An engineer needs to deploy a leaf access port policy group in ACI Fabric to support the following requirements:

- Control the amount of application data flowing into the system
- Allow the newly connected device to auto-negotiate link speed with the leaf switch

Which two ACI policies must be configured to achieve these requirements? (Choose two)

☐ A. link level policy

☐ B. L2 interface policy

☐ C. slow drain policy

☐ D. ingress data plane policing policy

☐ E. ingress control plane policing policy

Do you want to have a new change about your life? Do you want to get more respects from other people? Do you long to become a powerful people? If your answer is yes, it is high time for you to use the 300-620 question torrent from our company. As the saying goes, opportunities for those who are prepared. If you have made up your mind to get respect and power, the first step you need to do is to get the 300-620 Certification, because the certification is a reflection of your ability. If you have the 300-620 certification, it will be easier for you to get respect and power. Our company happened to be designing the 300-620 exam question.

Elementary 300-620 practice materials as representatives in the line are enjoying high reputation in the market rather than some useless practice materials which cash in on your worries. We can relieve you of uptight mood and serve as a considerate and responsible company which never shirks responsibility. It is easy to get advancement by our 300-620 practice materials. On the cutting edge of this line for over ten years, we are trustworthy company you can really count on.

New Valid 300-620 Test Question | Reliable Cisco Online 300-620 Bootcamps: Implementing Cisco Application Centric Infrastructure

If you have any questions on our 300-620 exam question, you can just contact us for help. Even if it is a technical problem, our professional specialists will provide you with one-on-one services to help you solve it in the first time. And our 300-620 learning materials are really cost-effective in this respect. We always believe that customer satisfaction is the most important. And we always put the considerations of the customers as the most important matters. Our 300-620 Study Guide won't let you down.

Cisco 300-620 exam is an excellent opportunity for IT professionals to demonstrate their knowledge and skills in ACI implementation and management. Implementing Cisco Application Centric Infrastructure certification is highly valued in the IT industry and can lead to career advancement opportunities in a variety of fields. With the right preparation and training, candidates can successfully pass the exam and earn the Cisco 300-620 Certification.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q151-Q156):

NEW QUESTION # 151

A Cisco APIC is configured with RADIUS authentication as the default. The network administrator must ensure that users can access the APIC GUI with a local account if the RADIUS server is unreachable. Which action must be taken to accomplish this goal?

- A. Associate console authentication with the "RADIUS" realm.

- B. Create an additional login domain that references local accounts
- **C. Enable the fallback check with the default authentication domain**
- D. Reference the local realm in the fallback domain

Answer: C

Explanation:

To ensure that users can access the Cisco APIC GUI with a local account if the RADIUS server is unreachable, the network administrator must enable the fallback check with the default authentication domain. This allows for local authentication as a backup method when RADIUS is not available. The fallback mechanism is crucial for maintaining access to the APIC GUI in case of RADIUS server issues¹.

NEW QUESTION # 152

An engineer must allow multiple external networks to communicate with internal ACI subnets. Which action should the engineer take to assign the prefix to the class ID of the external Endpoint Group?

- A. Enable an L3Out with Shared Route Control Subnet.
- B. Enable the Export Route Control Subnet for the External Endpoint Group flag.
- **C. Configure subnets with the External Subnets for External EPG flag enabled.**
- D. Configure subnets with the Import Route Control Subnet flag enabled.

Answer: C

[x/ACI_Best_Practices/b_ACI_Best_Practices/b_ACI_Best_Practices_chapter_01001.html](https://www.cisco.com/c/en/us/td/docs/switches/datacenter/aci/apic/sw/1-x/ACI_Best_Practices/b_ACI_Best_Practices/b_ACI_Best_Practices_chapter_01001.html)

NEW QUESTION # 153

A network engineer is integrating a new Hyperflex storage cluster into an existing Cisco ACI fabric. The Hyperflex cluster must be managed by vCenter, so a new vSphere Distributed switch must be created. In addition, the hardware discovery must be performed by a vendor-neutral discovery protocol. Which set of steps meets these requirements?

- A. Configure a Switch Policy group, select LLDP, and apply it to the indicated interfaces.
Set up a VMware VMM domain and apply it to the appropriate interfaces.
Enter the APIC management IP and credentials in the Create vCenter Controller dialog box.
- **B. Configure an Interface Policy group, select LLDP, and apply it to the selected interfaces.
Create a VLAN pool, add it to the VMware VMM domain, and include the appropriate interfaces.
Enter the vCenter IP and credentials in the Create vCenter Controller dialog box.**
- C. Configure an Interface Policy group, select CDP, and apply it to the desired interfaces.
Enter the vCenter IP and credentials in the Create vCenter Controller dialog box.
In the Create VMware VMM domain dialog box, select Read-Only Mode.
- D. Configure an Interface Policy group, select CDP, and apply it to the designated interfaces.
Create a VMware VMM domain, add it to the VLAN pool, and associate it to the designated interfaces.
Select Read Only Mode in the Create VMware VMM domain dialog box.

Answer: B

NEW QUESTION # 154

An engineer must configure an export policy that regularly backs up Cisco APIC configuration to a remote location. The backup must be sent by using a secure and encrypted protocol. Which configuration set must be used?

- **A. Configure the export policy with the required export destination.
Set the export destination as SCP.
Set the scheduler settings to recurring.**

- B. Configure the export policy with the required export destination.
Set the export destination as SSH.
Set the scheduler settings to recurring.
- C. Configure the export policy with the required export destination.
Set the export destination as TLS.
Configure the scheduler with a maximum number of nodes.
- D. Configure the export policy with the required export destination.
Set the export destination as AES.
Configure the scheduler with a maximum number of nodes.

Answer: A

Explanation:

To back up Cisco APIC configuration securely and regularly:

1. Export Destination as SCP (Secure Copy Protocol): SCP is a secure and encrypted protocol that ensures configuration backups are securely transmitted to the remote location.
2. Set Scheduler Settings to Recurring: This ensures the backups occur at regular intervals without manual intervention.
3. Export Policy Configuration: The export policy defines the backup parameters, including the destination server and credentials.

NEW QUESTION # 155

A customer must deploy three Cisco ACI based data centers. Each site must be separated from the others. Which characteristic of Cisco ACI Multi-Pod makes it unsuitable for this deployment?

- A. has distance and scale limitations
- **B. requires all pods to share the same Cisco APIC cluster**
- C. places leaf switches in the remote site that belong to the same fabric as at the headquarters site
- D. creates a virtual pod in the remote location

Answer: B

Explanation:

The characteristic of Cisco ACI Multi-Pod that makes it unsuitable for deploying three separate data centers is that it requires all pods to share the same Cisco APIC cluster. In a Multi-Pod deployment, all the pods are part of the same fabric and are managed by a single APIC cluster, which means that they are not completely isolated from each other.

NEW QUESTION # 156

.....

Our 300-620 real exam materials have high appraisal in the market for their quality and high efficiency. Because satisfied customer is the best ads, and the word of mouth communication by the customers give others more sense of credibility than any other form of marketing communication. We know a satisfied customer will come back again for the same or different need to the company, so we always provide high-rank 300-620 real exam materials over ten years. They have experienced all trials of the market these years approved by experts. Besides, they are easy to assimilate so if you get stuck in the bottleneck of review, and under the guidance of our Implementing Cisco Application Centric Infrastructure exam question they are widely regarded as top notch in this area. Recently our 300-620 Guide prep rise to the forefront in the field of practice materials. So if you need other 300-620 real exam materials from us, we will not let you down not even once. Hope you pass the exam once successfully by our Implementing Cisco Application Centric Infrastructure exam question and recommend them to your friends. We are sure you will be splendid!
