Reliable 2V0-16.25 Exam Prep - 2V0-16.25 Braindump Free

Our VMware 2V0-16.25 qualification test help improve your technical skills and more importantly, helping you build up confidence to fight for a bright future in tough working environment. Our professional experts devote plenty of time and energy to developing the 2V0-16.25 Study Tool. You can trust us and let us be your honest cooperator in your future development. Here are several advantages about our VMware 2V0-16.25 exam for your reference.

VMware 2V0-16.25 Exam Questions just focus on what is important and help you achieve your goal. With high-quality 2V0-16.25 guide materials and flexible choices of learning mode, they would bring about the convenience and easiness for you. Every page is carefully arranged by our experts with clear layout and helpful knowledge to remember.

Quiz 2V0-16.25 - Newest Reliable VMware vSphere Foundation 9.0 Administrator Exam Prep

Among global market, VCP-VVF Admin guide question is not taking up such a large share with high reputation for nothing. And we are the leading practice materials in this dynamic market. To facilitate your review process, all questions and answers of our 2V0-16.25 test question is closely related with the real exam by our experts who constantly keep the updating of products to ensure the accuracy of questions, so all 2V0-16.25 guide question is 100 percent assured. We make 2V0-16.25 exam prep from exam candidate perspective, and offer high quality practice materials with reasonable prices but various benefits. The more times you choose us, the more discounts you may get. To make your whole experience more comfortable, we also provide considerate whole package services once you make decisions of our 2V0-16.25 Test Question. If you have any questions related to our 2V0-16.25 exam prep, pose them and our employees will help you as soon as possible.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q44-Q49):

NEW QUESTION # 44
An administrator is tasked to deploy a new eight-node VMware vSAN Express Storage Architecture (ESA) cluster.
What are three minimum requirements to accomplish this? (Choose three.)

- A. 25GbE network interfaces
- B. 10GbE network interfaces
- C. 128GB Memory
- D. SAS solid-state disk (SSD)
- E. PCIe flash device (NVMe)
- F. 256GB Memory

Answer: A,C,E

Explanation:
ForvSAN ESA (Express Storage Architecture), minimum requirements differ from OSA:
* 25GbE NICsare required to handle high-performance traffic. (C)
* NVMe PCIe flash devicesmust be used for storage. (D)
* 128GB Memory minimumper host is required. (F)
Other options:
* A. 10GbE# Only supported in vSAN OSA, not ESA.
* B. 256GB Memory# Recommended for large workloads, not minimum.
* E. SAS SSDs# Not supported in ESA; NVMe required.
References:
VMware Cloud Foundation 9.0 -vSAN ESA Hardware Requirements
VMware Docs: vSAN ESA Deployment Requirements

NEW QUESTION # 45
What is the benefit of enabling lockdown mode on VMware ESX hosts?

- A. Restricts direct access to the ESX host, enhancing security.
- B. Increases CPU and memory resources available to virtual machines (VMs).
- C. Improves network performance.
- D. Simplifies the management of virtual machines.

Answer: A

Explanation:
Lockdown Modeon ESXi hosts is asecurity featurethat restrictsdirect loginto the ESXi host.
* Once enabled, administrators must manage the host throughvCenter Serverinstead of direct DCUI/SSH access (except for exception users).
* This prevents unauthorized local access and improves overall security compliance.
Other options:
* A. Improves network performance# Not related.
* C. Increases CPU/memory for VMs# Not related.
* D. Simplifies VM management# It actually makes direct management more restricted.
References:
VMware vSphere 9.0 -ESXi Lockdown Mode Overview
VMware Docs: Lockdown Mode in ESXi

NEW QUESTION # 46
An administrator is tasked to create a new VMware vSAN cluster. The following information was provided to the administrator:
* Should host high performance application.
* Workload is latency dependent.
* Workload, compute and storage must be in the vSAN cluster.
Which configuration should the administrator choose for this vSAN cluster?

- A. vSAN Original Storage Architecture (OSA)
- B. vSAN Express Storage Architecture (ESA)
- C. vSAN Original Storage Architecture (OSA) Stretched Cluster

- D. vSAN Storage Cluster

Answer: B

Explanation:
The workload requirements specify:
* High-performance application
* Latency-dependent workloads
* Compute and storage must reside in the vSAN cluster
The correct option isvSAN Express Storage Architecture (ESA)because:
* ESA is designed forhigh-performance, low-latency applications.
* It leveragesNVMe-based storage devicesand25GbE networking, delivering better IOPS and reduced latency compared to OSA.
* OSA(Original Storage Architecture) is older and less efficient.
* OSA Stretched Cluster(A) is for resilience across sites, not specifically performance.
* vSAN Storage Cluster (B)is a generic term and not specific.
References:
VMware vSAN 9.0 -ESA vs OSA Architecture
VMware Docs: vSAN Express Storage Architecture

NEW QUESTION # 47
An administrator is tasked to deploy a large-scale VDI environment on a VMware vSAN Original Storage Architecture (OSA) cluster.
Which vSAN feature is required to achieve maximum storage space reduction in this cluster?

- A. Disable Object Checksum.
- B. Object space reservation.
- C. Deduplication and Compression.
- D. Compression only.

Answer: C

Explanation:
In avSAN Original Storage Architecture (OSA) cluster, the feature that provides themaximum storage space reductionisDeduplication and Compression.
* Deduplication removes duplicate blocks across the cluster.
* Compression further reduces the space used by unique blocks.
* These are applied at thedisk group leveland are essential inVDI environmentswhere identical VM images consume space.
Why others are incorrect:
* A. Disable Object Checksum# Only reduces CPU overhead, not storage space.
* C. Object space reservation# Controls reserved capacity, not reduction.
* D. Compression only# Reduces space, but less than Deduplication + Compression combined.
References:
VMware vSphere 9.0 -vSAN OSA Space Efficiency Features
VMware Docs: vSAN Deduplication and Compression

NEW QUESTION # 48
Which component must be added after an initial deployment of VMware vSphere Foundation (VVF) to provide a central location for logs collection?

- A. VCF Operations
- B. VCF Operations for Networks
- C. Fleet Manager
- D. VCF Operations for Logs

Answer: D

Explanation:
After deployingvSphere Foundation, to centralizelog collection and analysis, you must add:
* VCF Operations for Logs, which provides log ingestion, alerting, and centralized troubleshooting.

Other options:
* B. VCF Operations# Focuses on performance/capacity, not log collection.
* C. VCF Operations for Networks# Focuses on networking insights.
* D. Fleet Manager# Used for multi-instance management, not logging.
