION # 119

How does Empirical Process Control support Agile methodologies?

- **A. Visibility, inspection, and adaptation**
- B. Visibility, review, and testing
- C. Testing, requirements, and change
- D. Testing, requirements, and adaptation

Answer: A

NEW QUESTION # 120

Stakeholders are unhappy because they have not been consulted on a user interface (UI) for a project that will have a significant impact on end users once it is launched. How should this situation be handled?

- A. The agile practitioner should inform the stakeholders that the UI has already been approved by the project team and the project sponsor, so the team is committed to staying the course.
- B. All stakeholders should go through the approved project charter and the business requirements document to reduce the number of late changes or requests.
- C. The stakeholders should contact the project sponsor to get the project halted until new requirements are agreed upon.
- **D. The agile team should engage stakeholders regarding the proposed designs and ensure that sufficient engagement occurs throughout the project in an adaptive way.**

Answer: D

NEW QUESTION # 121

During the advanced stages of implementing a complex design, an agile practitioner realizes that the architecture is not scalable for user requirements. The architect suggests a workaround that is minimally adequate but may cause some performance issues.

What should the agile practitioner do?

- A. Tell the team that this is unacceptable for the upcoming project.
- B. Implement the workaround since performance issues can be addressed in the next iteration.
- C. Calculate the cost of redoing the architecture and seek management approval.
- **D. Brainstorm with the team to identify a solution.**

Answer: D

NEW QUESTION # 122
