## **Provides complete coverage of every objective on exam GH-500 Valid Exam Format**

The GH-500 exam questions given in this desktop GitHub Advanced Security (GH-500) practice exam software are equivalent to the actual GitHub Advanced Security (GH-500) exam. The desktop Microsoft GH-500 practice exam software can be used on Window based computers. If any issue arises, the PracticeTorrent support team is there to fix the issue. With more than thousands of satisfied customers around the globe, you can use the Microsoft GH-500 Study Materials of PracticeTorrent with confidence.

## **Microsoft GitHub Advanced Security Sample Questions (Q52-Q57):**

### **NEW QUESTION # 52**

Assuming security and analysis features are not configured at the repository, organization, or enterprise level, secret scanning is enabled on:

- A. Private repositories
- **B. Public repositories**
- C. User-owned private repositories
- D. All new repositories within your organization

**Answer: B**

Explanation:

By default, secret scanning is enabled automatically for all public repositories. For private or internal repositories, secret scanning must be enabled manually unless configured at the organization or enterprise level.

This default behavior helps protect open-source projects without requiring additional configuration.

### **NEW QUESTION # 53**

How many alerts are created when two instances of the same secret value are in the same repository?

- A. 0
- B. 1
- C. 2
- **D. 3**

**Answer: D**

Explanation:

When multiple instances of the same secret value appear in a repository, only one alert is generated. Secret scanning works by identifying exposed credentials and token patterns, and it groups identical matches into a single alert to reduce noise and avoid duplication.

This makes triaging easier and helps teams focus on remediating the actual exposed credential rather than reviewing multiple redundant alerts.

#### NEW QUESTION # 54

As a repository owner, you do not want to run a GitHub Actions workflow when changes are made to any .txt or markdown files. How would you adjust the event trigger for a pull request that targets the main branch? (Each answer presents part of the solution. Choose three.) on:

pull\_request:

branches: [main]

- A. paths:
- **B. - '/\*.\*md'**
- **C. - '/\*.\*txt'**
- **D. paths-ignore:**
- E. - 'docs/\*.\*md'

**Answer: B,C,D**

Explanation:

To exclude .txt and .md files from triggering workflows on pull requests to the main branch:

on: defines the event (e.g., pull\_request)

pull\_request: is the trigger

paths-ignore: is the key used to ignore file patterns

Example YAML:

yaml

CopyEdit

on:

pull\_request:

branches:

- main

paths-ignore:

- '/\*.\*md'

- '/\*.\*txt'

Using paths: would include only specific files instead - not exclude. paths-ignore: is correct here.

#### NEW QUESTION # 55

What role is required to change a repository's code scanning severity threshold that fails a pull request status check?

- A. Triage
- B. Maintain
- **C. Admin**
- D. Write

**Answer: C**

Explanation:

To change the threshold that defines whether a pull request fails due to code scanning alerts (such as blocking merges based on severity), the user must have Admin access on the repository. This is because modifying these settings falls under repository configuration privileges.

Users with Write, Maintain, or Triage roles do not have the required access to modify rulesets or status check policies.

#### NEW QUESTION # 56

Which alerts do you see in the repository's Security tab? (Each answer presents part of the solution. Choose three.)

- A. Repository permissions
- B. Secret scanning alerts
- C. Dependabot alerts
- D. Code scanning alerts
- E. Security status alerts

**Answer: B,C,D**

Explanation:

In a repository's Security tab, you can view:

Secret scanning alerts: Exposed credentials or tokens

Dependabot alerts: Vulnerable dependencies from the advisory database

Code scanning alerts: Vulnerabilities in code detected via static analysis (e.g., CodeQL) You won't see general "security status alerts" (not a formal category) or permission-related alerts here.

#### NEW QUESTION # 57

.....

Users who use our GH-500 real questions already have an advantage over those who don't prepare for the exam. Our study materials can let users the most closed to the actual test environment simulation training, let the user valuable practice effectively on GH-500 practice guide, thus through the day-to-day practice, for users to develop the confidence to pass the exam. For examination, the power is part of pass the exam but also need the candidate has a strong heart to bear ability, so our GH-500 learning dumps through continuous simulation testing, let users less fear when the real test, better play out their usual test levels, can even let them photographed, the final pass exam.
